Mr. MOLLOHAN, from the Committee on Appropriations,
submitted the following

R E P O R T

together with

ADDITIONAL VIEWS

[To accompany H.R. 7322]

The Committee on Appropriations submits the following report in
explanation of the accompanying bill making appropriations for
Commerce, Justice, Science, and related agencies for the fiscal year
ending September 30, 2009, and for other purposes.

INDEX TO BILL AND REPORT

	<i>Page Number</i>	
	<i>Bill</i>	<i>Report</i>
Title I—Department of Commerce	2	7
Title II—Department of Justice	22	38
Title III—Science	63	113
Office of Science and Technology Policy	63	113
National Aeronautics and Space Administration	63	114
National Science Foundation	72	135

National Veterans Business Development Corporation	78	146
Office of the United States Trade Representative	79	147
State Justice Institute	79	148
Title V—General Provisions	80	148

BILL TOTALS

The President's fiscal year 2009 budget request for activities funded in the Commerce, Justice, Science and Related Agencies Appropriations Act totals \$53,904,584,000 in new obligation authority, of which \$220,300,000 is for mandatory programs. The amounts recommended by the Committee in the accompanying bill total \$57,079,209,000, \$3,174,625,000 above the budget request and \$5,047,909,000 above the sums available to the departments and agencies funded in this bill for fiscal year 2008, excluding emergency supplemental appropriations.

COMMITTEE BUDGET REVIEW PROCESS

During its review of the fiscal year 2009 budget request and execution of appropriations for fiscal year 2008, the Subcommittee on Commerce, Justice, Science and Related Agencies held a total of 20 budget hearings and two formal subcommittee briefings during the period of February through April 2008. The Committee received testimony from Members of Congress and some 30 outside witnesses. In addition, officials from the Administration representing the departments and agencies funded in this bill testified before the subcommittee on the budget request. The Committee's hearing record consists of 8 volumes and totals nearly 8,000 pages.

As part of the Committee's overview and analysis of the annual budget request from the Administration, the Committee submits a number of requests for additional information and written questions to be answered by the departments and agencies in support of the underlying budget request. These materials are important for the Committee in making its judgments. This year, the Committee is particularly disappointed that the Department of Justice, unlike any other department or agency funded in this bill, was unable to complete these important materials in a timely manner.

In developing its recommendations, the Committee has drawn upon work and analysis of the Government Accountability Office, the Congressional Research Service, offices of Inspectors General, the Committee's own surveys and investigations staff and the National Academies. The Committee appreciates the assistance and contributions of the men and women of these organizations.

MAJOR THEMES AND INITIATIVES

Law enforcement.—In total, the bill provides in excess of \$18,267,921,000 for law enforcement activities, an increase of \$2,149,890,000 over the budget request. Investments recommended by the Committee provide for:

- \$68,400,000 for enhanced methamphetamine enforcement;
- \$112,500,000 for Department of Justice-wide enhancements and new staffing for Adam Walsh and other child exploitation enforcement activities;
- support of state and local law enforcement grants, which the Administration proposed to gut in fiscal year 2009, and for which the Committee has provided nearly \$3,130,000,000;
- \$185,000,000, an increase of \$63,349,000 above the request, to begin to deploy law enforcement interoperability radio communications systems, identified by the 9/11 Commission as a critical shortfall in the aftermath of the 9/11 tragedy;

- Department of Justice-wide border enforcement activities, including additional detention beds, United States attorneys and staff for the Marshals and the Bureau of Alcohol, Tobacco, Firearms and Explosives; and
- full funding of the Federal Bureau of Investigation, at roughly \$7,108,091,000.

Science and technology.—The Committee recommendation includes \$26,069,000,000 to support investments in science and technology, an increase of nearly \$1,700,000,000 over last year, and an increase of over \$500,000,000 over the budget request. Investments in science and technology, engineering and mathematics (STEM) education and workforce development is critical. The 2005 National Academies' report, *Rising Above the Gathering Storm*, voiced concerns that the United States may be unable to compete economically with other nations in the future due to insufficient investments in science and technology research, and in STEM education and workforce development. In response, the Committee bill provides:

- nearly \$6,900,000,000 for the National Science Foundation, an increase of 13 percent over the fiscal year 2008 enacted level, which returns NSF to a doubling path. Within this level, over \$840,000,000 is recommended for education programs of the National Science Foundation, such as Noyce Scholarships and the math and science partnership program;
- nearly \$17,800,000,000 for the National Aeronautics and Space Administration (NASA), an increase of nearly \$460,000,000 over the fiscal year 2008 enacted level. Investments in NASA contribute to economic vitality, science and technology, national security and an improved quality of life. Within the funds recommended for NASA, \$515,000,000 is provided for critical investments in aeronautics research and development to maintain the U.S. leadership in aeronautics, to plan for and implement the Next Generation Air Transportation System and to invest in "green" aircraft technologies. Further, over \$180,000,000 is recommended for education programs, an increase of nearly \$66,000,000 over the request;
- almost \$4,300,000,000 for activities of the National Oceanic and Atmospheric Administration, an increase of over \$356,000,000 over the fiscal year 2008 enacted level and over \$148,000,000 over the budget request. Within the funds recommended for NOAA, over \$376,000,000 is provided for climate change research, analysis, enhanced modeling capabilities, increased data access and archiving, and the restoration of critical satellite climate sensors. Full funding is also provided for acquisition, construction and operations of the GOES-R, NPOESS and NPP satellites. In addition to fully funding the request for NOAA's more traditional mission areas, funding is provided above the request and in areas of critical need such as protected species research and management, habitat conservation and restoration, and ocean resources conservation and assessment; and
- nearly \$817,000,000 for the National Institute on Standards and Technology, including \$122,000,000 for the Manufacturing Extension Partnerships program and \$65,200,000 for the Technology Innovation Program, which leverage private

funds to invest in research and development and improve manufacturing productivity and job creation—both of which the Administration proposed to eliminate.

Global climate change and sustainability.—The Committee has provided nearly \$1,900,000,000 in resources to address the reality of global warming climate change and its effect on the Earth’s environments, almost \$200,000,000 over the fiscal year 2008 enacted level. Specifically, the bill provides:

- over \$1,300,000,000 in climate change programs at NASA, including over \$150,000,000 to accelerate Earth science missions and to develop and demonstrate space-based climate measurements, identified by the National Academy of Sciences and the science community;
- over \$376,000,000 for the National Oceanic and Atmospheric Administration, of which \$74,000,000 is to restore critical climate sensors to weather satellites and nearly \$71,000,000 is to enhance climate change analysis capability;
- over \$230,000,000 for climate change programs at the National Science Foundation;
- nearly \$25,000,000 for educational programs directed at climate change as recommended by the National Academy of Sciences;
- nearly \$15,000,000 for “green” building initiatives within the Economic Development Administration;
- \$7,500,000 for climate change standards development by the National Institute for Standards and Technology; and
- additional resources above the request to enhance the protection of endangered species, increase habitat conservation, and monitor mammal adaptation to climate change.

COMMITTEE RECOMMENDATION BY MAJOR AGENCY

Department of Commerce.—In title I of this bill, the Committee recommends a total of \$8,706,889,000, an increase of \$490,371,000 over the budget request and \$1,850,355,000 over the fiscal year 2008 enacted level. Highlights of the Committee’s recommendation include:

- \$250,000,000 for the Economic Development Assistance Programs, an increase of \$150,000,000 over the request;
- \$2,604,622,000 for the Bureau of the Census, an increase of \$1,374,378,000 above fiscal year 2008 for the 2010 Decennial Census, which does not include the June 9 budget amendment requesting an additional \$540,380,000;
- \$816,860,000 for the National Institute of Standards and Technology, which includes \$187,200,000 for the Manufacturing Extension Partnerships and the Technology Innovation Program, both proposed for elimination by the Administration. In addition, the bill includes \$500,660,000 for scientific and technical research, which is \$60,143,000 over fiscal year 2008; and
- \$4,252,640,000 for the National Oceanic and Atmospheric Administration, which is \$356,156,000 above fiscal year 2008 and \$148,727,000 over the request.

Department of Justice.—In title II of this bill, the Committee recommends a total of \$25,438,765,000 an increase of \$2,349,890,000 over the budget request and \$1,846,849,000 over the fiscal year

2008 enacted level. Highlights of the Committee's recommendation include:

- \$7,108,091,000 for the Federal Bureau of Investigation, of which \$3,754,985,000 is for counterterrorism and other national security activities;
- \$3,129,100,000 for state and local assistance programs, including the Office on Violence Against Women, Office of Justice Programs and Community Oriented Policing Services;
- \$1,939,084,000 for the Drug Enforcement Administration, including \$30,600,000 for methamphetamine enforcement programs that have been curtailed by the Administration; and
- \$5,733,889,000 for the Federal Prison System, an increase of \$200,000,000 over the request, to address overburdened conditions in our federal prisons.

Science.—In title III of this bill, the Committee recommends a total of \$24,628,370,000, an increase of \$154,767,000 over the budget request and \$1,248,786,000 over the fiscal year 2008 enacted level. Highlights of the Committee's recommendation include:

- \$6,854,100,000 for the National Science Foundation (NSF), an increase of almost \$789,100,000 over the fiscal year 2008 enacted level, returning NSF to a doubling path;
- \$17,768,967,000 for the National Aeronautics and Space Administration, an increase of almost \$460,000,000 over the fiscal year 2008 enacted level and over \$154,000,000 more than the budget request; and
- \$5,303,000 for the Office of Science and Technology Policy of the Executive Office of the President.

Related agencies.—In title IV of this bill, the Committee recommends a total of over \$883,000,000, an increase of almost \$100,000,000 over the budget request and almost \$75,000,000 over the fiscal year 2008 enacted level. Highlights of the Committee's recommendation include:

- \$390,000,000 for the Legal Services Corporation, an increase of \$79,000,000 over the budget request and almost \$40,000,000 over the fiscal year 2008 enacted level;
- \$350,425,000 for the Equal Employment Opportunity Commission, \$21,125,000 over the fiscal year 2008 enacted level and \$8,500,000 over the budget request; and
- funding for the National Veterans Business Development Corporation and State Justice Institute though the Administration had proposed to eliminate funding for these agencies in fiscal year 2009.

CONGRESSIONALLY-DIRECTED ITEMS

Congress has made significant reforms in the way it reviews funding for the Federal government; reforms which the Committee takes very seriously as it executes its constitutional authority. Earmarking or directed spending of Federal dollars does not begin with Congress. It begins with the Executive branch. The Administration goes through a process that is the functional equivalent of earmarking. For example, the Administration requests funding for specific projects, such as the following projects:

National Oceanic and Atmospheric Administration:	
Pacific Regional Center, Honolulu, HI	\$60,250,000

Southwest Fisheries Science Center, La Jolla, CA	15,000,000
Satellite operations facility, Fairbanks, AK	11,700,000
National Institute of Standards and Technology:	
Building 1 extension, Boulder, CO	43,538,000
JILA expansion, Boulder, CO	13,000,000
Federal Bureau of Investigation:	
FBI Academy	9,800,000
National Aeronautics and Space Administration:	
Collaborative support facility, Ames Research Center	29,000,000

When the Committee reviews the budget request, it goes through a process of rigorous review and may alter or modify this list to reflect additional priorities.

The Executive branch also engages in another practice which steers or directs money to specific entities through a process of contracting out various activities and services. In many important work locations, the number of people working for contractors exceeds the number of Federal employees in the same building or location. Many of these, in fact, are non-competitive or sole-sourced. When added together, the Executive branch steers or directs far greater spending to specific projects or corporations than is directed or earmarked by Congress. Moreover, the practice of non-competitive contracts has exploded in the past five years.

REPROGRAMMING AND SPENDING PLAN PROCEDURES

The reprogramming process is based on comity between the Congress and the Executive branch. This process is intended to provide departments and agencies sufficient flexibility to meet changing circumstances and emergent requirements not known at the time of Congressional review of the budget, while preserving Congressional priorities and intent. In the absence of comity and respect for the prerogatives of Congress, the Committee may choose to restrict further or eliminate reprogramming authority. Under such circumstances, programs, projects and activities become more strictly defined and the executive branch loses its ability to propose changes in the use of appropriated funds.

The Committee is concerned that, in some instances, the departments or agencies funded within this appropriations Act may not be adhering fully to the Committee's reprogramming policies and procedures. The Committee expects that each department and agency funded in this Act shall follow the directions set forth in this Act and the accompanying report, and shall not reallocate resources or reorganize activities except as provided herein. Reprogramming procedures shall apply to funds provided in this Act, unobligated balances from previous appropriations Acts that are available for obligation or expenditure in fiscal year 2009, and non-appropriated resources such as fee collections that are used to meet program requirements in fiscal year 2009. In reiterating the Committee's reprogramming procedures here, which are codified as section 505 of this Act, the Committee expects that the Appropriations Subcommittee on the Departments of Commerce, Justice, Science and Related Agencies of the House and Senate will be notified by letter a minimum of 15 days prior to—

- (1) reprogramming of funds, whether permanent or temporary, in excess of \$500,000 or 10 percent, whichever is less, between programs or activities. This provision is also applicable in cases where several activities are involved with each re-

ceiving less than \$500,000. In addition, the Committee is to be notified of reprogramming actions which are less than these amounts if such actions would have the effect of committing the agency to significant funding requirements in future years;

(2) increasing funds or personnel by any means for any project or activity for which funds have been denied or restricted;

(3) relocating offices or employees;

(4) reorganizing offices, programs, or activities;

(5) contracting out or privatizing any functions or activities presently performed by Federal employees; or

(6) proposing to use funds directed for a specific activity by either the House or the Senate for a different purpose.

Furthermore, the reprogramming authorities do not allow the obligation of funds to create or initiate any new program, project or activity.

Any reprogramming request shall include any out-year budgetary impacts and a separate accounting of program or mission impacts on estimated carryover funds. No changes shall be made to any program, project or activity, except as provided by the Committee, if it is to be construed to be a change in policy. Any program, project or activity cited in the reports of the House or Senate accompanying this Act or the conference agreement shall be construed as the position of the Committee and shall not be subject to reductions or reprogramming without prior approval of the Committee. The Committee further expects any department or agency funded in this Act which plans a reduction-in-force to notify by letter the Appropriations Committees of the House and Senate 30 days in advance of the date of any such planned personnel action.

The Committee notes that when a department or agency submits a reprogramming or transfer request to the Appropriations Committees of the House and Senate and does not receive identical responses from the House and Senate, it shall be the responsibility of the department or agency seeking the reprogramming to reconcile the differences between the two bodies before proceeding. If reconciliation is not possible, the items in disagreement in the reprogramming or transfer request shall be considered unapproved.

Lastly, the Committee directs the Departments of Commerce and Justice, the National Aeronautics and Space Administration and the National Science Foundation to submit spending plans, signed by the respective department or agency head, for the Committee's review within 120 days of enactment of this Act.

TITLE I—COMMERCE

INTERNATIONAL TRADE ADMINISTRATION

OPERATIONS AND ADMINISTRATION

Fiscal Year 2008 enacted ¹	\$413,172,000
Fiscal Year 2009 request ²	429,870,000
Recommended in the bill ²	434,870,000
Bill compared with:	
Fiscal Year 2008 enacted	+21,698,000
Fiscal Year 2009 request	+5,000,000

¹Includes \$8,000,000 in offsetting fee collections.

²Includes \$9,439,000 in offsetting fee collections.

The mission of the International Trade Administration is to create economic opportunity for U.S. workers and firms by promoting international trade, opening foreign markets, ensuring compliance with trade laws and agreements, and supporting U.S. commercial interests at home and abroad.

The Committee recommendation includes \$434,870,000 in total resources for the programs of the International Trade Administration (ITA) for fiscal year 2009, which is \$21,698,000 above the current year level and \$5,000,000 above the request. The Committee directs the additional funding be used to keep the Trade Compliance Office in Korea open, and to mitigate the unsubstantiated savings for efficiencies in Manufacturing and Services and the U.S. and Foreign Commercial Service that are assumed in the request. Not less than the following amounts are to be available for the following activities:

Import administration	\$66,357,000
Market access and compliance (MAC)	42,332,000
Manufacturing and services	48,592,000
Executive direction	25,411,000
U.S. & Foreign Commercial Service	237,739,000

The Committee continues to direct ITA to submit to the Committee, not later than 60 days after the enactment of this Act, a spending plan for all ITA units that incorporates any carryover balances from prior fiscal years. Further, beginning with the second quarter, the Committee expects this plan to be updated to reflect the obligation of funds on a quarterly basis.

The Committee understands the difficulties of attempting to balance both the positive and negative effects of a free trade agenda. The Committee is determined to ensure that the United States Government upholds its responsibility to enforce trade laws, particularly with China. If trading partners do not abide by the rules that are set in the global trading system, United States firms are unable to compete on a level playing field. The United States Government has an obligation to ensure that U.S. companies are not forced to compete with foreign companies that are engaged in unfair trading practices.

Import Administration.—The Committee recommendation includes not less than \$66,357,000 for the Import Administration (IA). This program investigates antidumping and countervailing duty cases to ensure compliance with applicable U.S. statutes and administers certain other statutory programs relating to imports and foreign trade zones. The Committee urges the ITA to implement proactive trade enforcement activities, including textile safeguard actions with respect to China's World Trade Organization Accession Agreement, bilateral quotas on non-WTO members, and textile provisions of the United States preferential programs and agreements.

Office of China Compliance.—The Committee continues language designating \$5,900,000 for this Office within the total appropriation for IA. The Committee is concerned that the Office is understaffed and undergoing a reorganization that may potentially damage its long-term effectiveness. The Committee directs IA to fully staff anti-dumping efforts.

This Office was created to specialize in anti-dumping (AD) cases involving China, with special attention on small- and medium-sized

domestic businesses. The Committee understands that only fifteen percent of the analysts in this Office have Chinese language skills. The Committee reiterates its direction that the Office should consist of experienced investigators, accountants, trade analysts, and technical experts to investigate aggressively AD cases. The Committee expects to be notified of any impediments to hiring or retaining this expertise.

China Countervailing Duty (CVD) Group Initiative.—The Committee provides \$4,200,000 for this new initiative within the total for IA, the same amount as in the request. These funds will allow IA to meet the expected workload associated with the application of countervailing duty law to non-market economies.

Import Monitoring.—The Committee expects ITA to undertake apparel import monitoring, including socks, focusing on prices of imports from China and Vietnam and whether their industries are illegally pricing products and dumping in the U.S. market.

Market Access and Compliance (MAC).—The Committee recommendation includes \$42,332,000 for this purpose. The Committee continues to support the efforts of the ITA to enforce trade agreements aggressively. MAC develops strategies to overcome market access obstacles faced by U.S. businesses by monitoring foreign country compliance with multilateral and bilateral trade-related agreements and identifying compliance and other market access obstacles.

Manufacturing and Services.—This program focuses on both the domestic and international aspects of U.S. industrial competitiveness by working with U.S. industries to evaluate the needs of the U.S. manufacturing and service sectors; conducting economic and regulatory analysis to strengthen U.S. industry; obtaining input and advice from U.S. industries for trade policy setting; and participating, as appropriate, with ITA trade policy and negotiation advancement initiatives. For fiscal year 2009, the Committee recommendation provides \$48,592,000.

Executive Direction and Administration.—The Committee recommendation includes \$25,411,000 for the administrative and policy functions of ITA. These programs provide policy leadership, information technology support and administration services for all of ITA. Executive Direction includes the Office of the Under Secretary for International Trade and subordinate offices covering Legislative and Intergovernmental Affairs, Public Affairs, and the Office of the Chief Information Officer.

Trade promotion and the U.S. & Foreign Commercial Service.—The Commercial Service conducts trade promotion programs intended to broaden and deepen the base of U.S. exports, particularly of small and medium-sized firms; provides American companies with reliable advice on the range of public and private assistance available and knowledgeable support for all other Federal trade promotion services; offers export assistance through information, referral and follow-up services through its integrated global field network; ensures adequate support for compliance and leads inter-agency advocacy efforts for major overseas projects, including early involvement in project development and assistance to resolve post-export transaction problems. For fiscal year 2009, the Committee recommendation provides \$237,739,000.

Travel expenditures.—The Committee directs the Department to increase the number of investigative teams traveling to China and India, the sources of most trade complaints, to verify documentation of information provided by foreign companies. The Committee expects the Department to submit quarterly reports to the Committee regarding the ITA's travel expenditures, including separate breakouts of funding, number of trips and the purposes of travel to both China and India.

Within the appropriation \$3,000,000 is provided for the following activities:

INTERNATIONAL TRADE ADMINISTRATION
CONGRESSIONALLY-DESIGNATED ITEMS
(\$ in thousands)

Recipient	Project	Location	Recommended amount
Cornell University	National Textile Center	Ithaca, NY	\$200
Georgia Institute of Technology	National Textile Center	Atlanta, Georgia	100
National Textile Center and the Textile/Clothing Technology Corporation [TC]2.	National Textile Center/[TC]2	Raleigh, NC and Cary, NC	100
National Textile Centers program	National Textile Centers	Spring House, PA	250
NC State University	NC State Textile Research	Raleigh, NC	1,000
St. Francis University & St. Vincent College.	St. Francis University Center for Global Competitiveness.	Loretto, PA and Latrobe, PA	350
Textile/Clothing Technology Corporation [TC].	[TC]2 Textile Research	Cary, NC	1,000

BUREAU OF INDUSTRY AND SECURITY
OPERATIONS AND ADMINISTRATION

Fiscal Year 2008 enacted	\$72,855,000
Fiscal Year 2009 request	83,676,000
Recommended in the bill	83,676,000
Bill compared with:	
Fiscal Year 2008 enacted	+10,821,000
Fiscal Year 2009 request	

The mission of the Bureau of Industry and Security (BIS) is to advance U.S. national security, foreign policy, and economic objectives by ensuring an effective export control and treaty compliance system and promoting continued U.S. strategic technology leadership.

