# National Highway Traffic Safety Administration Cor Masion Save lines, prevent rightes, reduce which entered grades

The cost for each jail day is \$37 per day versus \$20 spent per day on DRC participants. Thus, the County saves about \$1,000 for each offender in the DRC program. In addition, the DRC of

ALTERNATIVE SENTENCES FOR DWI EVALUATION OF A DAY REPORTING CENTER

There is a considerable body of research pointing to repeat DWI offenders as a significant co roblem in this country. Traditionally, s such as treatment, community service, ignition interlocks, home detention with electro

he National Highway Tatlic Safety Administration (HHTSA) has been suamining the effectiveness of various anction for DNI officience (see 7xelic Yorke Nos. 120, 150, 140, 192). A new study conducted by Mid-America Research Institute suamines the effectiveness of another type of succion for pages effectiveness.

DBC have been used in several jurisdiction: as an attemative tor juil for low-risk offinedary: convicted of a variety of offeness. In general, a DBC is a highly structured, non-residential facility that provides supervision, employment assistance, counseling, education, and community resource referrais. The program subscient for this study is the DBC in Maric tay Reporting Center in Maricopa County

## The offenders were all charged with a serious DNII offense such as multiple prior offenses or a DNII that involved a crash. All of these offenders first served a juil term of about two months. The offenders selected for participation in DRC are furior

The Marcings County DBC program provides for house arrest, high supervision with probation officers, alcohol and drug tests, education, and employment. During the day, defendent blow and hour -by-hour schedule of courses officed at DBC or work. If an officiate this is complete the program to or the is instanted to jail or verticed of practice schedules. Each participant's some writeerage time in the DRC program is two to three months, followed by a This study searched the inclusion of 177 DMI allenders in the DRC program compared to a control group of allenders who seen not released into DRC but rather spent, on average, another two months incacorated, and then seen release Two Yaars Laker & Percent Recidence

d from their jail sentence while they are in the program.
