SEPTEMBER 30, 2009.—Ordered to be printed

Mr. OBERSTAR, from the Committee on Transportation and Infrastructure, submitted the following

R E P O R T

[To accompany H.R. 3224]

[Including cost estimate of the Congressional Budget Office]

The Committee on Transportation and Infrastructure, to whom was referred the bill (H.R. 3224) to authorize the Board of Regents of the Smithsonian Institution to plan, design, and construct a vehicle maintenance building at the vehicle maintenance branch of the Smithsonian Institution located in Suitland, Maryland, and for other purposes, having considered the same, report favorably thereon without amendment and recommend that the bill do pass.

PURPOSE OF THE LEGISLATION

H.R. 3224 authorizes the Board of Regents of the Smithsonian Institution to plan, design, and construct a vehicle maintenance building at the vehicle maintenance branch of the Smithsonian Institution located in Suitland, Maryland.

BACKGROUND AND NEED FOR LEGISLATION

According to the Smithsonian Institution (Smithsonian), its Office of Facilities Engineering and Operations and Office of Management and Reliability currently manage the bulk of its Vehicle Maintenance Branch operations from the National Zoological Park's General Services Building. The Vehicle Maintenance Branch is responsible for maintenance, repair, and fueling of more than 780 Smithsonian vehicles and pieces of equipment valued at more than \$17 million.

According to the Smithsonian, the location of the Vehicle Maintenance Branch has become increasingly incompatible with the functional and environmental needs of the Zoo's General Services Building. In addition, the Vehicle Maintenance Branch and other offices housed in the General Services Building must be relocated for at least two years while the building undergoes structural renovations that are scheduled to begin in fiscal year 2012.

Transferring the Vehicle Maintenance Branch to a new site will increase the ability of the Smithsonian to use alternative fuels in its vehicles. The Smithsonian proposes to construct a vehicle maintenance building at its facilities in Suitland, Maryland. The proposed site currently has both a Compressed Natural Gas fueling station and a gasoline fueling station. Furthermore, the Smithsonian plans to install E-85 and biodiesel above-ground fuel tanks at the facility. The Zoo's General Services Building does not have the space available to accommodate these alternative fuel tanks.

Construction of the Vehicle Maintenance Branch is estimated to cost \$4 million.

H.R. 3224 would authorize the appropriation of \$4 million for the Smithsonian Institution to plan, design, and construct a vehicle maintenance building at their facilities in Suitland, Maryland. Assuming appropriation of the authorized amounts, CBO estimates

that implementing H.R. 3224 would cost \$4 million over the 2010–2014 period, as shown in the following table. Enacting the bill would not affect direct spending or receipts.

H.R. 3224 contains no intergovernmental or private-sector mandates as defined in the Unfunded Mandates Reform Act and would not affect the budgets of state, local, or tribal governments.