The Committee recommends \$83,676,000 for BIS, which is \$10,821,000 above the fiscal year 2008 level and the same as the budget request. Of the amount provided, \$14,767,000 is for inspections and other activities related to national security. The recommendation includes \$2,385,000 for program enhancements and new initiatives that will advance BIS' export control and enforcement activities.

Management and Policy Coordination (MPC).—The Management and Policy Coordination program supports all Bureau performance goals. MPC develops, analyzes, and coordinates policy initiatives within BIS and on an interagency basis.

Export Administration (EA).—The Export Administration carries out BIS programs related to export control regulations, export licenses, treaty compliance, treaty obligations relating to weapons of mass destruction, and the defense industrial and technology base

to meet national security needs. EA regulates the export of dual-use items determined to require export licenses for reasons of national security, nonproliferation, foreign policy, or short supply; ensures that approval or denial of license applications is consistent with U.S. economic and security concerns; promotes an understanding of export control regulations within the business community; represents the Department in interagency and international fora relating to export controls, particularly multilateral regimes; monitors and seeks to ensure the availability of industrial resources for national defense under the Delegation of Procurement Authority; analyzes the impact of export controls on strategic industries; and assesses the security consequences for the United States of certain foreign investments.

Export Enforcement (EE).—The Export Enforcement program detects and prevents the illegal export of controlled goods and technology. EE investigates and helps sanction violators of U.S. export control, anti-terrorist and public safety laws and regulations; educates the business community to help prevent violations; and administers the Export Administration Act (EAA) (which expired on August 19, 2001, but the provisions remain in force under the International Emergency Economic Powers Act (IEEPA), Executive Order 13222, as extended most recently by the Notice of August 3, 2006 (71 Fed. Reg. 44551 (August 7, 2006)) provisions restricting participation in foreign boycotts.

ECONOMIC DEVELOPMENT ADMINISTRATION

Fiscal Year 2008 enacted	\$279,932,000
Fiscal Year 2009 request	132,800,000
Recommended in the bill	282,800,000
Bill compared with:	
Fiscal Year 2008 enacted	+2,868,000
Fiscal Year 2009 request	+150,000,000

The mission of the Economic Development Administration (EDA) is to lead the Federal economic development agenda by promoting innovation and competitiveness, thus preparing American regions for growth and success in the worldwide economy. The Committee recommendation includes \$282,800,000 for the programs and administrative expenses of the EDA for fiscal year 2009, which is \$150,000,000 above the request and \$2,868,000 above fiscal year 2008. The total recommendation for EDA consists of the amounts appropriated in the following two accounts.

ECONOMIC DEVELOPMENT ADMINISTRATION PROGRAMS

Fiscal Year 2008 enacted	\$249,100,000
Fiscal Year 2009 request	100,000,000
Recommended in the bill	250,000,000
Bill compared with:	
Fiscal Year 2008 enacted	+900,000
Fiscal Year 2009 request	+150,000,000

Economic Development Assistance Programs promote regional economic development efforts that benefit distressed communities. The Committee recommendation includes \$250,000,000 for the Economic Development Assistance Programs, an increase of \$150,000,000 above the request and \$900,000 above fiscal year 2008. Of the amounts provided, funds are to be distributed as follows:

Global climate change mitigation fund	\$14,700,000
Public works	138,280,000
Planning	31,000,000
Technical assistance	9,400,000
Research and evaluation	490,000
Trade adjustment assistance	15,800,000
Economic adjustment assistance	40,330,000

Global Climate Change Mitigation Fund.—The Committee notes the increased construction costs associated with the incorporation of technologies and strategies which reduce energy consumption and harmful gas emissions and contribute to sustainability, and provides \$14,700,000 for the Global Climate Change Mitigation Incentive Fund, \$13,200,000 above the request and \$5,300,000 above fiscal year 2008. The Committee emphasizes that to be successful in today's environment, economic development must address the effects of climate change. The Committee directs EDA to provide a report and spend plan on the Fund no later than 90 days after enactment of the Act. The report should detail the scope of the fund, the criteria for approval of fund expenditures, and the methodology EDA will employ when reviewing grants.

Public Works.—The Committee provides \$138,280,000 for Public Works, \$131,080,000 above the budget request. The Committee believes that, given the current economic climate, these funds are critical to local communities and industries faced with increased economic pressures and dislocations in the rapidly changing global economy.

Planning.—The Committee provides \$31,000,000 for planning, \$4,000,000 above the request, and directs the agency to allocate \$3,700,000 of the additional planning resources to the existing network of 370 Economic Development Districts (EDDs), with the remaining \$300,000 to reduce the backlog of designated-but-unfunded EDDs. This increase provides EDDs with the flexibility needed to engage local government, business and community leadership in setting and pursuing strategic job creation and retention initiatives effectively.

Trade Adjustment Assistance (TAA).—The Committee provides \$15,800,000 for trade adjustment assistance, an increase of \$1,700,000 over the request. Of that amount, not less than \$200,000 and no more than \$350,000 shall be available to fund permanent FTE to address the chaotic conditions that have recently characterized the program. The Committee is concerned about reports that TAA has relied on interns for the bulk of the work, and reminds EDA that interns should supplement staff, not replace them, particularly as efforts are made to improve overall organization and implementation of the program.

The Committee strongly believes that economic diversification and innovation, fueled by entrepreneurship, promotes robust, sustainable economic growth and the competitiveness of American communities and regions. The Committee's intent is that funds be spent with the specific purpose and criteria set forth in the enabling legislation. The Committee encourages EDA to incorporate into its project evaluation and selection criteria greater consideration for projects that diversify the local regional economy, support the development of new regional economic drivers and emerging industry clusters, advance innovation, entrepreneurship and tech-

nology transfer, and encourage the commercialization of university-led research and development.

SALARIES AND EXPENSES

Fiscal Year 2008 enacted	\$30,832,000
Fiscal Year 2009 request	32,800,000
Recommended in the bill	32,800,000
Bill compared with:	
Fiscal Year 2008 enacted	+1,968,000
Fiscal Year 2009 request	

The administration of EDA's Economic Development Assistance Programs is carried out through a network of headquarters and regional offices. These activities include pre-application assistance and development, application processing, and project monitoring as well as general support functions such as economic development research, technical assistance, information dissemination, legal and environmental compliance, financial management, budgeting and debt management. The Committee recommendation includes \$32,800,000 for the salaries and expenses of the EDA, the same as the request and \$1,968,000 above fiscal year 2008.

MINORITY BUSINESS DEVELOPMENT

Fiscal Year 2008 enacted	\$28,623,000
Fiscal Year 2009 request	29,000,000
Recommended in the bill	31,500,000
Bill compared with:	
Fiscal Year 2008 enacted	+2,877,000
Fiscal Year 2009 request	+2,500,000

The mission of the Minority Business Development Agency (MBDA) is to achieve entrepreneurial parity for Minority Business Enterprises by promoting their ability to grow and to compete in the global economy. MBDA helps minority-owned businesses obtain access to public and private debt and equity financing, market opportunities, and management and business information to increase business growth in the minority business community.

The Committee recommendation includes \$31,500,000 for the Minority Business Development Agency for fiscal year 2009. The recommendation is \$2,500,000 above the request and \$2,877,000 above fiscal year 2008. Within the appropriation, \$525,000 is provided for the following activities:

MINORITY BUSINESS DEVELOPMENT AGENCY CONGRESSIONALLY-DESIGNATED ITEMS (\$ in thousands)

Recipient	Project	Location	Recommended amount
Rural Enterprises of Oklahoma, Inc. (REI)	REI Business and Resource Center at Eastern Oklahoma State College.	Durant, Oklahoma	\$175
Team NEO	Northeast Ohio Minority Business Attraction Initiative.	Cleveland, Ohio	150
West Liberty State College	Emerging Minority Business Leaders.	West Liberty, West Virginia	200

ECONOMICS AND STATISTICS ADMINISTRATION

SALARIES AND EXPENSES

Fiscal Year 2008 enacted	\$81,075,000
Fiscal Year 2009 request	90,621,000
Recommended in the bill	89,121,000
Bill compared with:	
Fiscal Year 2008 enacted	+8,046,000
Fiscal Year 2009 request	-1,500,000

The mission of the Economics and Statistics Administration (ESA) is to provide leadership and critical oversight of the Census Bureau and Bureau of Economic Analysis. The mission of the Bureau of Economic Analysis (BEA) is to promote the understanding of the U.S. economy by providing timely, relevant, and accurate economic accounts data. These statistics are key ingredients in decisions affecting interest and exchange rates, tax and budget projections, business investment plans, and the allocation of over \$214 billion in Federal funds, including programs such as Medicaid and Temporary Assistance for Needy Families (TANF) among others. BEA prepares national, regional, industry and international accounts that present essential information on such issues as economic growth, regional economic development, inter-industry relationships and the Nation's position in the world economy.

The Committee recommendation provides \$89,121,000 for the ESA, which is \$1,500,000 less than the request and \$8,046,000 above fiscal year 2008. The Committee recommendation reduces the Economics and Statistics Administration headquarters management activities by \$1,500,000 below the request, given the ESA's limited and ineffective oversight of the Census Bureau.

BUREAU OF THE CENSUS

Fiscal Year 2008 enacted	\$1,230,244,000
Fiscal Year 2009 request ¹	2,604,622,000
Recommended in the bill ¹	2,604,622,000
Bill compared with:	
Fiscal Year 2008 enacted	+1,374,378,000
Fiscal Year 2009 request	

¹Excludes pending budget amendment of \$545,840,000.

The mission of the Bureau of the Census (Census) is to serve as the leading source of quality data about the Nation's people and economy. To accomplish this mission, Census measures those trends and segments of our population and economy most critical to continued American success and prosperity. The Committee recommendation includes a total operating level of \$2,604,622,000 for the Bureau of the Census, which is the same as the request and \$1,374,378,000 above fiscal year 2008.

SALARIES AND EXPENSES

Fiscal Year 2008 enacted	\$202,838,000
Fiscal Year 2009 request	238,740,000
Recommended in the bill	238,740,000
Bill compared with:	
Fiscal Year 2008 enacted	+35,902,000
Fiscal Year 2009 request	

This appropriation provides for the collection, compilation, and publication of a broad range of current economic, demographic, and

social statistics, to include current economic, general economic, foreign trade, and current demographic statistics, and survey development and data services. The Committee recommendation includes \$238,740,000 for the salaries and expenses of the Bureau of the Census for fiscal year 2009, which is the same as the request and \$35,902,000 above fiscal year 2008.

Current economic statistics.—The business statistics program provides current information on sales and related measures of retail and wholesale trade and selected service industries. Construction statistics are provided on significant construction activity, while manufacturing statistics survey key industrial commodities and manufacturing activities, providing current statistics on the quantity and value of industrial output.

Improved measurement of service.—The Committee provides \$39,342,000, an increase of \$8,118,000 over 2008, which is the same as the request, to provide quarterly and annual coverage of all twelve service sectors, matching the coverage of the quinquennial Economic Census. This new initiative will provide the Bureau of Economic Analysis (BEA), the Council of Economic Advisors, the Federal Reserve Board, and other policymakers, business leaders, and the American public with comprehensive and timely data on the service economy, which now accounts for 55 percent of economic activity.

Current demographic statistics.—Household surveys provide information on the social and economic characteristics of the population. The Census Bureau also provides current reports and future projections on the geographic and demographic characteristics of the U.S. population. International statistics provide estimates of demographic and economic characteristics for various countries.

Survey of Income and Program Participation (SIPP).—The Committee provides \$45,742,000, the same as the request and an increase of \$21,180,000 over fiscal year 2008, to re-establish SIPP with a full sample of 45,000 households in September 2008. Funds provided will also allow for improvements to the SIPP system by fiscal year 2012, including updating computer programming; improving survey content; investigating, testing, and as appropriate implementing an Event History Calendar; and security enhancements to laptops used in the field.

Current Population Survey (CPS).—The Committee provides \$14,359,000, which is the same as the request and includes an increase of \$1,452,000 over fiscal year 2008. These funds will be used to maintain accuracy, relevancy, security and confidentiality of CPS data, and maintain the reliability of CPS estimates.

Survey development and data services.—The Statistical Abstract of the United States summarizes Government and private statistics of the industrial, social, political, and economic activities of the United States. This function also supports general research on survey methods and techniques to improve the efficiency, accuracy, and timeliness of statistical programs.

PERIODIC CENSUSES AND PROGRAMS

Fiscal Year 2008 enacted	\$1,027,406,000
Fiscal Year 2009 request ¹	2,365,882,000
Recommended in the bill ¹	2,365,882,000
Bill compared with:	
Fiscal Year 2008 enacted	+1,338,476,000
Fiscal Year 2009 request	

¹Excludes pending budget amendment of \$545,840,000.

The Committee recommendation includes a total of \$2,365,882,000 for all periodic censuses and related programs in fiscal year 2009, which is the same as the budget request and \$1,338,476,000 above fiscal year 2008.

2010 Decennial Census Program.—The Committee provides \$2,143,149,000, which is the same as the request and an increase of \$1,342,215,000 over fiscal year 2008. Funds for the 2010 Census program are provided to: (1) complete dress rehearsal operations and assessments and conduct several major operations for the 2010 Census, while making final preparations for the remaining operations; and (2) continue to conduct the American Community Survey (ACS) to provide socioeconomic data on an ongoing basis rather than waiting for once-a-decade censuses.

Budget amendment.—On June 9, 2008, the Committee received a budget amendment that requests an additional \$545,840,000 for the Bureau of the Census to cover increased costs of the 2010 Decennial Census resulting from mismanagement of a key information technology contract. The pending budget amendment proposes reductions to other accounts within the Departments of Agriculture, Health and Human Services, Homeland, the Interior, Labor, and the Treasury, as well as the Department of Commerce. The Office of Management and Budget transmitted the amendment too late for it to receive serious review by the Committee; therefore, the Committee defers without prejudice its consideration of the amended request at this time.

Field Data Collection Automation (FDCA) Contract Replan.—The Census Bureau is in the midst of a replan of the FDCA contract, which has resulted in a significant overall increase in the life cycle cost of the Decennial Census. The full impact of the life cycle increase is estimated to be up to an additional \$3,000,000,000. In part, this is the result of an unreliable life cycle cost estimate. Thus, the Committee directs Census to implement the Government Accountability Office's June 16, 2008 report recommendations on life cycle cost estimates.

The Committee notes with dismay the Administration's lack of attention to the 2010 Decennial, the Department's lack of critical oversight, the failure to provide timely funding requests, and the consequent risk of failure of this constitutionally-mandated effort. The Committee is committed to providing the necessary funding and expects the Administration will focus requisite oversight to ensure a successful Decennial.

Partnerships.—The Committee is concerned that abandoning plans to use handheld computers to collect data in the field could adversely affect the enumeration of historically hard-to-count populations, including racial and ethnic minorities, language-minorities, immigrants, and low income households. Thus, the Committee directs the Bureau of the Census to allocate sufficient funding to sup-

port a robust partnership and outreach efforts in preparation for the 2010 Decennial Census, with specific focus being placed on hard-to-reach populations. The census partnership program is a vital component of the effort to obtain the most accurate decennial census count possible. Funding provided for this program will help enlist community leaders to encourage their constituencies to fill out their census forms, emphasizing the importance of the census to their local community and education system. The Committee notes testimony made by the Census Bureau before the Committee that increasing the mail-back response rate through promotional efforts such as these partnerships will likely result in substantial savings in the non-response follow-up enumeration.

Language assistance programs.—While the Census Bureau is committed to ensuring that Spanish speakers receive adequate assistance in filling out their census questionnaires, the Committee is concerned that the Census Bureau has not adequately planned for assistance in other languages during the 2010 Census and the ACS. The Census Bureau should provide the Committee with updates on a semi-annual basis on its language assistance program, including information on how it will reach and assist respondents who speak Asian, American Indian and Alaska Native languages, Spanish, and other languages spoken by ethnic immigrants in the United States for the ACS and the 2010 Census.

Additional outreach.—The Committee directs the Bureau to provide not less than \$8,000,000 and not more than \$10,000,000 for Census in Schools competitive grants and adult education materials for the 2010 Decennial. The Committee notes that Census in Schools provides significant outreach to hard-to-reach populations through the medium of take-home materials that educate school children and their parents and extended families. Similar results are obtained by providing adult education materials that also reach neighbors and friends in these communities.

Data on small population groups.—The Committee is concerned about the availability of data on small population groups, especially Asian, Hispanic, Pacific Islander, and other national origins subgroups, from the American Community Survey and Decennial census. In many ethnic and immigrant communities, gathering accurate information about smaller subgroups is extremely important for policymakers, as the needs among the various populations vary significantly. The Committee urges the Census Bureau to ensure that reliable information about these subgroups, especially numerically smaller groups, is collected and published, and directs the Bureau to report back within 90 days of enactment describing the steps it will take to ensure the availability and accuracy of these data.

Offshore U.S. jurisdictions.—The Committee appreciates the efforts of the Census Bureau to consider new options for reporting data reflecting all citizens of the United States, including Puerto Rico and other offshore U.S. jurisdictions.

Non-decennial programs.—The Committee recommendation includes \$222,733,000 for non-decennial periodic census programs, the same amount as in the request, and \$7,559,000 below fiscal year 2008. Funds are distributed as follows:

Other Periodic Programs:	
Economic Censuses	\$118,687,000

Census of Governments	8,912,000
Subtotal, Other Periodic Programs	127,599,000
Demographic Statistics Programs:	
Intercensal Demographic Estimates	10,321,000
Demographic Survey	11,449,000
Geographic Support	41,781,000
Data Processing Systems	31,583,000
Subtotal, Demographic Programs	95,134,000
Total, Non-Decennial Programs	222,733,000

Economic Census.—Conducted every five years, the economic census is integral to the Bureau of Economic Analysis' (BEA) estimates of the Gross Domestic Product (GDP), and is the foundation of the nation's economic statistics programs. Fiscal year 2009 is the fifth year of the six-year 2007 Economic Census cycle, and reflects the transition from intensive data collection and centralized processing activities at the National Processing Center to Headquarters processing, which includes editing, summary data review, and product preparation associated with data dissemination of results from the core census programs.

Census of Governments.—The Census of Governments is also integral to the BEA's estimates of GDP. It is the only source of comprehensive and uniformly classified data on the economic activities of more than 90,000 state and local governments, which account for about 12 percent of GDP and nearly 16 percent of the U.S. workforce. Fiscal year 2009 is the last year in the five-year cycle of the 2007 Census of Governments.

NATIONAL TELECOMMUNICATIONS AND INFORMATION ADMINISTRATION

SALARIES AND EXPENSES

Fiscal Year 2008 enacted	\$17,466,000
Fiscal Year 2009 request	19,218,000
Recommended in the bill	19,218,000
Bill compared with:	
Fiscal Year 2008 enacted	+1,752,000
Fiscal Year 2009 request	

The National Telecommunications and Information Administration (NTIA) serves as the President's principal adviser on telecommunications and information policy matters. NTIA advocates for policies and conducts technical research that supports delivery of the latest telecommunications technology and services to all Americans. The Committee recommendation includes \$19,218,000 for the salaries and expenses of the NTIA, which is the same as the request and \$1,752,000 above fiscal year 2009.

Domestic and international policies.—NTIA develops and advocates policies to improve and expand domestic telecommunications services and markets. NTIA provides advice to White House officials, coordinates with other Executive Branch agencies, and participates in relevant Congressional actions and interagency and Federal Communications Commission (FCC) proceedings on a host of issues. NTIA advocates the advancement of U.S. priorities in international telecommunications policy and regulatory areas.

Spectrum management.—NTIA manages the Federal Government's use of the radio frequency spectrum, both domestically and internationally.

Telecommunication sciences research.—NTIA develops improved spectrum measurement techniques to address the increasing use of broadband technologies, including digital signals, spread-spectrum, and frequency agile systems.

Digital Television Transition And Public Safety Fund.—The Digital Television Transition and Public Safety Fund, created by the Deficit Reduction Act of 2005, receives offsetting receipts from the auction of licenses to use electromagnetic spectrum recovered from discontinued analog television signals and provides funding for several programs from these receipts. The Act specifies that recovered spectrum, aside from 24 megahertz dedicated for public safety use, will be auctioned by the Federal Communications Commission in 2008 and identifies the distribution of revenue for deficit reduction and program purposes as identified below. Receipts exceeding amounts specified for authorized programs will be returned to the general fund of the Treasury. The Act also provides borrowing authority to the Department of Commerce to commence specified programs prior to the availability of auction receipts to fund the following activities:

- Digital-to-Analog Converter Box Program;
- Public Safety Interoperable Communications;
- New York City 9/11 Digital Transition;
- Assistance to Low-Power Television Stations;
- National Alert and Tsunami Warning Program; and
- Implement the ENHANCE 911 Act of 2004.

PUBLIC TELECOMMUNICATIONS FACILITIES, PLANNING AND CONSTRUCTION

Fiscal Year 2008 enacted	\$18,800,000
Fiscal Year 2009 request
Recommended in the bill	21,728,000
Bill compared with:	
Fiscal Year 2008 enacted	+2,928,000
Fiscal Year 2009 request	+21,728,000

The Public Telecommunications Facilities, Planning, and Construction (PTFPC) program awards competitive grants that help public broadcasting stations, State and local governments, Indian tribes and nonprofit organizations construct facilities to bring educational and cultural programming to the American public using broadcasting and non-broadcasting telecommunications technologies.

The Committee recommendation includes \$21,728,000 for PTFPC, which is \$2,928,000 above fiscal year 2008. The budget proposed to eliminate funding for this program. The Committee reiterates that the PTFPC program is a critical source of funding for ongoing infrastructure needs that enable public telecommunications facilities to remain on-air, particularly in under-served rural areas. The PTFPC program is the primary source for funding for telecommunications infrastructure assistance for public radio and television stations. Furthermore, NTIA and the Corporation for Public Broadcasting work closely together to make sure there is no overlap between the two programs and that each addresses the most suitable needs for their individual programs.

The Committee notes that in the past two fiscal years, PTFPC requests have outnumbered grants two to one. Yet the Administration attempted to divert funding for fiscal year 2008 PTFPC grants to apply to the 2010 Decennial Census crisis, rather than request emergency supplemental funding. This is particularly problematic given that NTIA was in the process of trying to award emergency grants, some of which would fund digital transition issues. The Committee is concerned that the delays in allocating grant funding is only further aggravating the oversubscription of the PTFPC.

UNITED STATES PATENT AND TRADEMARK OFFICE

CURRENT YEAR FEE FUNDING

Fiscal Year 2008 enacted	\$1,915,500,000
Fiscal Year 2009 request	2,087,000,000
Recommended in the bill	2,087,000,000
Bill compared with:	
Fiscal Year 2008 enacted	+171,500,000
Fiscal Year 2009 request	

The United States Patent and Trademark Office (USPTO) is charged with administering the patent and trademark laws of the United States. USPTO examines patent applications, grants patent protection for qualified inventions, and disseminates technological information disclosed in patents. The USPTO also examines trademark applications and provides federal registration to owners of qualified trademarks. The USPTO advises the Office of the United States Trade Representative on enforcement issues in connection with free trade agreements and participates in consultations with numerous foreign governments on a broad range of issues related to the enforcement of intellectual property rights. The Committee recommendation includes \$2,087,000,000 for the USPTO for fiscal year 2008, which is the same as the request and \$171,500,000 above fiscal year 2008. The bill retains the provision that transfers funding to "Departmental Management, Salaries and Expenses" for activities associated with the National Intellectual Property Law Enforcement Coordination Council (NIPLECC), rather than create a separate appropriations account. The recommendation includes \$1,021,000 for NIPLECC, the same as the request and \$21,000 above fiscal year 2008. The bill also includes a provision that provides funds for cooperative agreements to conduct policy studies related to fair international protection of intellectual property rights.

The Government Accountability Office has found that the backlog of unexamined patent applications at the USPTO has increased by nearly 73 percent since fiscal year 2002 to about 730,000 applications at present. This has caused a continually increasing length of time between filing of a patent application and final action on that application. Currently, the average pendency of applications is 32 months. If this trend continues average pendency will be 52 months by 2012. The Government Accountability Office (GAO) has found that the hiring of additional patent examiners has not been sufficient to reverse this trend.

In addition to hiring additional examiners, the USPTO has responded by issuing rules limiting the ability of applicants to modify their applications with additional information and claims through the use of continuing applications. The USPTO issued final rules restricting applicants' rights even though an overwhelming major-

ity of users of the patent system objected when given the opportunity for public comment. Further, the United States District Court for the Eastern District of Virginia has enjoined the issuance of the rules changes as exceeding the statutory authority of the Undersecretary and Director.

The sustained increase in the number of applications that has given rise to the increasing backlog is largely a consequence of a globalized economy in which applicants are filing in more than one jurisdiction. This means that the USPTO and other national patent offices are duplicating one another's work. The USPTO has recognized the relationship between rising workload and duplication of national examinations and has convened a series of meetings with other leading patent offices to attempt to more effectively share information so as to decrease the duplication of work. However, these efforts have proceeded very slowly and have not yet resulted in any relief for the USPTO.

Given the findings of the GAO it is unlikely that hiring additional examiners alone will resolve the backlog problem. Further, attempting to restrict the rights of applicants has generated widespread opposition among stake holders and been blocked by a federal court. Therefore, the most likely means of reducing the pendency of patent applications is for the leading patent offices to make more effective use of one another's work. The Committee directs the USPTO take actions to reduce duplication of work already performed by another patent office in a manner that does not compromise the quality of the examination or the sovereignty of the United States. The Committee also encourages the USPTO to review its proposed rules changes so that they fall within the statutory authority of the Director and take into account the concerns of the majority of users of the patent system.

NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY

(INCLUDING TRANSFERS)

The National Institute of Standards and Technology (NIST) promotes U.S. innovation and industrial competitiveness by advancing measurement science, standards, and technology in ways that enhance economic security and improve our quality of life.

The Committee recommendation includes \$816,860,000 for NIST for fiscal year 2009, which is \$178,860,000 above the request and \$61,013,000 above fiscal year 2008.

SCIENTIFIC AND TECHNICAL RESEARCH AND SERVICES

Fiscal Year 2008 enacted	\$440,517,000
Fiscal Year 2009 request	535,000,000
Recommended in the bill	500,660,000
Bill compared with:	
Fiscal Year 2008 enacted	+60,143,000
Fiscal Year 2009 request	- 34,340,000

To carry out its mission, NIST has an intramural research program made up of laboratories and technical programs and national research facilities. The laboratories and technical programs develop and disseminate measurement techniques, reference data and materials, test methods, standards, and other infrastructural technologies and services required by U.S. industry. National research

facilities include the NIST Center for Neutron Research and the Center for Nanoscale Science and Technology. NIST also manages the Baldrige National Quality Program, which promotes U.S. competitiveness in business, health care, education, and non-profit organizations through performance excellence criteria and other information transfer, and management of the Malcolm Baldrige National Quality Award. The Committee recommendation includes \$500,660,000 for NIST's scientific and technical core programs, which is \$60,143,000 above fiscal year 2008 and \$34,340,000 below the request.

The Committee notes that several of the proposed new initiatives are multi-year programs which add 85 new positions and cost \$29,840,000 in the first year alone. Given that NIST has not provided the Committee with a strategic plan and did not seek industry input, the Committee chooses to defer funding for these initiatives to allow the new Administration the opportunity to evaluate the proposed programs, determine whether or not the significant multi-year investment involved fits within its priorities, and ensure that the proposed efforts are clearly focused. The Committee directs \$36,750,000 in increased funding for the following activities:

Measurements & Standards for Climate Change	\$7,500,000
Innovations in Measurement Science	3,000,000
National Earthquake Hazards Reduction	3,250,000
Disaster Resilient Structures	4,000,000
Cyber Security: Technologies for Interconnected Systems	5,000,000
Enabling the Hydrogen Economy	4,000,000
Enabling Nanotechnology from Discovery to Manufacture	3,500,000
Manufacturing Innovation/Supply Chain Integration	1,000,000
Quantum Information Science	3,500,000
NIST Center for Neutron Research	2,000,000

Measurement & Standards for Climate Change Program.—NIST has the opportunity to address critical gaps in climate change science that are limiting long-term climate policy decision-making by: (1) resolving discrepancies in satellite-based measurements of solar intensity; and (2) providing critical information about an atmospheric component believed to play a major role in global climate change. Numerous climate monitoring systems provide essential information for predictive modeling of future climate changes, but those measurements must be made with sufficient accuracy and precision. The *2003 Strategic Plan for the U.S. Climate Change Science Program* (CCSP) emphasizes this priority by directly citing NIST's role in providing national standards for instrumentation. The Committee provides \$7,500,000, which is \$2,500,000 above the request.

INDUSTRIAL TECHNOLOGY SERVICES

Fiscal Year 2008 enacted	\$154,840,000
Fiscal Year 2009 request	4,000,000
Recommended in the bill	187,200,000
Bill compared with:	
Fiscal Year 2008 enacted	+32,360,000
Fiscal Year 2009 request	+183,200,000

This appropriation provides funding for the Manufacturing Extension Partnerships (MEP) program and the Technology Innovation Program (TIP). The Committee recommendation includes \$187,200,000, which is \$32,360,000 above the fiscal year 2008 en-

acted level and \$183,200,000 above the request. Of this amount, \$122,00,000 is provided for the Manufacturing Extension Partnerships (MEP) and \$65,200,000 is provided for the Technology Innovation Program. The Committee does not agree with the Administration's attempt to eliminate these programs. In the current economic climate, these programs are critically important to ensure the competitiveness of U.S. businesses.

The MEP consists of a network of centers that provide business support and technical assistance services, and helps improve the productivity and competitiveness of small manufacturers. The centers are funded from matching Federal and State or local resources and fees charged for services.

The Committee notes that MEP leverages private resources in the creation and retention of jobs, thereby increasing economic output as well as Federal revenues. The MEP system is uniquely positioned to be the resource of choice for increasing the competitiveness of U.S.-based supply chains, and MEP is the only organization whose mission is to improve the competitiveness of U.S. manufacturing. The MEP nationwide network, with its direct reach to the Nation's manufacturers, has proven to be invaluable to numerous Federal government partners who utilize the network to distribute valuable, cutting-edge information and resources in areas of workforce, technology adoption, environment and energy, quality, and more.

The TIP was established in Section 3012 of the 2007 COMPETES Act. The purpose is to speed the development of high-risk, transformative research targeted to address key societal challenges. Funding is provided to small and medium-sized businesses, and institutions of higher education or other organizations, such as national laboratories and nonprofit research institutions to support, promote, and accelerate innovation in the US. These organizations research potentially revolutionary technologies that present high technical risks but meet critical national needs. TIP replaces the Advanced Technology Program (ATP) but allows for continued support for previous ATP awards.

CONSTRUCTION OF RESEARCH FACILITIES

Fiscal Year 2008 enacted	\$160,490,000
Fiscal Year 2009 request	99,000,000
Recommended in the bill	129,000,000
Bill compared with:	
Fiscal Year 2008 enacted	- 31,490,000
Fiscal Year 2009 request	+30,000,000

This appropriation supports the construction of new facilities and the renovation and maintenance of NIST's current buildings and laboratories to comply with scientific and engineering requirements and to keep pace with Federal, State, and local health and safety regulations. The Committee recommendation includes \$129,000,000, which is \$30,000,000 above the request and \$31,490,000 below fiscal year 2008.

The Committee fully supports the final phase of construction of the Building 1 Extension in Boulder; the requested expansion of the laboratories at JILA; the third and last fiscal year of funding increases required in the five year NIST Center for Neutron Research (NCNR) expansion and reliability improvements; and the

fiscal year 2009 request for Safety, Capacity, Maintenance, and Major Repairs (SCMMR).

Competitive Construction grants.—The Committee recommendation provides \$30,000,000 for competitive construction grants for research science buildings. Such buildings shall be evaluated on the scientific and technical merit of the proposed use and need for Federal funding; the quality of the design of the research science building; and the adequacy of the project execution plan. These grants shall be awarded to colleges, universities, and other non-profit science research organizations on a merit-based basis.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

The mission of the National Oceanic and Atmospheric Administration (NOAA) is to understand and predict changes in the Earth's environment and conserve and manage coastal and marine resources to meet our Nation's economic, social and environmental needs. NOAA supplies information on the oceans and atmosphere, provides stewardship of our coastal and marine environment, and leads scientific research in such fields as ecosystems, climate, global climate change, weather and water.

The Committee recommendation includes a total of \$4,252,640,000 in discretionary appropriations for the National Oceanic and Atmospheric Administration, which is \$148,727,000 above the request, and \$356,156,000 above fiscal year 2008.

OPERATIONS, RESEARCH, AND FACILITIES

(INCLUDING TRANSFER OF FUNDS)

Fiscal Year 2008 enacted	\$2,856,277,000
Fiscal Year 2009 request	2,831,253,000
Recommended in the bill	2,979,325,000
Bill compared with:	
Fiscal Year 2008 enacted	+123,048,000
Fiscal Year 2009 request	+148,072,000

The Committee recommendation includes a total program level of \$3,072,325,000 under this account for the coastal, fisheries, marine, weather, satellite and other programs of the National Oceanic and Atmospheric Administration. This total funding level includes \$2,979,325,000 in direction appropriations, a transfer of \$79,000,000 from balances in the "Promote and Develop Fishery Products and Research Pertaining to American Fisheries" account, a transfer of \$3,000,000 from the Coastal Zone Management Fund, and \$11,000,000 is derived from recoveries of prior year obligations. The direct appropriation of \$2,979,325,000 is \$148,072,000 above the request and \$123,048,000 above the fiscal year 2008 level.

The following narrative descriptions and tables identify the specific activities and funding levels included in this Act.

National Ocean Service (NOS).—The recommendation provides \$472,192,000 for NOS operations, research and facilities, which is \$22,940,000 above the request. This includes \$171,193,000 for Ocean Resources Conservation and Assessment, which is \$14,100,000 above the request, and provides \$19,555,000 for the Integrated Ocean Observing System (IOOS) regional observations and \$8,500,000 for NOAA IOOS. Within the recommendation, \$27,997,000 is provided for Coral Reef Program, which is

\$2,100,000 above the request. The Committee directs NOS to apply the additional funding to Deep Sea Coral and competitive grants for coral reef research. The recommendation also includes \$25,454,000 for Response and Restoration, which provides \$2,188,000 for Estuary Restoration and an additional \$2,000,000 above the request for Damage Assessment and Restoration; and \$17,801,000 for Competitive Research, which is \$2,000,000 above the request.

NATIONAL OCEAN SERVICE—OPERATIONS, RESEARCH AND FACILITIES

[in thousands of dollars]

	Recommended
Navigation Services:	
Mapping & Charting	63,615
Address Survey Backlog/Contracts	31,173
Geodesy	25,401

Total, National Ocean Service—ORF	472,192

National Marine Fisheries Service (NMFS).—The recommendation provides \$744,415,000 for NMFS operations, research and facilities, which is \$20,204,000 above the request.

The recommendation provides \$176,241,000 for Protected Species Research and Management, which is \$9,000,000 above the request. The NMFS is directed to apply the funding to the Hawaiian Monk Seal, the Hawaiian Sea Turtle, the Bottlenose Dolphin, and Section 6 Endangered Species Act grants to States. The Hawaiian Monk Seal may be one of the world's most endangered marine species, and the Committee is concerned that the agency has not provided adequate funding to reverse this decline. The Committee is also concerned at the extent of the funding for Section 6 Endangered Species Act grants to States, which is approximately \$1,000,000, and further directs NMFS to include adequate funding levels for these endangered species and Section 6 grants to States in future budget requests.

The recommendation also provides a total of \$49,905,000 for Habitat Conservation and Restoration, which is \$6,500,000 above the request. Within this amount, \$2,000,000 is provided above the

request for the Open Rivers Initiative, and \$4,500,000 is provided above the request for the Community Based Restoration Program.

The recommendation also includes \$2,500,000 for Chesapeake Bay Studies. Within the funds provided, NMFS is directed to apply \$500,000 for the improvement of the living resources of the Chesapeake Bay watershed, including its headwater streams.

NATIONAL MARINE FISHERIES SERVICE—OPERATIONS, RESEARCH AND FACILITIES

Oceanic and Atmospheric Research (OAR).—The recommendation includes \$396,344,000 for OAR operations, research and facilities, which is \$24,074,000 above the request.

The recommendation includes \$203,491,000 for Climate Research, which is \$8,014,000 above the request. The recommendation also includes \$23,028,000 for Information Technology and R&D, \$10,000,000 above the request, to increase NOAA's supercomputing capacity. These funds will allow NOAA to run high resolution global climate models to improve seasonal forecasts and run earth simulations for long range climate research, which is needed by the impacts and policy communities. The Committee supports NOAA's efforts toward the creation of a National Climate Service and directs the agency to accelerate its current efforts with the additional funding provided.

The recommendation includes \$112,264,000 for Ocean, Coastal, and Great Lakes Research. Within this amount \$59,997,000 is provided for the Sea Grant program, which is \$5,000,000 above the request, and \$1,060,000 is provided above the request for Laboratories and Cooperative Institutes.

	Recommended
Total, National Weather Service—ORF	825,833

National Environmental Satellite, Data and Information Service (NESDIS).—The recommendation provides \$179,171,000 for NESDIS operations, research and facilities, which is \$13,879,000 above the request. The Committee recommendation does not fund the request for the Ocean Surface Vector Winds Studies. Instead, the Committee directs NESDIS to conduct the studies in-house and within available appropriations, and in conjunction with NASA, which has been directed similarly. The recommendation for Data Centers and Information Services is \$70,538,000, which is \$16,879,000 above the request, and provides for additional environmental data archiving, access and assessment activities.

NATIONAL ENVIRONMENTAL SATELLITE, DATA AND INFORMATION SERVICE—OPERATIONS, RESEARCH AND FACILITIES

[In thousands of dollars]

NOAA's Data Centers & Information Services	70,538
Total, Data Centers & Information Services	70,538
Total, NESDIS—ORF	179,171

Program Support (PS).—The recommendation provides \$409,955,000, which is \$15,560,000 above the request for Program Support. The recommendation includes \$29,297,000 for facilities, which provides a 25 percent increase over the request for facilities management and construction. The Office of the Inspector General has confirmed a significant and increasing backlog of deferred maintenance in fiscal years 2005 and 2006. The Committee is concerned that NOAA is not addressing these issues, and is not protecting the taxpayers' investment. The Committee thus directs NOAA to meet the out-year funding profile necessary to reverse the growing backlog of restoration projects, as well as the backlog of maintenance and minor repair projects. The Committee further directs NOAA to submit to the Committee, within 90 days of enactment of this Act, an allocation for the restoration funds provided that reflects the highest priority projects identified in the latest facility modernization plan.

The recommendation also includes \$167,089,000 for Marine and Aviation Operations, which includes \$5,060,000 above the request for Marine Services and \$1,500,000 above the request for Aviation Operations, to partially offset increased fuel costs across NOAA.

Justification improvement.—The Committee directs NOAA to work with the Committee to reformat the justification into a more useable and user-friendly document, starting with the fiscal year 2010 submission.

Research and Development (R&D) tracking and outcomes.—The Committee directs NOAA to continue tracking the division of R&D funds between intramural and extramural research, and further directs NOAA to assure consistency and clarity in the collection and reporting of data. The Committee also directs NOAA to state clearly its expected research outcomes and available funding in order to provide transparency into the competitive grant process for extramural researchers. The Committee is concerned that by not providing sufficient extramural research funding, NOAA risks discouraging extramural involvement in NOAA's research programs and the concomitant leveraging of external funds in support of mission-oriented research. Thus, the Committee encourages NOAA to provide additional extramural funding in future budget requests.

Atmospheric sciences.—The Committee urges NOAA to make atmospheric sciences a priority within the resources made available in this Act and to request sufficient resources in subsequent years to advance this research.

Space-based scientific data.—The Committee directs NOAA to report to the Committee on its plans to obtain space-based scientific data from commercial sources over the next three years within sixty days after the enactment of this Act.

Ocean research priorities plan implementation.—The Committee directs competitive consideration of any region susceptible to coastal hazards within the ocean research priorities plan implementation.

Within the appropriation, \$44,415,000 is provided for the following activities:

PROCUREMENT, ACQUISITION AND CONSTRUCTION

Fiscal Year 2008 enacted	\$979,207,000
Fiscal Year 2009 request	1,238,660,000
Recommended in the bill	1,212,315,000
Bill compared with:	
Fiscal Year 2008 enacted	+233,108,000
Fiscal Year 2009 request	– 26,345,000

This account funds capital acquisition, construction, and fleet and aircraft replacement projects that support NOAA's operational mission across all line offices. Capital acquisition projects include satellite procurements and surface weather observation equipment for NOAA's weather and climate programs. Construction projects include new buildings or major modification of existing facilities. Fleet and aircraft replacement includes acquisition of new and upgrades to existing aircrafts and vessels..

The Committee recommendation includes a total program level of \$1,214,315,000 in direction obligations under this heading, of which \$1,212,315,000 is appropriated from the general fund and \$2,000,000 is derived from recoveries of prior year obligations. The direct appropriation of \$1,212,315,000 for the Procurement, Acquisition and Construction account, is \$26,345,000 below the request and \$233,108,000 above fiscal year 2008.

The bill includes language making any deviation from amounts designated for specific activities in this report, or any use of deobligated balances of funds provided under this heading in previous years shall be subject to the reprogramming procedures set forth in section 505.

National Ocean Service.—The recommendation includes \$48,100,000 for NOS acquisition and construction, \$20,715,000 above the requested level. This includes \$3,325,000 above the request for the Coastal and Estuarine Land Conservation program, doubles the requested amount for the National Estuarine Research and Reserve System Acquisition and Construction and increase the Marine Sanctuaries Construction and Acquisition program \$10,500,000 above the request.

Oceanic and Atmospheric Research (OAR).—The recommendation includes \$10,379,000 for OAR systems acquisition, the same as the request.

National Weather Service (NWS).—The recommendation includes \$111,858,000 for NWS acquisition and construction, the same as the request.

National Environmental Satellite Data and Information Service (NESDIS).—The recommendation includes \$992,588,000 for NESDIS acquisition and construction, which is the requested level. This provides full funding for GOES-R, NPOESS, and includes \$74,000,000 for the restoration of critical climate sensors. The Committee remains concerned about the impact of the GOES-R out-year costs on NOAA's traditional mission areas.

Program Support (PS).—The recommendation includes \$37,890,000 for construction which provides \$22,890,000 for the Pacific Regional Center, an increase of \$2,910,00 above fiscal year 2008. This recommendation also includes \$15,000,000 for the next phase of the Southwest Fisheries Science Center. The Committee understands that NOAA has recently determined that the new fa-

cility will be located in La Jolla. The recommendation also includes the request level of \$11,500,000 for fleet replacement.

PROCUREMENT, ACQUISITION & CONSTRUCTION

[In thousands of dollars]

	Recommended
Coastal and Estuarine Land Conservation Program (NOS)	\$18,325

PACIFIC COASTAL SALMON RECOVERY

Fiscal Year 2008 enacted	\$67,000,000
Fiscal Year 2009 request	35,000,000
Recommended in the bill	65,000,000
Bill compared with:	
Fiscal Year 2008 enacted	–2,000,000
Fiscal Year 2009 request	+30,000,000

This account funds State, Tribal and local conservation initiatives to help recover Pacific salmon populations. State and local recipients of this funding will provide matching contributions of at least thirty-three percent of Federal funds. In addition, funds will be available to Tribes that do not require matching dollars. The Committee recommendation includes \$65,000,000 for Pacific Coastal Salmon Recovery, which is \$2,000,000 below fiscal year 2008 and \$30,000,000 above the request.

COASTAL ZONE MANAGEMENT FUND

(INCLUDING TRANSFER OF FUNDS)

Fiscal Year 2008 enacted	–\$3,000,000
Fiscal Year 2009 request	–3,000,000
Recommended in the bill	–3,000,000
Bill compared with:	
Fiscal Year 2008 enacted	
Fiscal Year 2009 request	

This fund was established by the Coastal Zone Act Reauthorization Amendments of 1990 (CZARA). The fund consists of loan repayments from the former Coastal Energy Impact Program. The proceeds are to be used to offset the Operations, Research, and Facilities account for the costs of implementing the Coastal Zone Management Act of 1972, as amended. The Committee recommendation includes language transferring not to exceed

\$3,000,000 from the Coastal Zone Management Fund to the “Operations, Research, and Facilities Account.”

FISHERIES FINANCE PROGRAM ACCOUNT

Fiscal Year 2008 enacted	–\$6,000,000
Fiscal Year 2009 request	– 1,000,000
Recommended in the bill	– 4,000,000
Bill compared with:	
Fiscal Year 2008 enacted	+2,000,000
Fiscal Year 2009 request	– 3,000,000

This account covers the subsidy costs of guaranteed loans (pre-1997) and direct loans (post-1996) obligated or committed subsequent to October 1, 1991, as authorized by the Merchant Marine Act of 1936 as amended. The recommendation includes language under this heading limiting obligations of direct loans to \$8,000,000 for Individual Fishing Quota loans and \$59,000,000 for traditional direct loans.

DEPARTMENTAL MANAGEMENT

SALARIES AND EXPENSES

Fiscal Year 2008 enacted	\$44,294,000
Fiscal Year 2009 request	61,083,000
Recommended in the bill	45,000,000
Bill compared with:	
Fiscal Year 2008 enacted	+706,000
Fiscal Year 2009 request	– 16,083,000

The salaries and expenses appropriation provides funding for Executive Direction and Departmental Staff Services. Executive Direction funds the development and implementation of policies and coordinates bureaus’ program activities. Departmental Staff Services funds the development and implementation of the Department’s internal policies, procedures and other administrative functions.

The Committee recommendation includes \$45,000,000 for Departmental Management, which is \$706,000 above fiscal year 2008 and \$16,083,000 below the request. The Committee is disappointed by the performance of the Department of Commerce’s departmental management. By failing to provide effective management and contract oversight, departmental officials have allowed the Bureau of the Census to court failure in the Field Data Collection Automation program. Furthermore, the Department did not keep the Congress informed of the magnitude of the program’s problems when first recognized. The Administration, too, has failed to provide the necessary and appropriate funding requests to guard against failure. The Committee is concerned that this continuing lack of commitment and leadership puts at risk the success of the constitutionally-mandated 2010 Decennial.

The bill includes language that requires the Secretary of Commerce to provide a report to the Committee that audits and evaluates all decision documents and expenditures by the Bureau of Census as they relate to the 2010 Census. The bill also includes language that restricts \$10,000,000 of the available appropriation from obligation until the Secretary certifies to the Committee that the Bureau of Census has met all standards and best management

practices and Office of Management and Budget guidelines related to information technology projects and contract management.

IT Security.—Within appropriated funding, the Committee directs \$4,117,000 to address the Department's IT security material weaknesses and other concerns raised by the Inspector General.

Emergency Steel Loan Guarantee Program.—The Committee disagrees with the administration's proposed cancellation of the remaining unobligated subsidy balances associated with the Emergency Steel Loan Guarantee Program.

Office of the Native American Business Development.—The Committee directs the creation of an implementation plan for the Office of the Native American Business Development, as authorized by section 4(a)(1) of the Native American Business Development, Trade Promotion, and Tourism Act of 2000 (25 U.S.C. 4303), within available funds.

HERBERT C. HOOVER BUILDING RENOVATION AND MODERNIZATION

Fiscal Year 2008 enacted	\$3,722,000
Fiscal Year 2009 request	7,367,000
Recommended in the bill	7,367,000
Bill compared with:	
Fiscal Year 2008 enacted	+3,645,000
Fiscal Year 2009 request	

This account provides funding for the Commerce Department's expenses associated with the modernization of the Herbert C. Hoover Building (HCHB). The Committee recommendation includes \$7,367,000 for costs associated with the renovation of the HCHB, which is the same as the request and \$3,645,000 above fiscal year 2008.

OFFICE OF INSPECTOR GENERAL

Fiscal Year 2008 enacted	\$22,020,000
Fiscal Year 2009 request	24,766,000
Recommended in the bill	26,926,000
Bill compared with:	
Fiscal Year 2008 enacted	+4,906,000
Fiscal Year 2009 request	+2,160,000

The mission of the Office of Inspector General (OIG) is to provide a unique, independent voice to the Secretary and other senior Commerce managers, as well as to Congress, in combating fraud, waste, abuse and mismanagement, and in improving the efficiency, effectiveness and economy of Department operations. These funds provide for OIG's work conducting audits, inspections, and investigations. The Committee recommendation includes \$26,926,000 for the OIG for fiscal year 2009, which is \$4,906,000 above fiscal year 2008 and \$2,160,000 above the request. The increased funding allows the OIG to handle the increasing workload of Census and satellite issues.

GENERAL PROVISIONS—DEPARTMENT OF COMMERCE

The Committee recommends the following general provisions for the Department of Commerce:

Section 101 makes funds available for advanced payments only upon certification of officials designated by the Secretary that such payments are considered to be in the public interest;

Section 102 makes appropriations for the Department for Salaries and Expenses available for hire of passenger motor vehicles, for services, and for uniforms and allowances as authorized by law;

Section 103 provides the authority to transfer funds between Department of Commerce appropriation accounts and requiring notification to the Committee of certain actions;

Section 104 provides that any costs incurred by the Department from personnel actions taken in response to funding reductions shall be absorbed within the total budgetary resources available to the Department and shall be subject to the reprogramming limitations set forth in this Act;

Section 105 relates to the trademark of “Last Best Place”;

Section 106 provides for a personnel demonstration project;

Section 107 provides for the prescribing and enforcing of standards and regulations regarding occupational diving; and

Section 108 provides for the reimbursement for services within Department of Commerce buildings.

TITLE II—DEPARTMENT OF JUSTICE

GENERAL ADMINISTRATION

SALARIES AND EXPENSES

Fiscal Year 2008 enacted	\$97,832,000
Fiscal Year 2009 request	105,805,000
Recommended in the bill	105,805,000
Bill compared with:	
Fiscal Year 2008 enacted	+7,973,000
Fiscal Year 2009 request	

General Administration (GA) supports the Attorney General (AG) and Department of Justice (DOJ) senior policy level officials in managing Department resources and developing policies for legal, law enforcement and criminal justice activities. GA also provides administrative support services to the legal divisions. Most GA offices have significant oversight responsibilities that shape DOJ policy and influence the way the Department works toward meeting each of its strategic goals. The GA account consists of three decision units: Department Leadership, Executive Support/Professional Responsibility and Justice Management Division. The Office of the AG is funded through the Department Leadership decision unit. For fiscal year 2009, the Committee recommends \$105,805,000, which is equal to the budget request.

Politicization of DOJ.—The Committee has concerns about continuing allegations that political considerations are being placed above the law in enforcement, prosecutorial and policy decisions at the Department. The Committee encourages the AG to address and resolve swiftly all alleged incidences of politicization so that there is no appearance of impropriety in DOJ operations.

Materials in support of the annual budget request.—The Committee reiterates its displeasure that the Department of Justice was unable to submit to the Committee additional requested information in support of the Department’s budget. The Department of Justice was the only agency under the Subcommittee’s jurisdiction which was unable to respond fully to requests for information within the liberal time tables imposed by the Committee. These mate-

rials are needed to more fully analyze and justify the annual budget request and serve as a permanent record of the Committee's review of the annual budget proposal. The Committee directs the Department to take any action necessary to ensure that such delays do not occur in the fiscal year 2010 budget process.

Office of Professional Responsibility (OPR) investigations.—The Committee commends the OPR for reviewing the Department's legal justifications for the Administration's interrogation techniques and warrantless wiretapping program. The Committee asks the Department to provide these reviews with all necessary support, including the provision of relevant documents and witnesses, and expects these investigations to be expeditiously pursued, even if the reviews need to continue after the current Administration is no longer in office.

Resolution of disputes between components.—The Committee is concerned about continuing reports of jurisdictional turf battles between DOJ components, particularly the Federal Bureau of Investigation (FBI) and the Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF). These disputes lead to unacceptable instances of waste, duplication and confusion, and they reflect negatively on the Department in the eyes of partner agencies and the public. The AG is urged to bring timely resolution to these disputes through the issuance of clear, definitive guidance on jurisdictional responsibilities and related issues. The Committee directs the AG to submit a report to the House and Senate Committees on Appropriations not later than 120 days after the enactment of this Act on the steps the Department has taken in order to reconcile these disputes and clarify the jurisdictional lines between FBI and ATF.

Immigration workload.—The Committee is aware of the Department's continuing struggle to keep pace with the immigration workload that is initiated by activities of the Department of Homeland Security (DHS). For several years in a row, DOJ has been forced to redirect internal resources in order to provide necessary judicial support and basic care for the large numbers of aliens turned over to DOJ by DHS. The practical effect of these redirections has been cuts to non-immigration programs at DOJ.

The Committee would like to help DOJ meet the demand for its services, which would relieve significant pressure on non-immigration programs, but the need has not been sufficiently quantified. In order to capture the size of DOJ's need, the Committee believes that a methodology is required to create defensible fiscal linkages between DHS activities and DOJ costs. The Department is directed to contract with the National Academy of Sciences (NAS) to develop, test and select a budget model that accurately captures these fiscal linkages and leverages them into an estimate of DOJ's immigration-related costs. The \$1,000,000 necessary to perform this study shall be funded from the appropriated level for this account, and the resulting conclusions should be submitted to the House and Senate Committees on Appropriations upon completion, but not later than 20 months after the enactment of this Act.

The Committee recognizes that this coordination with NAS will take time and the results will not be available during the fiscal year 2009 budget development process. In the meantime, the Committee has recommended \$83,028,000 of the Department's pending multi-component southwest border request and will consider

reprogrammings, as necessary, to allow DOJ to continue addressing the “downstream” costs of immigration-related programs that have been initiated by DHS.

Justice Management Division rent estimates.—The Committee remains frustrated by the lack of accuracy in the Department’s rent and facilities requests. The estimates produced by the Justice Management Division are frequently incorrect, sometimes by tens of millions of dollars. Every dollar unnecessarily allocated for rent is a dollar that the Committee is unable to appropriate for critical needs in other areas. The Committee urges the Department to continue making improvements in its facilities and rent management system in order to improve the accuracy of future requests.

International drug gangs.—No later than one year after the enactment of this Act, the Attorney General, in consultation with the Secretary of Homeland Security, shall submit to the House and Senate Committees on Appropriations a report, in both classified and unclassified form, identifying the three international drug gangs that present the greatest threat to law and order in the United States; describing the composition, operations, strengths and weaknesses of each of these gangs; and setting forth a national strategy to eliminate within four years the illegal operations of each identified gang.

In choosing the three gangs to be included, which will be designated as “National Threat Drug Gangs,” the Attorney General shall consider the extent to which the gang conducts activities with any international terrorist organization or state designated by the Secretary of State as a sponsor of terrorism; the volume of controlled substances that the gang imports to or distributes within the United States; and the extent to which the gang is a threat to children and schools within the United States.

JUSTICE INFORMATION SHARING TECHNOLOGY

Fiscal Year 2008 enacted	\$85,540,000
Fiscal Year 2009 request	93,868,000
Recommended in the bill	93,868,000
Bill compared with:	
Fiscal Year 2008 enacted	+8,328,000
Fiscal Year 2009 request	

The Justice Information Sharing Technology (JIST) fund was established in fiscal year 2006 to provide for corporate investments in information technology (IT). As a centralized fund under the control of the DOJ Chief Information Officer, it ensures that investments in information sharing technology and infrastructure are well planned and aligned with DOJ’s overall IT strategy and enterprise architecture. For fiscal year 2009, the Committee recommends \$93,868,000, which is equal to the budget request.

Cyber security.—The Committee notes that the Administration has chosen not to request new cyber security funds for JIST in spite of the imposition of significant new Office of Management and Budget mandates in this area. No later than 60 days after the enactment of this Act, the Department is directed to report to the House and Senate Committees on Appropriations on expected cyber security costs in the JIST account for fiscal year 2009 and the Department’s plan for covering these costs without additional appropriated resources.

Unified Financial Management System (UFMS).—The Committee has provided the requested level of funding for UFMS. This level should enable the Department to continue planning and implementation efforts for the expansion of UFMS to additional DOJ components. However, the Committee will be closely monitoring the live deployment of UFMS at the Drug Enforcement Administration (DEA), and support for DOJ's planned UFMS reprogramming in fiscal year 2009 will be contingent on appropriate standards of success being met at DEA. Some standards of interest to the Committee include the number and percent of DEA's transactions processed on UFMS, users transitioned to UFMS and processes being run through UFMS. The Committee is also interested in the resources (dollars and workhours) that DEA contributed to deploy the system on top of the resources provided by DOJ through the UFMS project office.

TACTICAL LAW ENFORCEMENT WIRELESS COMMUNICATIONS

Fiscal Year 2008 enacted	\$74,260,000
Fiscal Year 2009 request	121,651,000
Recommended in the bill	185,000,000
Bill compared with:	
Fiscal Year 2008 enacted	+110,740,000
Fiscal Year 2009 request	+63,349,000

The mission of Tactical Law Enforcement Wireless Communications is to provide secure, interoperable and reliable wireless communication services required by DOJ's law enforcement components and all Federal agents and officers engaged in the conduct of law enforcement, protective services, homeland defense and disaster response missions. This account funds component legacy network requirements, operations of the Wireless Management Office and the acquisition of new equipment and services. For fiscal year 2009, the Committee recommends \$185,000,000, which is \$63,349,000 more than the budget request.

Integrated Wireless Network.—One of the most important lessons learned from the 9/11 terrorist attacks was the critical need for secure, interoperable communication networks for law enforcement agents and other first responders. More than 6 years after those attacks, however, the Department still lacks the necessary infrastructure and equipment to deploy such a network for its personnel. The Committee is concerned that the Administration's request for this account does not sufficiently address the Department's communications deficiencies and will merely contribute to the ongoing delays in the nationwide deployment of the Integrated Wireless Network (IWN) solution. Accordingly, the Committee recommends a total of \$88,249,000 for IWN and directs the Department to use these funds for accelerated IWN deployment in high priority metropolitan regions. The Committee urges the Department to take all necessary steps to further speed the deployment of IWN to other major metropolitan areas across the nation.

ADMINISTRATIVE REVIEW AND APPEALS

Fiscal Year 2008 enacted ¹	\$232,649,000
Fiscal Year 2009 request	263,791,000
Recommended in the bill	268,791,000
Bill compared with:	
Fiscal Year 2008 enacted	+36,142,000
Fiscal Year 2009 request	+5,000,000

¹ Excludes \$8,000,000 in emergency funding.

This appropriation supports the Executive Office of Immigration Review and the Office of the Pardon Attorney.

The mission of the Executive Office of Immigration Review (EOIR) is to provide the timely and uniform interpretation and application of immigration law, ensuring due process and fair treatment for all parties involved. EOIR includes the Board of Immigration Appeals, Immigration Judges, and Administrative Law Judges who decide through administrative hearings whether to admit or exclude aliens seeking to enter the country, and whether to deport or adjust the status of aliens whose status has been challenged.

The Office of the Pardon Attorney receives, investigates, and considers petitions for all forms of executive clemency.

For fiscal year 2009, the Committee recommends \$266,404,000 for EOIR, which is \$36,142,000 over the fiscal year 2008 enacted level and \$5,000,000 over the budget request. Within funds provided, \$5,000,000 is made available to hire new immigration judges and additional support personnel to address a growing immigration caseload. The appropriation is offset by \$4,000,000 in fees that are collected by DHS and transferred to EOIR. Within funds provided, \$10,000,000 is made available, as requested, for EOIR's implementation and maintenance of a digital audio recording system and the Immigration Review Information Exchange System to ensure accurate records of immigration proceedings.

Legal Orientation Program (LOP).—Within funds provided in this bill and in fiscal year 2008, EOIR is expected to continue to support the LOP in order to improve judicial efficiency and to assist all parties involved in detained removal proceedings.

Immigration court reforms.—Within 30 days of enactment of this Act, the Department is directed to report to the House and Senate Committees on Appropriations on the implementation status of the 22 reform measures to improve the efficiency of immigration court that were identified by the AG in August, 2006.

Competency evaluation standards.—EOIR is encouraged to work with experts and interested parties in developing standards and materials for immigration judges to use in conducting competency evaluations of persons appearing before the courts.

The Committee recommends \$2,387,000 for the Office of Pardon Attorney to support a total of 15 permanent positions and 15 FTE.

DETENTION TRUSTEE

Fiscal Year 2008 enacted	\$1,225,920,000
Fiscal Year 2009 request	1,295,319,000
Recommended in the bill	1,289,053,000
Bill compared with:	
Fiscal Year 2008 enacted	+63,133,000
Fiscal Year 2009 request	– 6,266,000

The Detention Trustee leads the development of DOJ detention policy and manages Federal detention resources with the goal of

maximizing available detention space and containing costs associated with the detention of criminal defendants and aliens awaiting adjudication and/or removal from the United States. For fiscal year 2009, the Committee recommends \$1,289,053,000, which is \$6,266,000 less than the budget request.

Efficiency reduction.—The Committee is uncomfortable with OFDT’s asserted ability to absorb a \$53,734,000 efficiency reduction in 2009. OFDT’s budget justification materials do not provide specific, quantifiable indications of how a reduction of this size will be managed, and the simultaneous inclusion of a \$60,000,000 base adjustment further suggests that the efficiency reduction is not realistically achievable. The Committee is frustrated with the lack of transparency in this portion of OFDT’s request and has chosen to disregard both the efficiency reduction and the counterbalancing base adjustment in its recommendation.

Immigration workload.—The Committee recommendation meets OFDT’s request for \$37,570,000 to provide additional bed space for detainees generated by immigration-related activity along the southwest border. As noted earlier in this report, the Committee would like to ensure that DOJ is not further burdened by the need to absorb “downstream” costs of immigration activities, but additional budgetary information is needed. OFDT is encouraged to work with the Department and the National Academy of Sciences on the development of a reliable methodology for estimating DOJ’s detention costs related to immigration activities.

OFFICE OF INSPECTOR GENERAL

Fiscal Year 2008 enacted	\$70,603,000
Fiscal Year 2009 request	75,681,000
Recommended in the bill	75,681,000
Bill compared with:	
Fiscal Year 2008 enacted	+5,078,000
Fiscal Year 2009 request	

The Office of Inspector General conducts independent investigations, audits, inspections, and special reviews of DOJ personnel and programs to detect and deter waste, fraud, abuse, and misconduct, and to promote integrity, economy, efficiency, and effectiveness in DOJ operations. The Committee recommends \$75,681,000 for the Office of Inspector General, which is \$5,078,000 above the fiscal year 2008 enacted level and the same as the budget request.

The Committee commends the Inspector General’s continuing oversight of the FBI’s use of National Security Letters and PATRIOT Act Section 215 orders to obtain business records. The Committee expects the Inspector General to use available funding to continue its assessment of the FBI’s progress in implementing corrective actions in these areas.

Within funds provided, the Inspector General is expected to continue its review of the FBI’s development and implementation of the Sentinel case management system, and assess whether cost, schedule, performance and technical benchmarks are being met and whether the FBI has resolved concerns identified in its previous audits.

The Committee looks forward to receiving the findings of the Inspector General regarding the firings of several U.S. Attorneys in

2006. The Inspector General is expected to investigate allegations of misconduct and make recommendations for corrective actions where appropriate.

UNITED STATES PAROLE COMMISSION

SALARIES AND EXPENSES

Fiscal Year 2008 enacted	\$11,462,000
Fiscal Year 2009 request	12,570,000
Recommended in the bill	12,570,000
Bill compared with:	
Fiscal Year 2008 enacted	+1,108,000
Fiscal Year 2009 request	

The United States Parole Commission is an independent body within DOJ that makes decisions regarding requests for parole of Federal offenders and certain District of Columbia Code offenders. The Committee recommends \$12,570,000 for the United States Parole Commission, which is \$1,108,000 above fiscal year 2008 enacted level and equal to the request.

LEGAL ACTIVITIES

SALARIES AND EXPENSES, GENERAL LEGAL ACTIVITIES

Fiscal Year 2008 enacted ¹	\$735,549,000
Fiscal Year 2009 request	804,007,000
Recommended in the bill	804,007,000
Bill compared with:	
Fiscal Year 2008 enacted	+68,458,000
Fiscal Year 2009 request	

¹ Excludes \$10,000,000 in FY08 emergency funding.

This appropriation supports the establishment of litigation policy, conduct of litigation, and other legal responsibilities of the Department of Justice through the Office of the Solicitor General, the Tax Division, the Criminal Division, the Civil Division, the Environmental and Natural Resources Division, the Civil Rights Division, the Office of Legal Counsel, and Interpol-U.S. National Central Bureau. The Committee recommends a total of \$804,007,000 for General Legal Activities, which is \$68,458,000 above the fiscal year 2008 enacted level and equal to the budget request.

The funding is provided as follows:

Solicitor General	\$10,440,000
Tax Division	101,016,000
Criminal Division	164,061,000
Civil Division	270,431,000
Environment and Natural Resources	103,093,000
Office of Legal Counsel	6,693,000
Civil Rights Division	123,151,000
INTERPOL-USNCB	24,548,000
Office of Dispute Resolution	574,000
Total	804,007,000

In addition to inflationary and other base adjustments for the divisions within this account, the recommendation includes a programmatic increase of \$289,000 and one FTE for the Criminal Division, as requested, for Southwest Border enforcement.

Federal Observer Program.—The Committee approves the budget request to reimburse the Office of Personnel Management for the costs of the Federal Observer Program, which places election mon-

itors in jurisdictions where the Attorney General certifies or a Federal judge orders that they are necessary to ensure free and fair elections. The bill also makes available \$3,390,000 until expended for this purpose.

Budget display.—In the interest of transparency, the Committee rejects the Administration’s proposal to consolidate the decision units of each division for budgeting purposes. Future budget requests should show the separate activities of each division by the current decision units.

VACCINE INJURY COMPENSATION TRUST FUND

Fiscal Year 2008 enacted	\$6,833,000
Fiscal Year 2009 request	7,833,000
Recommended in the bill	7,833,000
Bill compared with:	
Fiscal Year 2008 enacted	+1,000,000
Fiscal Year 2009 request	

The Vaccine Injury Compensation Trust Fund covers the Department of Justice’s expenses associated with litigating cases under the National Childhood Vaccine Injury Act of 1986. The Committee recommends \$7,833,000 for the Vaccine Injury Compensation Trust Fund, the same as the budget request and \$1,000,000 above the fiscal year 2008 enacted level.

ANTITRUST DIVISION

SALARIES AND EXPENSES

Fiscal Year 2008 enacted	\$147,819,000
Offsetting Fee Collections	– 139,000,000
Direct Appropriation	8,819,000
Fiscal Year 2009 request	150,591,000
Offsetting Fee Collections	– 150,591,000
Direct Appropriation	
Recommended in the bill	157,788,000
Offsetting Fee Collections	– 157,788,000
Direct Appropriation	
Bill compared with:	
Fiscal Year 2008 enacted	+9,969,000
Fiscal Year 2009 request	+7,197,000

The Antitrust Division investigates potential violations of Federal antitrust laws, represents the interests of the United States in cases brought under these laws, acts on antitrust cases before the Supreme Court, and reviews decisions of regulatory commissions relating to antitrust law. Appropriations for the Antitrust Division are offset by Hart-Scott-Rodino Act pre-merger filing fee collections.

The Committee recommends \$157,788,000 in budget authority for the Antitrust Division, \$9,969,000 above fiscal year 2008 enacted level and \$7,197,000 over the budget request, which is provided to lift the hiring freeze imposed during fiscal year 2008. This appropriation is offset by \$157,788,000 in pre-merger filing fee collections, resulting in a direct appropriation of \$0.

Budget display.—In the interest of transparency, the Committee rejects the Administration’s proposal to consolidate the decision units of the Antitrust Division for budgeting purposes. Future

budget requests should show the separate activities of the current decision units.

UNITED STATES ATTORNEYS

SALARIES AND EXPENSES

Fiscal Year 2008 enacted ¹	\$1,747,822,000
Fiscal Year 2009 request	1,831,336,000
Recommended in the bill	1,836,336,000
Bill compared with:	
Fiscal Year 2008 enacted	+88,514,000
Fiscal Year 2009 request	+5,000,000

¹Excludes \$7,000,000 in emergency funding.

This appropriation supports the Executive Office for United States Attorneys (EOUSA) and the 94 United States Attorney Offices, which serve as the principal litigators for the U.S. Government for criminal, civil, and debt collection matters.

The Committee recommends \$1,836,336,000 for the United States Attorneys (USA), which is \$88,514,000 above the fiscal year 2008 enacted level and \$5,000,000 over the budget request.

Child exploitation investigations and prosecutions.—The additional \$5,000,000 above the budget request is made available to support the hiring of additional assistant USAs to increase investigations and prosecutions of offenses related to the sexual exploitation of children, as authorized by the Adam Walsh Child Protection and Safety Act of 2006. The Committee expects that not less than \$33,600,000 shall be available for this purpose in fiscal year 2009.

Southwest border enforcement.—Within funds provided, the Committee approves the programmatic request of \$8,400,000 and 83 positions to strengthen prosecutions of criminal enterprises, including human and drug smuggling, along the southwest border.

Prosecution of serious crimes in Indian Country.—The Committee is concerned about coordination between USAs and tribal governments in the prosecution of serious crimes in Indian Country. The EOUSA is directed to report to the House and Senate Committees on Appropriations, within 60 days of enactment of this Act, on the prosecution of serious crimes in Indian Country, including murder and rape, which are reported to Federal law enforcement.

Ethical and professional standards.—Justice rooted in law, not in politics or favor, is a founding principle of our Nation. U.S. Attorneys are vested with enormous power, and it is their sworn duty to enforce the laws of this country fairly and impartially. Even the hint of political bias in the performance of these duties is a violation of their oath and the American people's trust, which cannot and must not be tolerated.

The Committee continues to be deeply troubled by examples and allegations of political interference by the Administration in the work of the Justice Department, including within the U.S. Attorneys offices. Of particular note is the reckless prosecution by the U.S. Attorney for the Eastern District of Wisconsin of a State government employee in 2006, which an appellate court vigorously condemned and summarily overturned, ordering the immediate release of the defendant. From the bench, one of the judges told the prosecutors that “your evidence is beyond thin.”

The Committee expects all employees of the Justice Department to uphold the highest standards of ethical and professional conduct. The Attorney General is directed, within 30 days of enactment of this Act, to report to the House and Senate Committees on Appropriations on the resolution of allegations of impropriety by U.S. Attorneys. The Committee directs the Inspector General (OIG) and the Office of Professional Responsibility to coordinate their efforts in reviewing claims of misconduct and wrongdoing, and to report to the Committees within 60 days of enactment of this Act on their findings and recommendations. Further, the Committee awaits the OIG report on its review of the firings of several U.S. Attorneys in 2006.

UNITED STATES TRUSTEE SYSTEM FUND

Fiscal Year 2008 enacted	\$209,763,000
Offsetting Fee Collections	- 184,000,000
Interest on U.S. Securities	- 5,000,000
Prior Year Unobligated Balances	- 20,000,000

Recommended in the bill	217,416,000
Offsetting Fee Collections	- 160,000,000
Interest on U.S. Securities	- 5,000,000
Direct Appropriation	52,416,000
Bill compared with:	
Fiscal Year 2008 enacted	+51,653,000
Fiscal Year 2009 request	

The mission of the United States Trustee Program (USTP) is to promote integrity and efficiency in the Nation's bankruptcy system by enforcing bankruptcy laws, and providing oversight of private trustees. To carry out its duties, the USTP is organized into three levels: The Executive Office for United States Trustees in Washington, DC; United States Trustees in 21 regions whose geographic jurisdiction is established by statute; and 95 field offices, which cover 150 court sites and 280 other administrative hearing locations. The Committee recommends \$217,416,000 for the USTP, which is \$51,653,000 over the fiscal year 2008 enacted level and equal to the budget request. The appropriation is offset by \$160,000,000 in offsetting fee collections and \$5,000,000 derived from interest on investments in U.S. securities, resulting in a direct appropriation of \$52,416,000.

FOREIGN CLAIMS SETTLEMENT COMMISSION

SALARIES AND EXPENSES

Fiscal Year 2008 enacted	\$1,606,000
Fiscal Year 2009 request	1,823,000
Recommended in the bill	1,823,000
Bill compared with:	
Fiscal Year 2008 enacted	+217,000
Fiscal Year 2009 request	

The mission of the Foreign Claims Settlement Commission is to protect the property rights of U.S. citizens abroad and promote the international rule of law through adjudication of claims by United

States citizens against foreign governments. The Committee recommends \$1,823,000 for the Foreign Claims Settlement Commission, which is \$217,000 over the fiscal year 2008 enacted level and equal to the budget request.

FEES AND EXPENSES OF WITNESSES

Fiscal Year 2008 enacted	\$168,300,000
Fiscal Year 2009 request	168,300,000
Recommended in the bill	168,300,000
Bill compared with:	
Fiscal Year 2008 enacted
Fiscal Year 2009 request

This appropriation, which is considered mandatory for scorekeeping purposes, provides for fees and expenses of witnesses who appear on behalf of the Government in cases in which the United States is a party. Eligible expenses include fees for fact and expert witnesses, mental competency examinations and witness and informant protection. For fiscal year 2009, the Committee recommends \$168,300,000, which is equal to the budget request.

COMMUNITY RELATIONS SERVICE

SALARIES AND EXPENSES

Fiscal Year 2008 enacted	\$9,794,000
Fiscal Year 2009 request	9,873,000
Recommended in the bill	9,873,000
Bill compared with:	
Fiscal Year 2008 enacted	+79,000
Fiscal Year 2009 request

The Community Relations Service was established by Title X of the Civil Rights Act of 1964 to provide assistance to communities in resolving disagreements arising from discriminatory practices.

The Committee recommends \$9,873,000 for the Community Relations Service, which is \$79,000 over the fiscal year 2008 enacted level and equal to the budget request.

ASSETS FORFEITURE FUND

Fiscal Year 2008 enacted	\$20,990,000
Fiscal Year 2009 request	20,990,000
Recommended in the bill	20,990,000
Bill compared with:	
Fiscal Year 2008 enacted
Fiscal Year 2009 request

The Assets Forfeiture Fund (AFF) provides funds for qualifying investigative expenses of federal law enforcement agencies and their state or local partners. Funds for these activities are provided from receipts in the AFF resulting from the forfeiture of assets. Expenses related to the management and disposal of the assets are also provided from receipts in the AFF by a permanent indefinite appropriation. For fiscal year 2009, the Committee recommends \$20,990,000, which is equal to the budget request.

UNITED STATES MARSHALS SERVICE

SALARIES AND EXPENSES

Fiscal Year 2008 enacted ¹	\$849,219,000
Fiscal Year 2009 request ²	933,117,000
Recommended in the bill	936,313,000
Bill compared with:	
Fiscal Year 2008 enacted	+87,094,000
Fiscal Year 2009 request	+3,196,000

¹ Excludes \$15,000,000 in emergency funding.

² Includes \$2,304,000 for construction.

Established in 1789, the United States Marshals Service (USMS) is the enforcement arm of the Federal courts. The USMS is responsible for providing physical security to Federal judges and U.S. courthouses; protecting witnesses, jurors and members of the public; safely and humanely transporting and detaining Federal prisoners; and apprehending fugitives. The USMS has 94 district offices, corresponding with the 93 judicial districts and the D.C. Superior Court. For fiscal year 2009, the Committee recommends \$936,313,000, an increase of \$3,196,000 over the budget request (\$5,500,000 over the budget request after excluding construction funding).

Balance between missions.—The Committee understands that the Marshals have significant responsibilities relating to immigration enforcement, which is the focus of the Administration’s budget request. However, the Marshals have substantial mandates in other areas where workload is increasing, resources are decreasing and no other agencies have the appropriate authority to fill the resulting gap in services. Accordingly, the Committee has tried to restore a better sense of balance to the 2009 Marshals budget by including initiatives in these other high priority mission areas, including sex offender apprehension and judicial security.

Immigration workload.—The Committee recommends \$12,746,000, as requested, to help the Marshals address the escalating immigration-related workload along the Southwest border. As noted earlier in this report, the Committee would like to ensure that DOJ is not further burdened by the need to absorb “downstream” costs of DHS immigration activities, but additional budgetary information is needed. The Marshals Service is encouraged to work with the Department and the National Academy of Sciences on the development of a reliable methodology for estimating DOJ’s costs related to immigration activities.

Adam Walsh enforcement.—The Committee is disappointed that the Administration did not request funds for the Marshals to execute their responsibilities under the Adam Walsh Child Safety and Protection Act. Although this legislation was passed in 2006, the Marshals still have no significant resources dedicated to addressing an estimated caseload of 100,000 noncompliant sex offenders. In response to this problem, the Committee expects the Marshals to fund Adam Walsh enforcement activities with funds that were included in P.L. 110–252; these funds will remain available for use throughout fiscal year 2009. In addition, the Committee recommends \$1,500,000 in this Act to improve sex offender targeting through the National Sex Offender Targeting Center and related efforts. Together, these appropriations will provide the Marshals with \$18,470,000 available for Adam Walsh enforcement activities

in 2009. The Committee expects the Marshals Service to request a full annualization of both of these initiatives in its fiscal year 2010 budget request.

Judicial threat investigations.—The Marshals recently reported that 2008 is on pace to record the highest annual number of judicial threats and inappropriate communications to date. The Committee is concerned that the escalating threat workload is outpacing the Marshals' ability to address that workload and that members of the judiciary are being exposed to unnecessary risk as a result. Accordingly, the Committee recommends \$4,000,000 to strengthen the Marshals' ability to analyze and investigate threats against the judiciary.

Courthouse construction funding.—The Committee does not agree with the proposed consolidation of the Salaries and Expenses and Construction accounts. Funding for construction activities is provided under the Construction heading discussed below.

CONSTRUCTION

Fiscal Year 2008 enacted	\$2,304,000
Fiscal Year 2009 request	(¹)
Recommended in the bill	4,000,000
Bill compared with:	
Fiscal Year 2008 enacted	+1,696,000
Fiscal Year 2009 request ¹	+4,000,000

¹The FY 2009 President's Budget includes \$2,304,000 for construction within the United States Marshals Service Salaries and Expenses request.

This appropriation provides funds for construction and related expenses in space controlled, occupied or utilized by the Marshals Service for prisoner holding and related support. For fiscal year 2009, the Committee recommends \$4,000,000, which is \$1,696,000 higher than the amount requested under the Salaries and Expenses account. The Committee expects these funds to be applied to the highest priority renovation projects identified by the Marshals.

NATIONAL SECURITY DIVISION

SALARIES AND EXPENSES

Fiscal Year 2008 enacted	\$73,373,000
Fiscal Year 2009 request	83,789,000
Recommended in the bill	83,789,000
Bill compared with:	
Fiscal Year 2008 enacted	+10,416,000
Fiscal Year 2009 request	

The mission of the National Security Division (NSD) is to coordinate the Department's efforts in carrying out its core mission of combating terrorism and protecting national security. For fiscal year 2009, the Committee recommends \$83,789,000, which is equal to the budget request.

Foreign Intelligence Surveillance Act (FISA) backlog.—According to data recently submitted by the Department, NSD is processing over 2,200 FISAs per year with only 100 attorneys. This has led to the creation of a backlog among non-emergency FISA requests. The Committee directs NSD to submit a report on the trend in FISA backlog numbers over the past 5 fiscal years and NSD's plan for addressing the backlog, beginning in fiscal year 2009. The report shall be submitted to the House and Senate Committees on

Appropriations no later than 60 days after the enactment of this Act.

Intelligence oversight.—The Committee commends NSD for its proactive oversight activities aimed at the FBI’s use of National Security Letters (NSLs) and other authorities. The Committee understands that NSD has planned 18 National Security Reviews of FBI investigative and intelligence activity in fiscal year 2009 and expects to be informed of any significant deviations from this plan.

Foreign investment reviews.—The Committee is concerned that NSD does not have sufficient dedicated resources to review adequately foreign investment proposals in the United States. The Committee directs NSD to submit a report on the Division’s foreign investment review workload and the Division’s ability to address adequately this workload with the resources available under this Act. The report shall be submitted to the House and Senate Committees on Appropriations no later than 60 days after the enactment of this Act.

INTERAGENCY LAW ENFORCEMENT

INTERAGENCY CRIME AND DRUG ENFORCEMENT

Fiscal Year 2008 enacted	\$497,935,000
Fiscal Year 2009 request	531,581,000
Recommended in the bill	521,938,000
Bill compared with:	
Fiscal Year 2008 enacted	+24,003,000
Fiscal Year 2009 request	–9,643,000

The Interagency Crime and Drug Enforcement (ICDE) account seeks to combine the investigative and prosecutorial resources of the Department to bring down the “worst of the worst” in multinational drug trafficking organizations. The interagency program of the Organized Crime Drug Enforcement Task Forces (OCDETF) focuses participants on the mission of attacking high-level organizations through coordinated, multi-jurisdictional investigations. For fiscal year 2009, the Committee recommends \$521,938,000, a decrease of \$9,643,000 from the budget request. The decrease reflects the Committee’s intention to focus new program initiatives for the Marshals Service, U.S. Attorneys and DEA within those accounts rather than within the OCDETF structure.

FEDERAL BUREAU OF INVESTIGATION

SALARIES AND EXPENSES

Fiscal Year 2008 enacted ¹	\$6,349,950,000
Fiscal Year 2009 request	7,065,100,000
Recommended in the bill	7,065,100,000
Bill compared with:	
Fiscal Year 2008 enacted	+715,150,000
Fiscal Year 2009 request	

¹ Excludes \$143,539,000 in emergency funding.

The mission of the FBI is to protect and defend the United States against terrorism and foreign intelligence threats; to uphold and enforce the criminal laws of the United States; and to provide leadership and criminal justice services to federal, state, municipal and international agencies and partners. For fiscal year 2009, the Committee recommends \$7,065,100,000, which is equal to the budget request.

Program changes.—The Committee recommendation provides most of the program changes requested by the Administration, with the following deviations:

Requested Program Changes	\$437,615,000
Recommended Adjustments:	
Deployment aircraft	– 20,040,000
National Security Analysis Center	– 10,777,000
Pay modernization	– 9,076,000
Intellectual property enforcement	+8,000,000
Retention/relocation funding	+8,893,000
Mortgage fraud investigations	+10,000,000
Contracting fraud investigations	+3,000,000
Child exploitation enforcement	+10,000,000
Total Program Changes	437,615,000

The net impact of these deviations on the FBI's total program enhancement number is zero.

Deployment aircraft.—The Committee recommends a reduction of \$20,040,000 to the Response to a WMD Incident request. These funds were intended to cover the fiscal year 2009 costs of an emergency deployment aircraft lease, but the costs of that lease were included in P.L. 110–252.

National Security Analysis Center (NSAC).—The Committee does not recommend any additional funding for the FBI's ongoing NSAC project. The Committee notes that the FBI plans to use “predictive models and patterns of behavior” to identify suspicious individuals, but it is unclear how the Bureau intends to define these predictive models in such a way as to avoid needless intrusions into the privacy of innocent citizens (and needless expenditures of agent time and energy chasing down false leads). Documentation, such as the Exhibit 300, a System of Records Notice, or Privacy Impact Assessment, is not available or not sufficiently updated to allay the Committee's concerns about privacy and civil liberties. In addition, the Congress has been given very little in terms of a concept of operations or other implementation plan to indicate that the appropriate planning has taken place and the appropriate progress has been made to warrant an additional investment in this program.

Pay modernization.—The Committee recommendation does not include the requested \$9,076,000 for pay modernization. Based on experiences at the Departments of Defense and Homeland Security, the Committee has significant reservations about the merits and fairness of this brand of pay banding system and has not seen sufficient evidence that the system's weaknesses have been adequately addressed. In addition, the request does not explain how the FBI intends to implement an Intelligence Community-driven evaluation and compensation system within an organization with significant resources outside of the Intelligence Community.

Intellectual property enforcement.— The Committee recommendation provides \$8,000,000 for additional agents, dedicated solely to investigating criminal intellectual property rights (IPR) cases, in the same localities of the Department's Computer Hacking and Intellectual Property (CHIP) units. While FBI Special Agents currently work closely with CHIP Attorneys to investigate computer crime and IPR cases, the Committee believes that it is necessary to provide for additional agents whose sole purpose is to work on IPR investigations. The Committee recommends the addition of two

agents in each of the field offices in the same locality as those CHIP units which the Attorney General has determined most merit assistance in IPR investigations, but no less than 26 agents shall be assigned for this purpose.

The recommendation also provides for the creation of an additional and distinct operational unit at FBI Headquarters with at least 5 full-time, permanent agents, dedicated to working with the Department of Justice's Computer Crime and Intellectual Property Section (CCIPS), but solely on complex, multi-district and international criminal IPR cases. The agents appropriated for this section shall solely investigate and support the criminal prosecution of federal intellectual property laws, including Title 17 United States Code, sections 506 and 1204; Title 18 U.S. Code, sections 1831, 1832, 2318, 2319, 2319A, 2319B, and 2320.

Retention and relocation.—The Committee has seen a long string of reports indicating that the Bureau continues to experience staffing difficulties in a number of high priority position categories and organizational units, particularly within FBI Headquarters. The Bureau has taken a number of steps to address these staffing difficulties, but the Committee believes that additional retention and relocation funding is necessary to aid these other efforts. Accordingly, the Committee recommends \$8,893,000 in additional funding for use under the FBI's existing retention and relocation authorities, which remain in effect through December 31, 2009. This funding may also be used by the Bureau to ameliorate the impact on affected agents of the Field Office Supervisory Term Limit Policy under an agreement reached with the FBI Agents Association.

Mortgage fraud investigations.—By most industry and law enforcement measures, mortgage fraud has been consistently rising for the past several years. Recent estimates suggest that annual mortgage fraud losses are now between \$4 and \$6 billion. These losses negatively impact financial institutions, other lenders, homeowners and homebuyers. The Committee is concerned that the FBI does not have sufficient resources to address its caseload in this area, which has increased by more than 55 percent since 2003. The \$10,000,000 provided in the Committee's recommendation will allow the FBI to dedicate additional agents to mortgage fraud investigations and add to the existing mortgage fraud task forces and working groups.

Contracting fraud.—The Committee recommends \$3,000,000 to fund the continuing investigation of potential fraud perpetrated by private businesses on contract to the Federal government. The Committee intends for the FBI to focus its investigations primarily on allegations of fraud committed by contractors involved in the planning, execution and support of ongoing military operations in Iraq and Afghanistan. These resources are in addition to funds that were included in P.L. 110-252, making a total of \$8,000,000 available in 2009 for contracting fraud investigations.

Child exploitation investigations.—The FBI operates several programs aimed at preventing and addressing various forms of child exploitation, including child pornography and child prostitution. Despite the importance of these programs, they have been neglected in the budget request, along with many other traditional criminal enforcement activities. Therefore, the Committee rec-

ommends \$10,000,000 to improve and expand the FBI's investigative capabilities in child exploitation cases.

Foreign intelligence collection.— It has historically been beyond the scope of the FBI's responsibilities to collect information on foreign entities that are not tied to an FBI case. Although the FBI has authority to collect this intelligence and has been asked by the Office of the Director of National Intelligence to do so, the Committee is concerned that this new tasking may dilute the FBI's primary missions. The Committee is also unsure of how the FBI's new focus on foreign intelligence collection will be coordinated with other agencies whose missions have always included foreign intelligence activities. The FBI is directed to report to the House and Senate Committees on Appropriations within 60 days of the enactment of this Act on how the Bureau will utilize its foreign intelligence collection resources without duplicating or conflicting with activities already underway at those other elements of the Intelligence Community with longstanding foreign intelligence missions.

Long-term strategic planning.—The Committee remains unconvinced that the FBI has a clear idea of the long-term capability it is building. The FBI has experienced massive growth over the past seven years but seems unable to clearly articulate how much longer this kind of growth is going to be necessary. The Committee has seen the FBI's "end-state capabilities", but the capabilities are too vaguely defined; it is impossible to discern from the end states how close the FBI is to those capabilities and how much the resources requested for fiscal year 2009 will help to advance the FBI toward those ultimate goals. The Committee directs the FBI to develop more discrete, quantifiable end-state capabilities that will better prepare the Committee to understand the implications of its annual budget decisions.

National Security Letters (NSLs).—The Committee commends the FBI for the progress noted by the OIG's March 2008 report on NSL abuse. However, the Committee is waiting to see more concrete evidence that the corrective measures implemented by the FBI will have a lasting positive impact on the FBI's compliance with all NSL-related laws, regulations and policies. The Committee hopes to see that evidence in the OIG's third annual assessment of the FBI's NSL compliance, which will be released in 2009.

The Committee remains concerned with the high incidence of NSL "third party errors" reported by the FBI. In these cases, the FBI asserts that non-compliance with law or policy is the result of a third party information provider supplying more or different information than requested by the FBI through an NSL. The Committee believes that the correction and prevention of these errors should be given as much emphasis as the correction and prevention of errors originating from the actions of an FBI employee; the result of the error is the same, regardless of which entity made the initial mistake. The Committee has seen little evidence, however, that the FBI has a plan in place to work with these third parties to educate them about their responsibilities and reduce the incidence of mistaken productions of content and other information. The Committee directs the FBI to report to the House and Senate Committees on Appropriations within 60 days of the enactment of this Act on the steps it is taking to reduce and prevent third party NSL errors.

Sentinel.—The Committee continues to follow the FBI’s progress in developing and implementing the Sentinel case management system. The Committee is aided in its oversight efforts by the continuing annual assessments of the OIG on Sentinel implementation and the FBI’s efforts to address previously identified concerns. As always, the Committee expects to be informed immediately of any significant deviations from the planned budget or schedule for this project.

Next Generation CODIS.—The Committee is aware that the Inspector General (IG) is expected to issue a report on the contracting process for Next Generation CODIS. Given the FBI’s past challenges managing complicated information technology projects, the Committee will carefully monitor the findings of the report to ensure that scarce public funds are well spent and intellectual property is fully respected by the Department.

CONSTRUCTION

Fiscal Year 2008 enacted	\$164,200,000
Fiscal Year 2009 request	42,991,000
Recommended in the bill	42,991,000
Bill compared with:	
Fiscal Year 2008 enacted	– 121,209,000
Fiscal Year 2009 request	

This appropriation provides funds for the construction of FBI facilities and related activities. For fiscal year 2009, the Committee recommends \$42,991,000, which is equal to the budget request.

Academy construction.—The Administration requested \$9,800,000 for construction projects on the campus of the FBI Academy. The Committee’s recommendation includes the necessary funds for these requested projects.

DRUG ENFORCEMENT ADMINISTRATION

SALARIES AND EXPENSES

Fiscal Year 2008 enacted ¹	\$1,855,569,000
Fiscal Year 2009 request	1,936,584,000
Recommended in the bill	1,939,084,000
Bill compared with:	
Fiscal Year 2008 enacted	+83,515,000
Fiscal Year 2009 request	+2,500,000

¹ Excludes \$2,000,000 in emergency funding.

DEA’s mission is to enforce the controlled substances laws and regulations of the United States; bring to the criminal and civil justice system those organizations and principal members of organizations involved in the growing, manufacturing or distribution of controlled substances appearing in or destined for illicit traffic in the United States; and support non-enforcement programs aimed at reducing the availability of illicit controlled substances on the domestic and international markets. For fiscal year 2009, the Committee recommends \$1,939,084,000, which is \$2,500,000 more than the budget request.

Drug Flow Attack Strategy.—The Committee is encouraged by the progress DEA is showing with its Drug Flow Attack Strategy (DFAS) and recommends the following for this initiative:

Foreign-deployed Advisory and Support Teams	\$7,000,000
Strategic drug flow enforcement operations	2,000,000

Tactical aircraft section	1,397,000
Southwest border	2,528,000
Open source analysis	150,000
Total	13,075,000

The only portion of the DFAS request that is not recommended is funding for the purchase of a helicopter for FAST transportation; funding for this purpose was included in P.L. 110–252.

Diversion Control program.—The Committee’s recommendation provides the requested level of \$244,450,000 for the Diversion Control program, which is fully offset with fee collections. The recommended level includes an increase of \$498,000 for the Diversion Control portion of the Drug Flow Attack Strategy.

Mobile Enforcement Teams (MET).—The Committee understands that DEA’s MET program has been reduced significantly since fiscal year 2006. The number of MET teams has sharply decreased, and those teams that remain are hampered operationally by limits on temporary duty funding and other restrictions. The Committee recommends \$30,600,000 for the MET program in fiscal year 2009. This increase of \$10,000,000 will allow DEA to begin the rebuilding of the MET program, both through the establishment of additional teams and by increasing the funds available for existing teams. The Committee continues to believe that the MET program should be focused primarily on methamphetamine enforcement.

BUREAU OF ALCOHOL, TOBACCO, FIREARMS AND EXPLOSIVES

SALARIES AND EXPENSES

Fiscal Year 2008 enacted	\$984,097,000
Fiscal Year 2009 request	1,027,814,000
Recommended in the bill	1,054,215,000
Bill compared with:	
Fiscal Year 2008 enacted	+70,118,000
Fiscal Year 2009 request	+26,401,000

ATF is responsible for enforcing Federal criminal laws and regulating the firearms and explosives industries. The combined efforts of special agents and industry operations investigators allow ATF to identify, investigate and recommend for prosecution violators of the Federal firearms and explosives laws. Additionally, ATF ensures that licensees are operating within established laws and regulations. For fiscal year 2009, the Committee recommends \$1,054,215,000, an increase of \$26,401,000 over the budget request.

Southwest border initiative.—The Committee believes that the Administration’s Southwest border initiative is insufficiently balanced among the different types of border crime. Despite testimony and written materials describing an “iron river of guns” flowing from the United States into Mexico, firearms trafficking enforcement constitutes less than 1% of the Administration’s requested initiative. This gap in the Administration’s strategy impedes efforts to reduce the cross-border movement of illegal guns and, consequently, reduce violence in communities on both sides of the border. The Committee recommendation provides \$5,000,000 for the ATF to enhance Project Gunrunner and other efforts aimed at tracing and attacking firearms trafficking organizations operating in Mexico and the southwest border region, particularly in those cities

along the border determined by ATF to have the highest volume of illegal gun trafficking.

Regulatory backlog.—The Committee remains concerned by the backlog of pending regulatory actions at ATF, particularly among explosives rules. ATF has testified that this backlog is due primarily to a staffing shortage among regulation writers. In order to address the staffing shortage and improve the timeliness of ATF's regulation development process, the Committee has provided \$200,000 to hire additional regulation writers.

Restoring current services.—The Committee is disappointed that the Administration did not request sufficient funding to fully restore the \$36,744,000 in services and activities that ATF has discontinued in fiscal year 2008. The Administration budgeted for the restoration of less than half of this amount; the Committee recommends the restoration of an additional \$21,201,000 to allow ATF to rebuild to its full current services level.

Ballistics imaging and identification.—The Committee continues to support high-tech ballistic imaging and identification technology, and recognizes the significant investments made by State and local law enforcement entities in building the current data base. The Committee encourages ATF to ensure that ballistic imaging technology is routinely refreshed, upgraded and deployed to State and local law enforcement. Further, the Committee expects ATF to ensure that upgrades and replacements for ballistic imaging technology take into account resources invested by State and local law enforcement.

FEDERAL PRISON SYSTEM

SALARIES AND EXPENSES

Fiscal Year 2008 enacted	\$5,050,440,000
Fiscal Year 2009 request	5,435,754,000
Recommended in the bill	5,595,754,000
Bill compared with:	
Fiscal Year 2008 enacted	+545,314,000
Fiscal Year 2009 request	+160,000,000

The Bureau of Prisons (BOP) is responsible to protect society by confining offenders in the controlled environments of prisons and community-based facilities that are safe, humane, cost-efficient, and appropriately secure, and that provide work and other self-improvement opportunities to assist offenders in becoming law-abiding citizens upon release. The Committee recommends \$5,595,754,000 for the salaries and expenses of the Federal Prison System, which is \$545,314,000 over the fiscal year 2008 enacted level and \$160,000,000 above the budget request. The funds are to be distributed as follows:

Inmate Care and Programs	\$1,952,701,000
Institution Security and Administration	2,544,419,000
Contract Confinement	897,468,000
Management and Administration	201,166,000

The Federal prison population has grown explosively over the last 20 years. Rising from roughly 25,000 prisoners in 1980, the population is estimated to be 207,000 by the end of fiscal year 2008 and more than 213,000 by the end of fiscal year 2009. Correspond-

ingly, the overcrowding rate is projected to rise to 42 percent in 2009, a five percent increase over 2008.

Several years of inadequate budget requests by the Administration have led to a critical juncture for the Federal Prison System—in terms of safety and security for both inmates and staff. Budget pressures have forced BOP to rely excessively on overtime for current correctional officers instead of hiring additional staff, leaving the workforce spread dangerously thin. Inmates are increasingly housed in makeshift quarters in many prisons; and spikes in the numbers of serious assaults, murders, and large-scale riots by inmates are cause for great concern. Such trends cannot continue unabated. While the Department has taken some steps to reverse these trends in its fiscal year 2009 budget request, the Committee recommends an increase of \$160,000,000 to hire new correctional officers and fill other critical shortfalls in BOP programs. The Committee also approves programmatic increases requested by the Administration for additional contract beds and a population adjustment for the marginal costs of new inmates in fiscal year 2009.

Substance abuse treatment.—Forty percent of inmates entering Federal prisons have a drug use disorder and require residential drug abuse treatment. In fiscal year 2007, 4,000 eligible inmates went without such services. An estimated 8,000 eligible inmates remain on the waiting list in fiscal year 2008. Despite the Violent Crime Control and Law Enforcement Act of 1994, which requires such treatment to be provided, the fiscal year 2009 budget request does not address this shortfall. The Committee directs that within amounts appropriated, \$79,200,000 shall be made available for residential and transitional drug abuse treatment to all eligible inmates. The Committee believes that an increase of \$10,000,000 over the budget request represents a sound investment that will benefit society when drug-free inmates complete their sentences and return to life outside of confinement.

Inmate education, training and prisoner re-entry.—The Committee directs that within amounts appropriated, \$138,000,000 (\$20,000,000 more than the budget request) is made available to reduce the backlog of inmates waiting to participate in education, vocational training and prisoner re-entry programs, which are cost-effective tools in reducing the societal impacts of criminal recidivism.

Sex offender management.—The Committee provides \$9,200,000 for inmate sex offender management and treatment, authorized by the Adam Walsh Child Protection and Safety Act of 2006.

Reimbursement for U.S. Immigration and Customs Enforcement (ICE) detainees.—The Committee directs BOP to work cooperatively with DHS to transfer expeditiously the estimated 700 ICE detainees who are currently housed in the Federal Prison System, or to obtain prompt and fair reimbursement from ICE for the costs of incarcerating them. DOJ is further directed to report to the House and Senate Committees on Appropriations not later than 60 days after enactment of this Act on how BOP has complied with this direction.

National Institute of Corrections (NIC).—The Committee rejects the Administration's proposal to eliminate funding for the NIC, which provides valuable training and services, including research and evaluation, technical assistance, information sharing and plan-

ning to State and local adult corrections agencies, the BOP and other Federal agencies.

To address deficiencies in corrections reporting identified by the U.S. Census Bureau, the Committee encourages the NIC to work with State corrections agencies to develop better procedures and systems for collecting and maintaining corrections records.

Contracting out.—The recommendation includes a general provision to prohibit the use of funds to conduct, process or approve a public-private competition under OMB Circular A–76 for personnel who are employees of the Bureau of Prisons or of Federal Prison Industries, Incorporated. This provision does not prevent the Bureau of Prisons from meeting additional bed space needs using State, local, and private existing and new prison capacity.

Staffing levels and staff-inmate ratios.—On a monthly basis, the BOP is directed to notify the House and Senate Committees on Appropriations of current correctional officer staffing levels, by facility, and of the staff-inmate ratios for all Federal prisons.

Budget display.—In the interest of transparency, the Committee rejects the Administration’s proposal to consolidate BOP’s decision unit structure. Future budget requests should be displayed by the existing four decision units: Inmate Care and Programs; Institution Security and Administration; Contract Confinement and Management and Administration.

Inmate Medical Care.—The Committee supports BOP efforts to improve inmate medical care and address its increasing costs. The BOP is currently experiencing a shortage of dentists, with 13 prisons lacking a full-time dentist and a system-wide vacancy rate of 20 percent. The shortage is expected to worsen due to retirements and retention difficulties. The Committee directs BOP to report to the House and Senate Committees on Appropriations by December 31, 2008, on its current and projected dentist staffing needs and its plans to address this situation.

BUILDINGS AND FACILITIES

Fiscal Year 2008 enacted	\$372,720,000
Fiscal Year 2009 request	95,807,000
Recommended in the bill	135,807,000
Bill compared with:	
Fiscal Year 2008 enacted	– 236,913,000
Fiscal Year 2009 request	+40,000,000

The Committee recommends \$135,807,000 for the construction, modernization, maintenance, and repair of prison and detention facilities housing Federal inmates, which is \$236,913,000 below the fiscal year 2008 enacted level and \$40,000,000 above the request.

The Committee provides \$40,000,000 above the request to address the significant backlog of major health and safety repairs in Federal prison facilities. Nearly one-third of BOP’s 114 institutions are more than 50 years old, and most have not undergone major renovations since they were constructed or acquired by BOP. The BOP is directed to provide quarterly reports to the House and Senate Committees on Appropriations on its backlog of maintenance and repairs, and its schedule for addressing them.

FEDERAL PRISON INDUSTRIES, INCORPORATED
(LIMITATION ON ADMINISTRATIVE EXPENSES)

Fiscal Year 2008 enacted	\$2,328,000
Fiscal Year 2009 request	2,328,000
Recommended in the bill	2,328,000
Bill compared with:	
Fiscal Year 2008 enacted
Fiscal Year 2009 request

Created by Federal statute in 1934, Federal Prison Industries (FPI) operates as a wholly-owned, self-sustaining Government corporation. FPI employs and provides skills training to Federal inmates.

The Committee recommends a limitation on administrative expenses of \$2,328,000 for FPI, which is equal to the fiscal year 2008 enacted level and the request. The Committee believes that those who are repaying their debts to society should be provided opportunities to prepare themselves to re-enter society as gainfully employed citizens. The Committee expects the Administration to continue to offer meaningful work opportunities to inmates while respecting the interests of small and medium-sized businesses.

STATE AND LOCAL LAW ENFORCEMENT ACTIVITIES

After a decade of decline, the FBI has confirmed that violent crime, including murders, rapes, robberies, and gun crimes, rose across the Nation in 2005 and 2006. Preliminary data collected for 2007 reflects a more complex picture. However, there is no cause for complacency, particularly given indications that violent crime continues to rise outside metropolitan areas and in small towns and rural areas.

Despite clear indications that crime rises during economic downturns, the Administration proposes to cut fiscal year 2009 State and local law enforcement and crime prevention funding by \$1,600,000,000, which is 60 percent below the current year level. The Committee takes very seriously its leadership responsibility in fighting crime across the Nation, and rejects this ill-conceived proposal.

In total, this bill provides \$3,129,100,000 for State and local law enforcement and crime prevention grant programs, which restores funding for these critical programs to roughly \$100,000,000 above the fiscal year 2005 enacted level.

OFFICE ON VIOLENCE AGAINST WOMEN

VIOLENCE AGAINST WOMEN PREVENTION AND PROSECUTION
PROGRAMS

Fiscal Year 2008 enacted	\$400,000,000
Fiscal Year 2009 request	280,000,000
Recommended in the bill	435,000,000
Bill compared with:	
Fiscal Year 2008 enacted	+35,000,000
Fiscal Year 2009 request	+155,000,000

The Office on Violence Against Women (OVW) coordinates legislative and other initiatives relating to violence against women and administers grant programs to help prevent, detect, and stop vio-

lence against women, including domestic and dating violence, sexual assault, and stalking.

The Committee recommends \$435,000,000 to support OVW grants and programs, which is \$35,000,000 above the fiscal year 2008 enacted level and \$155,000,000 above the request. This increase is made available to strengthen prevention and criminal justice enforcement efforts, and to provide services, such as housing and healthcare, to victims, including youth, Native American women and communities of color.

The Committee rejects the Administration's proposal to eliminate existing OVW formula and discretionary grant programs, and replace them with a single competitive grant program. The recommendation retains the basic OVW account structure used in previous fiscal years. The following table details funding recommended for OVW programs:

[In thousands of dollars]

Program	Recommended
STOP Grants	\$200,000
National Institute of Justice—R&D	(2,000)
Transitional Housing Assistance	(20,000)
Grants to Encourage Arrest Policies	60,000
Rural Domestic Violence Assistance Grants	41,000
Violence on College Campuses	10,000
Civil Legal Assistance	41,000
Sexual Assault Victims Services	15,000
Elder Abuse Grant Program	5,000
Safe Havens Project	15,000
Education & Training for Disabled Female Victims	7,000
CASA (Special Advocates)	15,000
Training for Judicial Personnel (child abuse)	3,000
Stalking Database	3,000
Court Training and Improvement	3,000
Services for Children/Youth Exposed to Violence	3,000
Advocates for Youth/Services for Youth Victims (STARY)	5,000
National Tribal Sex Offender Registry	1,000
Research on Violence Against Indian Women	1,000
Engaging Men and Youth in Prevention	3,000
Training Programs to Assist Probation and Parole Officers	3,000
National Resource Center on Workplace Responses	1,000
Total	435,000

Jessica Gonzales Victim Assistance Program.—The Committee recognizes the critical value of victim assistants who act as liaisons between local law enforcement agencies and victims of domestic and dating violence, sexual assault and stalking in order to improve the enforcement of protection orders. The placement of these special victim assistants is an eligible purpose for funding under the STOP Violence Against Women formula grant program, for which the Committee provides \$200,000,000 in fiscal year 2009.

Salaries and expenses.—The Committee has established a new salaries and expenses account to fund the management and administrative costs of OVW and other Justice Department grant programs. As a result, no administrative overhead costs shall be deducted from the programs funded from this account.

OFFICE OF JUSTICE PROGRAMS

The Office of Justice Programs (OJP) was established to provide Federal leadership, coordination, and assistance to make the Na-

tion's justice system more efficient and effective in preventing and controlling crime. OJP is responsible for administering grants; collecting statistical data and conducting analyses; identifying emerging criminal justice issues; developing and testing promising approaches to address these issues; evaluating program results, and disseminating these findings and other information to State and local governments.

The Committee recommends \$1,872,100,000 for the Office of Justice Programs, which is \$1,079,353,000 above the request and \$177,333,000 more than the current year enacted level. The Committee also rejects the Administration's proposal to eliminate existing OJP formula and discretionary grant programs and replace them with three competitive grant programs. The recommendation retains the basic OJP account structure used in previous years.

JUSTICE ASSISTANCE

Fiscal Year 2008 enacted	\$196,184,000
Fiscal Year 2009 request	134,647,000
Recommended in the bill	95,000,000
Bill compared with:	
Fiscal Year 2008 enacted	– 101,184,000
Fiscal Year 2009 request	– 39,647,000

The Justice Assistance account provides support to State and local law enforcement in the form of research, evaluation and statistics. The Committee recommends \$95,000,000, which is \$101,184,000 below the fiscal year 2008 enacted level and \$39,647,000 below the budget request.

The funds are to be distributed as follows:

National Institute of Justice	\$45,000,000
Bureau of Justice Statistics	50,000,000

Several programs previously funded under this account have been transferred to other OJP accounts, as well as the Community Oriented Policing Services account.

OJP budgetary and programmatic transparency.—The Committee is frustrated with the quality and timeliness of budget and programmatic information produced by the Office of Justice Programs. The OJP is directed to provide detailed personnel, contract and other cost information by program for Management and Administration and the oversight activities of the Office of Audit, Assessment, and Management (OAAM) in its fiscal year 2010 budget justifications.

Fairness and objectivity in the award of competitive grants.—The Committee is deeply concerned over allegations that the Department steered fiscal year 2007 juvenile justice grants to favored recipients instead of awarding them to deserving grantees who ranked more highly in a peer-reviewed process. The Committee expects the Department to expedite its internal review of the 2007 grants process and awards, and to report within 30 days of enactment of this Act to the House and Senate Committees on Appropriations on its findings and the corrective actions taken to ensure that all OJP competitive grants are awarded in a fair, competitive and peer-reviewed manner. The Committee also directs the Inspector General to review the 2007 grant award process and report expeditiously to the House and Senate Committees on Appropria-

tions. This matter is also addressed in the Juvenile Justice account.

Transparency in research decisions.—The Committee strongly supports research and other measures to establish and disseminate standards and best practices to improve the effectiveness of Federal crime-fighting grant programs. However, the Committee is concerned over the lack of transparency in the research funding decisions made by OJP, and directs the Department, within 60 days of enactment of this Act, to provide a detailed report and spend plan on all National Institute of Justice (NIJ) and Bureau of Justice Statistics (BJS) research activities for fiscal year 2009. The Committee also expects detailed justification information on the research priorities assumed in the fiscal year 2010 budget request.

National Institute of Justice.—The Committee includes \$45,000,000 in direct funding for the NIJ, which is the primary Federal source of research and development in the field of criminal justice. NIJ will receive additional funding under the Byrne Memorial Justice Assistance Grants program and the Violence Against Women Prevention and Prosecution programs, including research on violence against Indian women. The Committee is aware that the National Research Council has convened a committee to examine the NIJ research portfolio, and looks forward to the panel's recommendations to improve effectiveness.

National Crime Victimization Survey (NCVS).—Within funds provided for BJS, the Committee directs \$26,000,000 for the NCVS, which since the 1970s has been a critical resource to improve understanding of the costs and context of crime victimization in the United States. The Committee urges BJS to implement the recommendations of the National Research Council's recent report, *Surveying Victims: Options for Conducting the National Crime Victimization Survey*, to improve the usefulness of the NCVS. NIJ is also encouraged to implement the Council's recommendation to develop, promote and coordinate sub-national victimization surveys.

Pregnant and parenting offenders.—The Committee encourages NIJ to examine the potential of family-based treatment as an effective sentencing alternative for non-violent drug offenders, for drugs other than methamphetamine, who are pregnant or the parents of young children.

National Motor Vehicle Title Information System.—The Committee recognizes that the National Motor Vehicle Title Information System (NMVTIS) helps State and local law enforcement to deter trafficking in stolen vehicles by strengthening the ability of States to share motor vehicle title information. The Department is commended for its support through competitive grants to implement the NMVTIS system, and is encouraged to finalize its pending regulations. The Committee directs the Department to report, within 60 days of enactment of this Act, to the House and Senate Committees on Appropriations on the status of this program and its recommendations to achieve full implementation.

Salaries and expenses.—The Committee has established a new salaries and expenses account to fund the management and administrative costs of OJP and the other Justice Department grant programs. As a result, no administrative overhead costs shall be deducted from the programs funded from this account.

STATE AND LOCAL LAW ENFORCEMENT ASSISTANCE

Fiscal Year 2008 enacted ¹	\$908,136,000
Fiscal Year 2009 request	404,000,000
Recommended in the bill	1,277,000,000
Bill compared with:	
Fiscal Year 2008 enacted	+368,864,000
Fiscal Year 2009 request	+873,000,000

¹ Excludes \$100,000,000 in emergency funding.

The Committee recommends \$1,277,000,000 for State and Local Law Enforcement Assistance programs, which is \$368,864,000 over the fiscal year 2008 enacted level and \$873,000,000 over the request. As discussed under the Office of Justice Programs heading, the Committee rejects the Administration's proposal to eliminate existing OJP formula and discretionary grant programs and replace them with two competitive grant programs. The recommendation retains the basic OJP account structure used in previous years. Several programs previously funded under this account have been transferred to the OJP Juvenile Justice account and the Community Oriented Policing Services account.

The following table details funding recommended for state and local law enforcement assistance programs:

[In thousands of dollars]

Program	Recommended
Byrne Memorial Justice Assistance Grants	\$550,000
National Institute of Justice	(5,000)
State and Local Intelligence Training	(5,000)
Byrne Discretionary Grants	122,000
Byrne Competitive Grants	30,000
State Criminal Alien Assistance Program	420,000
Southwest Border Prosecutor Program	35,000
Victims of Trafficking Grants	10,000
State Prison Drug Treatment	10,000
Drug Courts	40,000
Prescription Drug Monitoring	7,000
Prison Rape Prevention and Prosecution	12,500
Capital Litigation	1,000
Missing Alzheimer's Patient Grants	1,500
Mentally Ill Offender Act	10,000
Victim Notification	10,000
Economic, High-tech and Cybercrime Prevention	18,000
Total	1,277,000

Edward Byrne Memorial Justice Assistance Grant Program.—The Committee recommends \$550,000,000 for formula grants under the Edward Byrne Memorial Justice Assistance Grant (JAG) program, which is authorized by the Violence Against Women and Department of Justice Reauthorization Act of 2005 (Public Law 109–162). The recommendation for JAG formula grants is \$379,567,000 above the fiscal year 2008 enacted level. The Administration proposed to eliminate this program.

Funding under this program is authorized for law enforcement programs; prosecution and court programs; prevention and education programs; corrections and community corrections programs; drug treatment and enforcement programs; planning, evaluation, and technology improvement programs; and crime victim and witness programs, other than compensation. Funding is not available for vehicles, vessels, or aircraft; luxury items; real estate; or con-

struction projects. The formula used for distributing funds under this program allocates 50 percent of funding based on population, and 50 percent based on violent crime rates. The formula allocates 60 percent of funding to States and 40 percent to units of local government.

Of the amount provided, \$5,000,000 is for intelligence training for State and local law enforcement entities; and \$5,000,000 is for the National Institute of Justice to help local units of government to identify, select, develop, modernize and purchase new technologies for use by law enforcement.

Byrne competitive grants.—\$30,000,000 is made available for Byrne competitive, peer-reviewed grants to programs of national significance to prevent crime, improve the administration of justice or assist victims of crime. Within 60 days of enactment of this Act, the OJP is directed to provide a report and spend plan to the House and Senate Committees on Appropriations, which details the criteria and methodology that will be used to award these grants. It is expected that national programs that have previously received funding under the Byrne discretionary program will be eligible to compete for funding under this competitive grant program, including programs for which specific amounts are designated in this Act.

Byrne discretionary grants.—The Committee recommends \$122,000,000 for Byrne discretionary grants to prevent crime, to improve the criminal justice system, to provide victims' services and for other similar activities. The accompanying table details funding for Congressionally-designated activities, which are incorporated by reference in the bill:

OJP - Byrne Discretionary Grants
 Congressionally-designated Items
 (\$ in thousands)

Recipient	Project	Location	Recommended Amount
A Hand Up Recovery Ex-Offender Home	A Hand Up Recovery Ex-Offender Program	Chicago, IL	150

State Criminal Alien Assistance Program (SCAAP).—The Committee recommends \$420,000,000 for reimbursement to States and localities for their costs for incarcerating criminal aliens. This program was once again proposed for elimination by the Administration.

Southwest border prosecutions.—The Committee recommends \$35,000,000 to provide assistance to State and local law enforcement agencies (including prosecutors, probation officers, courts, and detention facilities) along the southwest border with the handling and processing of drug and alien cases referred from Federal arrests. The recommendation is \$4,920,000 above the fiscal year 2008 level. The Administration made no request for this program.

Drug courts.—The Committee strongly supports drug courts, which serve a vital role in our Nation's justice system. The recommendation includes \$40,000,000 for this program, which is \$24,800,000 above the fiscal year 2008 enacted level. The Administration proposed to eliminate this program.

Mentally Ill Offender Act.—The Committee includes \$10,000,000 for grants to mental health courts and adult and juvenile collaboration program grants, as authorized by the Mentally Ill Offender Act of 2004. This amount is \$3,500,000 above the fiscal year 2008 enacted level. The Administration proposed to eliminate this program.

Hal Rogers Prescription Drug Monitoring Program.—The Committee includes \$7,000,000 for the Prescription Drug Monitoring Program to assist States in building or enhancing prescription drug monitoring systems, facilitating the exchange of information among States, and providing technical assistance and training on establishing and operating effective prescription drug monitoring programs. The Administration proposed to eliminate this program. The Committee expects OJP to work with the DEA to implement this program.

Prison rape prevention and prosecution.—The Committee provides \$12,500,000 for prison rape prevention and prosecution activities. The Committee understands that the National Prison Rape Elimination Commission will soon finalize recommended standards for the prevention of and response to sexual abuse in all confinement settings as part of its final report. The Attorney General is then required to promulgate such standards nationally. The recommendation includes \$12,500,000 for purposes authorized under Public Law 108–79, such as the work of the Commission; mandated statistics, data and research; prevention and prosecution assistance; and grants to protect inmates and safeguard communities. The Department shall report to the House and Senate Committees on Appropriations not later than 60 days after the enactment of this Act on the proposed distribution of funding among authorized activities under this program.

Victim notification.—The Committee includes \$10,000,000 to support the Statewide Automated Victim Information Notification (SAVIN) program, as authorized by the Justice for All Act, (Public Law 108–405). The SAVIN program helps protect the legal rights of crime victims by providing registered victims with timely and accurate information about any changes to the status of their offender, such as trial dates, times, or changes; probation hearings;

inmate relocation; and offender release. This program was previously funded under the Justice Assistance account.

Economic, high-tech and cybercrime prevention.—The Committee provides \$18,000,000 for competitive grants to support and train State and local law enforcement agencies in the prevention, investigation and prosecution of economic, high-tech and Internet crimes, which shall be administered by the Bureau of Justice Assistance. Within funds provided, up to \$3,000,000 is available for new competitive grants to State and local law enforcement entities to combat these crimes, including the intellectual property crimes of counterfeiting and piracy. None of the funds provided for this program shall be diverted for research. This program was previously funded under the Justice Assistance account.

Missing Alzheimer's Disease Patient Program.—The Committee directs that the \$1,500,000 provided for Missing Alzheimer's Disease Patient Program grants shall be awarded competitively and shall be administered by the Bureau of Justice Assistance.

Salaries and expenses.—The Committee has established a new salaries and expenses account to fund the management and administrative costs of OJP and the other Justice Department grant programs. As a result, no administrative overhead costs shall be deducted from the programs funded from this account.

JUVENILE JUSTICE PROGRAMS

Fiscal Year 2008 enacted	\$383,513,000
Fiscal Year 2009 request	185,000,000
Recommended in the bill	431,000,000
Bill compared with:	
Fiscal Year 2008 enacted	+47,487,000
Fiscal Year 2009 request	+246,000,000

The Office of Juvenile Justice and Delinquency Prevention (OJJDP) was established to provide Federal leadership, coordination, and resources to prevent and respond to juvenile delinquency and victimization. OJJDP is responsible for supporting States and communities in their efforts to develop and implement effective and coordinated prevention and intervention programs and to improve the juvenile justice system so that it protects public safety, holds offenders accountable, and provides treatment and rehabilitative services tailored to the needs of juveniles and their families.

The Committee recommends \$431,000,000 for Juvenile Justice Programs, which is \$47,487,000 above the fiscal year 2008 enacted level and \$246,000,000 above the request. The Committee rejects the Administration's proposal to eliminate existing OJJDP formula and discretionary grant programs, and replace them with a single competitive grant program. The recommendation retains the basic OJJDP account structure used in previous fiscal years. The accompanying table details funding recommended for these programs.

Fairness and objectivity in the award of competitive grants.—The Committee is deeply concerned about allegations that the Department steered fiscal year 2007 juvenile justice grants to favored recipients instead of awarding them to deserving grantees who ranked more highly in a peer-reviewed process. As noted previously, within 30 days of enactment of this Act, the Department is directed to provide a full accounting of the process used in 2007, as well as a report on corrective measures taken to ensure fairness and objectivity in the award of all future discretionary grants. The

Committee also directs the Inspector General to review the 2007 grant award process and report to the House and Senate Committees on Appropriations expeditiously.

The following table details funding recommended for juvenile justice programs:

[in thousands of dollars]

Program	Recommended
Part B—State Formula	\$75,000
Part E—Challenge Grants—Demonstration Projects	75,000
Youth Mentoring Grants	100,000
Title V—Incentive Grants	40,000
Tribal Youth	(25,000)
Gang Prevention	(15,000)
Victims of Child Abuse Programs	23,000
Juvenile Accountability Block Grants	55,000
Missing Children Program	63,000
Total	431,000

Part B—State formula grants.—The Committee provides \$75,000,000 for grants to implement comprehensive State juvenile justice plans, including community-based prevention and intervention programs and activities for juvenile offenders.

Part E—discretionary grants.—The Committee includes \$75,000,000 for Part E discretionary grants for activities related to juvenile justice and at-risk youth. The accompanying table details funding for Congressionally-designated activities, which are incorporated by reference in the bill.

Youth mentoring grants.—To support the critical work of national, regional and local organizations in nurturing and mentoring at risk children and youth, the Committee recommends \$100,000,000 for competitive, peer-reviewed youth mentoring grants. Within 60 days of enactment of this Act, OJP is directed to provide a report and spend plan to the House and Senate Committees on Appropriations, which details the criteria and methodology that will be used to award these grants. It is expected that national programs that have received funding under the Byrne discretionary program or the Juvenile Justice Part E program will be eligible for funding under this competitive grant program, including programs for which specific amounts are designated in this Act.

Missing children program.—The Committee includes \$63,000,000 to expand efforts to combat crimes against children, particularly kidnapping and sexual exploitation. This funding level is \$13,000,000 over the fiscal year 2008 enacted level. The Administration did not request funding for this program. This program was previously funded under the Justice Assistance account. Protecting children from predators requires the carefully coordinated efforts of Federal, State and local law enforcement agencies, as well as non-governmental organizations. OJP is strongly urged to work cooperatively with these entities in the implementation of new and enhanced initiatives, with particular focus on the areas of locating missing children and addressing the rising threat of child exploitation facilitated by the Internet. Within 60 days of enactment of this Act, the Department is directed to report to the House and Senate Committees on Appropriations on current activities and plans for developing and maintaining an effective national information-sharing system to combat child exploitation.

Title V—Incentive grants.—The Committee provides \$40,000,000 for community-based delinquency prevention grants. Within funds provided, \$25,000,000 is for tribal youth delinquency prevention programs, and \$15,000,000 is for gang prevention, education and training.

Victims of Child Abuse Act.—The Committee recommends \$23,000,000 for programs authorized under the Victims of Child Abuse Act (Public Law 101–647), including grants to provide technical assistance and training to improve the quality of criminal prosecution of cases of child abuse and neglect in State juvenile and family courts. This funding level represents an increase of \$6,080,000 over fiscal year 2008.

Juvenile accountability block grants.—The Committee provides \$55,000,000 for grants to support State and local government efforts to combat serious and violent juvenile crime. This funding level is \$3,300,000 above the amount provided in fiscal year 2008.

Mental health services for youth.—The Committee recognizes the value of improving the quality of mental health services for youth in the juvenile justice system, and encourages the Department to work with experts in this field to coordinate regional forums for this purpose.

Salaries and expenses.—The Committee has established a new salaries and expenses account to fund the management and administrative costs of OJP and the other Justice Department grant programs. As a result, no administrative overhead costs shall be deducted from the programs funded from this account.

PUBLIC SAFETY OFFICERS BENEFITS

Fiscal Year 2008 enacted	\$74,834,000
Fiscal Year 2009 request	69,100,000
Recommended in the bill	69,100,000
Bill compared with:	
Fiscal Year 2008 enacted	-5,734,000
Fiscal Year 2009 request	

The Public Safety Officers Benefits (PSOB) program provides benefits to public safety officers who are severely injured in the line of duty and to the families and survivors of public safety officers whose death was the direct and proximate result of an injury sustained in the line of duty.

The Committee includes \$69,100,000 for PSOB, which is \$5,734,000 over the fiscal year 2008 enacted level and equal to the request. Within funds provided, \$60,000,000 is made available for death benefits to survivors. This amount is estimated by the Congressional Budget Office, and is considered mandatory for scorekeeping purposes. The Committee also recommends \$9,100,000 for disability and education benefits to injured officers.

COMMUNITY ORIENTED POLICING SERVICES

Fiscal Year 2008 enacted	\$587,233,000
Fiscal Year 2009 request	
Recommended in the bill	627,000,000
Bill compared with:	
Fiscal Year 2008 enacted	+39,767,000
Fiscal Year 2009 request	+627,000,000

The Community Oriented Policing Services (COPS) Office was established to assist State and local law enforcement agencies through grants, training and technical assistance to prevent and combat crime in communities across the Nation. The Committee recommends \$627,000,000 for COPS programs, which is \$39,767,000 over the fiscal year 2008 enacted level. The Committee rejects the Administration's proposal to eliminate existing COPS programs and to merge the COPS Office into the Office of Justice Programs. The following table details funding recommended for COPS programs:

[In thousands of dollars]

Program	Recommended
COPS Hiring Program	\$40,000
COPS Technology and Interoperability	145,000
Violent Gang and Gun Crime Reduction	15,000
Meth Hot Spots	35,000
Bullet-Proof Vests	25,000
Tribal Law Enforcement	20,000
Indian Assistance	25,000
Tribal Prison Construction	(12,000)
Indian Tribal Courts	(8,000)
Indian Alcohol and Substance Abuse grants	(5,000)
National Instant Criminal Background Check System grants	15,000
Criminal Records Upgrade	10,000
DNA Backlog Reduction	153,000
Debbie Smith DNA Backlog grants	(150,000)
Post-Conviction DNA Testing grants	(3,000)
Second Chance Act/Offender Re-Entry	45,000
Sex Offender Management	10,000
National Sex Offender Registry	(1,000)
Secure Our Schools Act	20,000

[In thousands of dollars]

Program	Recommended
Regional Information Sharing	45,000
Wrongful Prosecution Review grants	5,000
Weed and Seed Program	15,000
Training and Technical Assistance	4,000
Total	627,000

COPS on the beat.—The Committee recommends \$40,000,000 to expand the COPS universal hiring program. These grants are available to State and local governments for the hiring and rehiring of additional career law enforcement officers for deployment in community-oriented policing across the nation.

Law enforcement technologies and interoperable communications.—The Committee includes \$145,000,000 for grants to State and local law enforcement to develop and acquire effective technologies and interoperable communications that assist in the prevention and response to crime. The COPS Office is directed to ensure that all equipment funded under this program meets the requirements of the National Institute of Standards and Technology Office of Law Enforcement Standards. The accompanying table details funding for Congressionally-designated activities, which are incorporated by reference in the bill:

COPS Law Enforcement Technology

Methamphetamine enforcement and clean-up.—The production, trafficking, and abuse of methamphetamine—an extremely destructive and addictive drug—continues to be a serious national problem. The Committee recommends \$35,000,000 for grants to address public safety and methamphetamine manufacturing, sale, and use in “hot spots,” including reimbursement of DEA for expenses related to the cleanup of methamphetamine labs. This amount is \$26,187,000 below the fiscal year 2008 enacted level. The Administration did not request funding for this program. Within funds provided, the Committee includes \$5,000,000 to reimburse the DEA for assistance to State and local law enforcement for proper removal and disposal of hazardous materials at clandestine methamphetamine labs, including funds for training, technical assistance, a container program, and purchase of equipment. The DEA acknowledges that prior year funding provided for this purpose is sufficient to fund these activities through the third quarter of fiscal year 2009. The accompanying table details funding for Congressionally-designated activities related to methamphetamine enforcement, which are incorporated by reference in the bill:

DNA backlog reduction.—The Committee recommends \$153,000,000 for grants to strengthen State and local government DNA collection and analysis systems, which can be vital to successfully prosecuting the guilty and protecting the innocent from wrongful prosecution. This funding level is \$728,000 above the fiscal year 2008 enacted level. The Administration did not make a DNA initiative request. Within funds provided \$150,000,000 is for Debbie Smith DNA backlog reduction grants, and \$3,000,000 is for post-conviction DNA testing grants.

Wrongful prosecution review grants.—The Committee commends the efforts of public and non-profit entities that work to exonerate people who have been wrongfully convicted of crimes. Within funds provided, \$5,000,000 is made available for a new program of competitive grants for such purposes.

Second Chance Act offender re-entry programs.—The Committee recommends \$45,000,000 to reduce criminal recidivism by providing grants to establish and expand offender re-entry programs, which is \$33,250,000 above the fiscal year 2008 enacted level. Within the funds provided, \$35,000,000 is made available for grants to State and local governments for adult and juvenile offender demonstration projects to coordinate re-entry efforts and establish best practices. Allowable uses of these funds include employment services, housing, substance abuse treatment, family programming, mentoring, and victim services. In addition, \$10,000,000 is provided for grants to nonprofit organizations for mentoring and transitional services to help offenders reintegrate into society. The Committee expects that the Department will continue to work in collaboration with the Departments of Labor, Health and Human Services, Housing and Urban Development, and Education in the implementation of offender re-entry programs.

NICS Improvement Amendments Act of 2007.—The Committee includes \$15,000,000 for grants to assist States and tribal governments in updating the National Instant Criminal Background Check System with the criminal history and mental health records of individuals who are precluded from purchasing or possessing guns.

Criminal history record upgrades.—In addition to the funds provided for NICS grants, the Committee includes \$10,000,000 for grants to ensure that accurate criminal history records are available for use in law enforcement. This program helps States build their infrastructure to connect to national record check systems both to supply information and to conduct the requisite checks.

Violent gangs and gun crimes.—The Committee recommends \$15,000,000 for competitive grants to State and local law enforcement to combat violent crime, with special emphasis on areas plagued by violent gangs.

Bulletproof vests.—The Committee provides \$25,000,000 to assist State and local law enforcement in purchasing bullet and stab resistant vests, which is \$850,000 over the fiscal year 2008 enacted level. The Administration did not request funding for this critical safety equipment for the Nation's law enforcement officers.

Tribal law enforcement, courts, detention facilities and substance abuse grants.—The Committee includes \$45,000,000 for tribal criminal justice efforts, which is \$7,520,000 over the fiscal year 2008 enacted level. Within this amount, \$20,000,000 is for hiring,

equipment and training for tribal law enforcement officers; \$12,000,000 is for tribal prison construction; \$8,000,000 is for tribal courts; and \$5,000,000 is for tribal grants to address alcohol and substance abuse. In another appropriations bill, the Committee also provides significant new investments for tribal law enforcement, prison infrastructure and victims' health services through the Bureau of Indian Affairs and the Indian Health Service.

Secure Our Schools Act.—The recommendation includes \$20,000,000 for grants for equipment such as metal detectors, locks, lighting and other deterrent measures; security assessments; security training of personnel and students; and coordination with local law enforcement, as authorized by the Secure Our Schools Act (Public Law 106–386).

Regional information sharing.—The Committee recommends \$45,000,000 for regional information sharing to ensure the efficient and effective automated exchange of crime and terrorism information among Federal, State, and local agencies. The recommendation is \$5,000,000 above the enacted level and \$10,800,000 above the request. The Committee places a priority on the careful integration of the regional information sharing network with the Law Enforcement On-Line (LEO) program. The Committee directs the Department to ensure that other interstate information sharing systems funded by OJP and COPS utilize existing communications infrastructure and are compatible with LEO and this program.

Salaries and expenses.—The Committee has established a new salaries and expenses account to fund the management and administrative costs of COPS and the other justice grant programs. As a result, no administrative overhead costs shall be deducted from the programs funded from this account.

SALARIES AND EXPENSES

Fiscal Year 2008 enacted
Fiscal Year 2009 request
Recommended in the bill	\$195,000,000
Bill compared with:	
Fiscal Year 2008 enacted	+195,000,000
Fiscal Year 2009 request	+195,000,000

To achieve greater transparency, efficiency and accountability in the management, administration and oversight of the Justice Department grant programs, the Committee recommends the establishment of a new salaries and expenses account within State and Local Law Enforcement Activities. A total of \$195,000,000 is provided for this purpose, of which not to exceed \$14,000,000 is for the Office on Violence Against Women (OVW); not to exceed \$130,000,000 is for the Office of Justice Programs (OJP); and not to exceed \$30,000,000 is for the Community Policing Services Office (COPS). In addition, not to exceed \$21,000,000 is made available for the Office of Audit, Assessment, and Management (OAAM) for grants management oversight. Within funds provided, OAAM is expected to develop its capacity to evaluate, in coordination with the National Institute of Justice, the effectiveness of programs and projects funded by OJP, OVW and the COPS Office, using rigorous research and evaluation methods which generate valid evidence on which crime and violence prevention strategies are most effective.

GENERAL PROVISIONS—DEPARTMENT OF JUSTICE

The Committee has included the following general provisions for the Department of Justice in this bill:

Section 201 makes available additional reception and representation funding for the Attorney General from the amounts provided in this title.

Section 202 prohibits the use of funds to pay for an abortion, except in the case of rape or to preserve the life of the mother.

Section 203 prohibits the use of funds to require any person to perform or facilitate the performance of an abortion.

Section 204 establishes the obligation of the Director of the Bureau of Prisons to provide escort services to inmates receiving an abortion outside of a Federal facility, except where this obligation conflicts with the preceding section.

Section 205 establishes the Committee's requirements and procedures for transfer proposals.

Section 206 authorizes the Attorney General to extend an ongoing Personnel Management Demonstration Project.

Section 207 extends specified authorities to the Bureau of Alcohol, Tobacco, Firearms and Explosives for undercover operations.

Section 208 prohibits the use of funds for transporting prisoners classified as maximum or high security, other than to a facility certified by the Bureau of Prisons as appropriately secure.

Section 209 prohibits the use of funds for the purchase or rental by Federal prisons of audiovisual equipment, services and materials used primarily for recreational purposes, except for those items and services needed for inmate training, religious or educational purposes.

Section 210 requires review by the Deputy Attorney General and the Department Investment Review Board prior to the obligation or expenditure of funds for major information technology projects.

Section 211 requires the Department to follow reprogramming procedures prior to any deviation from the program amounts specified in this title or the reuse of deobligated funds provided in previous years.

Section 212 prohibits the use of funds for A-76 competitions for work performed by employees of the Bureau of Prisons or Federal Prison Industries, Inc.

Section 213 prohibits the use of funds to pay the salary, benefits or expenses of a U.S. Attorney performing dual duties that exempt that U.S. Attorney from established residency requirements.

Section 214 prohibits the use of funds for future phases of the Sentinel program until the Attorney General certifies that work on existing phases has been substantially completed under a validated performance baseline.

Section 215 requires the Department of Justice in making grants under any discretionary grant program to conduct a peer review process and to strictly adhere to the rankings made.

TITLE III—SCIENCE

EXECUTIVE OFFICE OF THE PRESIDENT

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

Fiscal Year 2008 enacted	\$5,184,000
Fiscal Year 2009 request	5,303,000
Recommended in the bill	5,303,000
Bill compared with:	
Fiscal Year 2008 enacted	+119,000
Fiscal Year 2009 request	

The Office of Science and Technology Policy (OSTP) was created under the National Science and Technology Policy, Organization, and Priorities Act of 1976. OSTP advises the President on science and technology policies and coordinates research and development programs for the Federal government. The Committee recommendation includes \$5,303,000 for fiscal year 2009, the same level as the request and \$119,000 more than the fiscal year 2008 enacted level.

Plutonium production.—The Committee notes that neither NASA's nor the Department of Energy's (DOE) fiscal year 2009 budget request addresses the critical need for radioisotope material to carry out many of NASA's future science and exploration missions, leaving the United States reliant on DOE purchases of dwindling Russian stockpiles of this material. The failure to address this critical need places several future NASA missions, costing several billions of dollars, at great risk, and leaves the United States reliant on Russia to produce such radioisotope material. It should not be the policy of the United States to encourage Russia to continue to produce such radioisotope material, which, without proper oversight and control, may be used for purposes than otherwise intended. The Committee understands that it is within the charter of the DOE to maintain the U.S. capability and infrastructure to develop and furnish nuclear power systems for all U.S. Government space systems, while it is the responsibility of the customer agencies, such as NASA, to pay for the marginal costs for the production of such radioisotope material for the agency-specific space missions. The Committee believes that the U.S. Government must urgently address this critical need. Thus, the Committee directs the Director of OSTP, working with NASA and DOE, to develop a plan for restarting and sustaining U.S. domestic production of radioisotope thermoelectric generator material for NASA's future science and exploration missions. This plan shall be transmitted by OSTP to the House and Senate Appropriations Subcommittees on Commerce, Justice and Science, and Energy and Water, along with a requisite funding request for DOE restart of production, and for NASA for marginal costs of production, with the President's budget request for fiscal year 2010.

Commercial purchase of weather, environmental and space weather data.—The Committee is concerned that next-generation satellite programs—specifically, the geostationary operational environmental satellite R-series (GOES-R) and the national polar-orbiting environmental satellite system (NPOESS)—are projected to claim an increasingly disproportionate share on NOAA's total discretionary budget. Options for reducing satellite costs are limited

and NOAA is under intense pressure from the weather and climate communities to start new initiatives that will increase space-related costs even more. Therefore, the Committee directs OSTP, working with NASA and NOAA, to develop a plan and program to encourage commercial solutions to meet space-based Earth and space weather observation requirements of the United States Government, similar to the Federal investments in NASA's commercial orbital transportation services program. Such report shall consider the efficacy of providing appropriated funds to commercial entities to pursue low-cost atmospheric, environmental or space weather monitoring systems, and whether such funding should be offered to commercial entities in exchange for later concessionary rates on weather, climate or space weather data purchasers from successful vendors. The report shall be delivered to the House and Senate Committees on Appropriations not later than February 1, 2009.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

The National Aeronautics and Space Administration (NASA) was established by the National Aeronautics and Space Act of 1958, as amended, to conduct space and aeronautical research, development, and flight activities for peaceful purposes to benefit all mankind. The Act calls on NASA to expand human knowledge; develop and operate advanced aeronautical and space-faring vehicles; encourage commercial use of space; exchange with other U.S. agencies findings useful to each other to maximize research results; cooperate with other nations in research and applications; and preserve U.S. preeminence in aeronautics and space. NASA's unique mission is to pioneer the future in space exploration, scientific discovery and aeronautics research.

Investments in NASA.—Properly structured, NASA's programs can contribute to an improved quality of life, economic vitality, U.S. leadership in peaceful cooperation with other nations on challenging undertakings in science and technology, national security and the advancement of knowledge. Investments in NASA's programs promote research and development and support the competitiveness of the United States. For 50 years, the investments in NASA have facilitated the transfer of NASA technology to the private sector, benefiting global competition and the economy. The resulting commercialization has contributed to the development of commercial products and services in the fields of health and medicine, industry, consumer goods, transportation, public safety, computer technology, and environmental resources. In addition, NASA's view from space brings science to bear on national priorities like improved predictions of climate, weather and natural hazards, which have corresponding implications for commerce and the human condition.

AGENCY SUMMARY

The Committee recommendation includes \$17,768,967,000 for NASA, \$154,767,000 above the request and \$459,567,000 above the fiscal year 2008 enacted level. Funding included in this Act provides for continued efforts to fly the Shuttle as safely as possible until its retirement in 2010; to complete the international space station; continue the lunar return program having the maximum

possible utility for later missions to Mars and other destinations; to advance knowledge in the fundamental disciplines of aeronautics and develop technologies for safer aircraft and higher capacity air systems; to further understanding of the Earth, its climate, its connections among the other planets and stars, and the origin and evolution of planetary systems and the origin and distribution of life in the universe; and to inspire and educate students at all levels to pursue careers in the fields of science, technology, engineering and mathematics.

Pursuant to direction contained in the Fiscal Year 2008 Consolidated Appropriations Act, NASA's appropriations are now requested in seven appropriations accounts rather than in three accounts as in previous years. Thus, the fiscal year 2009 budgets for NASA's programs and projects are requested only in terms of direct cost, and not the additional indirect costs associated with operating NASA's centers, safety and mission success, and Agency management and operations. The direct budgets continue to reflect labor and travel costs associated with each program and project. The indirect costs are now budgeted solely within the Cross-Agency Support account, and not in NASA's programs and projects. The Committee will continue to work with NASA to ensure that these changes—the result of Congressional direction—and other directives included herein provide greater transparency to NASA's stakeholders and improve program costs, review and oversight.

Reporting of cost, schedule and content for NASA research and development projects.—In fiscal year 2008, nearly 70 percent of NASA's major projects in development (or 8 of 12 projects in the implementation phase) are in breach of the project's development cost and/or schedule thresholds. To better understand the underlying issues common to NASA's performance on major projects and to develop a process for identifying corrective action, the Fiscal Year 2008 Consolidated Appropriations Act mandated the Government Accountability Office to report on the status of large-scale NASA programs, projects and activities. The Committee expects this report to be delivered to the Congress semiannually, the first of which shall be delivered in advance of the annual budget submission of the President for fiscal year 2010. To that end, the Committee directs NASA to cooperate fully and to provide timely program analysis, evaluation data and relevant information to the GAO so that it can conduct this review and meet the annual Congressional mandate. Such information includes, but is not limited to, copies of preliminary cost estimates, access to relevant online agency applications, databases, and web portals, and access to information from contractor and agency personnel.

Breach reporting.—Pursuant to section 108 of Public Law 109–155, the NASA Authorization Act of 2005, NASA is required to deliver several reports to the appropriate authorizing committees when project costs grow in excess of certain thresholds. The Committee asks that NASA submit concurrently to the House and Senate Committees on Appropriations the reports required by section 108 of Public Law 109–155.

Space Shuttle transition and retirement costs.—The Committee notes that yet again the budget does not include the full and detailed costs associated with transitioning Space Shuttle assets and facilities to the next generation of human space flight systems.

While NASA asserts that it has a strategic approach in place to carry out the complex transition safely and effectively, NASA has been unable or unwilling to produce detailed fiscal estimates of the total and annual costs associated with Shuttle transition and retirement by fiscal year, mission directorate, activity and object class. According to NASA officials, the Agency's estimates of the full content and cost for Space Shuttle transition and retirement, including transition of assets and facilities, will be reflected for the first time in NASA's fiscal year 2010 budget submission to Congress. These assurances have been made for each of the last several years. The Committee understands that the bulk of transition and retirement funding will be included in the Space Shuttle program portion of NASA's budget request. However, based on GAO briefings, the Committee expects that the broad scope of transition and retirement activities will involve many actors across NASA, both intrinsic to and external of the Space Shuttle program. To ensure the Committee has a complete accounting of the full costs associated with Space Shuttle transition and retirement, the Committee directs NASA to include in its estimate:

- (1) not only those funds necessary within the Space Shuttle program, but all funds needed outside the Space Shuttle program that are necessary to support Space Shuttle transition and retirement activities;
- (2) funds necessary under Cross-Agency Support needed to support transition and retirement, including environmental compliance and remediation, of the Space Shuttle program;
- (3) the gross and net proceeds from exchange sales of excess Space Shuttle equipment;
- (4) the costs to maintain required facilities at Kennedy Space Center during the gap in human spaceflight;
- (5) the costs associated with preservation of historic properties; and
- (6) the costs of workforce transition.

Accordingly, the Committee recommendation includes a provision that requires NASA to provide by November 1, 2008, to the Committees on Appropriations of the Senate and the House of Representatives a report detailing the total and annual costs by fiscal year of Space Shuttle transition and retirement costs. Such data shall be presented for fiscal years 2006 through 2015 by mission directorate, program, activity and object class.

Reprogramming procedures.—As noted earlier in this report, the Committee continues to have a particular interest in being fully informed of reprogrammings which, although they may not change either the total amount available in an account or the general purposes for which the funds are available, represent a departure from the explicit budget plans presented within the annual congressional justifications and approved or modified by the House and Senate Committee on Appropriations through the annual appropriations process. The Committee is concerned that movements of funds above the de minimis levels specified in section 505 of this Act may be occurring without Congressional notification. That section requires notification to the House and Senate Committees on Appropriations of deviations from the budgeted and appropriated levels specified for all programs, projects and activities. To clarify the level at which reprogramming actions are to be measured, the

Committee has chosen to include by mission directorate a summary table delineating each program, project and activity against which the reprogramming thresholds are to be measured. This display in no way curtails NASA's current flexibility in managing its diverse portfolio of research and development and operational programs. Rather, it will require NASA to inform the Committee on any deviations, subject to the thresholds specified in section 505 of this Act, from the levels explicit in the agency's budget justification, as adjusted for congressional action, as shown in the accompanying summary table. The Committee's recommendation for NASA is delineated more fully in the table below and in the account summaries.

SCIENCE

Fiscal Year 2008 enacted	(1)
Fiscal Year 2009 request	\$4,441,519,000
Recommended in the bill	4,518,019,000
Bill compared with:	
Fiscal Year 2008 enacted	(1)
Fiscal Year 2009 request	+76,500,000

¹The FY 2008 Omnibus Appropriations Act directed NASA to modify the agency's FY 2009 appropriations account structure from three accounts (Science, Aeronautics and Exploration; Exploration Capabilities and Inspector General) to seven accounts. For comparability purposes, \$4,706,178,000 was allocated for such activities in fiscal year 2008.

This appropriation provides for the full costs associated with the science activities of the agency, which consist of the programs, or themes, within the Science Mission Directorate. The full costs include all labor, travel, procurement, test and fabrication costs to execute these programs, which provide for all of the research; development; operations; salaries and related expenses; design, repair, rehabilitation, modification of facilities, and construction of new facilities; and other general and administrative activities supporting the themes within this account. NASA's Science Mission Directorate encompasses four themes: Earth Science, Planetary Science, Heliophysics, and Astrophysics. The Directorate seeks to answer fundamental questions concerning the ways in which Earth's climate is changing; the comparison of Earth with other planets in the solar system and around other stars; the connections among the Sun, Earth, and heliosphere; and the origin and evolution of planetary systems, the galaxy, and the universe, including the origin and distribution of life in the universe. The Directorate achieves its objectives through robotic flight missions, ground-based scientific research and data analysis, and the development of new technologies for future missions.

For fiscal year 2009, the Committee recommends \$4,518,019,000, an increase of \$76,500,000 over the budget request. The recommendation makes the following adjustments to the budget request:

Glory mission	+\$17,000,000
Landsat data continuity mission	+20,000,000
Decadal survey missions	+50,000,000
Orbiting carbon observatory	- 2,200,000
Aquarius	- 4,700,000
Mars exploration: Mars science laboratory	+76,669,000
Hubble space telescope	+7,000,000
James Webb space telescope	+23,000,000
Astrophysics exoplanet exploration: other missions and data analysis	+30,000,000
Radiation belt storm probes	+10,000,000
Solar Probe	+18,000,000
Magnetospheric multiscale	+13,000,000
Unallocated adjustment reflecting carryover	-181,269,000

Project cost increases.—The Committee is aware that the Glory mission, the Mars Science Laboratory and the Hubble space telescope are experiencing costs growths in fiscal years 2008 and 2009, and that the James Webb space telescope requires additional resources to cover its reserves. Accordingly, the Committee includes additional resources of \$17,000,000 for the Glory mission; \$76,669,000 for the Mars Science Laboratory; and \$23,000,000 for the James Webb space telescope for fiscal year 2009. To accommodate these cost requirements in fiscal year 2009, the Committee

recommends offsetting unspecified reductions in the science portfolio totaling \$181,269,000, recognizing NASA's plans to carry-over from fiscal year 2008 sufficient unobligated balances to cover these cost requirements. The Committee directs NASA in its initial operating plan for fiscal year 2009 to identify only funding sources that do not result in the delay or cancellation of missions in development or the cancellation of any selected projects, and shall not identify any increases above the request expressly provided by Congress.

Other adjustments.—Adjustments to the budget request for the orbiting carbon observatory (OCO), Aquarius, radiation belt storm probes and magnetospheric multiscale reflect anticipated adjustments NASA intends to make in its initial fiscal year 2009 operating plan.

Landsat data continuity mission.—An additional \$20,000,000 is provided to initiate development of a thermal infra-red sensor (TIRS) to ensure data continuity for critical measurements made by this Landsat sensor for scientific research and water management applications. NASA is directed to identify the earliest and least expensive development approach and flight opportunity for the TIRS, either through accommodation on the Landsat data continuing mission or through an alternative platform, and submit a report to the House and Senate Committees on Appropriations.

Decadal survey missions.—The National Academy of Sciences released the inaugural Earth Science and Applications Decadal Survey in 2007. This report recommends 15 new space missions for NASA to undertake in the decade from 2010 to 2020, in three phases. The Fiscal Year 2008 Consolidated Appropriations Act provided \$33,000,000 to initiate these missions. The fiscal year 2009 budget request provides \$103,202,000 and a total of \$910,000,000 to conduct five missions through the period 2013. NASA has announced plans to initiate two missions: SMAP to be launched in 2010 and ICESat II for 2015. The overall Earth Science Decadal Mission plan, assuming the funds projected to be available, will only accomplish one-third of the recommended missions during the period stated by the National Academy of Sciences. The Global Climate Observing System science community has identified 26 essential climate variables that should be measured simultaneously and on a sustained basis. The budget profile for developing Earth science missions cannot meet the need for developing and demonstrating space-based climate measurements. Accordingly, the Committee recommends an additional \$50,000,000 to accelerate and achieve a level of system development more consistent with the National Academy of Sciences' recommendations.

Mars exploration.—The Committee commends NASA for its robotic Mars exploration program, but does not agree with the NASA's fiscal year 2009 budget request, which drastically reduces one of the Agency's most successful programs. The recent landing of the Phoenix spacecraft on Mars demonstrates that the United States is the undisputed leader in Mars exploration, and this program must be maintained at a level to continue U.S. leadership and major accomplishments. This program also plays a key role in training a new generation of engineers and scientists through its continuing major scientific discoveries and public engagement. The Committee continues to support a robust Mars exploration program

with a rate of at least one mission at every opportunity (every 26 months, except 2011). Full funding is provided to continue operating current missions (Odyssey, Mars Reconnaissance Orbiter, Spirit and Opportunity and now Phoenix), complete the Mars Science Lab (MSL) for launch in 2009, and Scout in 2013. Additional funds are provided above the request to cover fiscal year 2009 costs of the MSL overruns and to ensure integrity of the 2009 launch date. MSL is critical to setting the scientific focus for the next decade's mission portfolio, especially a future Mars sample return mission, by proving critical technologies such as high-mass landing and sample handling systems, and in the reconstitution of the Mars program.

The Committee applauds NASA's recent engagement of the Mars community to define missions for the next decade that will lead to a Mars sample return early in the 2020s. This proactive approach has been successful in the past and should be continued. Consistent with NASA's science strategy, NASA should redefine out-year budget profiles for the Mars exploration program to begin definition and technology investments for the next decade, to support a lander mission for launch in 2016, and follow-on missions for launch in 2018 and 2020, to support operating missions, and to plan for development of a sample return mission in the 2020 decade. NASA should consider augmenting technology to be demonstrated as part of the 2013 Scout. Special emphasis should also be placed on technology that maintains landing systems capabilities that are applicable for a Mars Sample Return Mission. Finally, the Committee recognizes the importance of small, competitively selected missions such as Mars Scout, and recommends that NASA include additional Mars Scout missions beyond 2013.

Outer planets.—The Committee remains supportive of NASA's plans to conduct an outer planet flagship mission in cooperation with the European community with a launch as soon as practicable. The Committee looks forward to a more detailed plan and projected launch date as part of the fiscal year 2010 budget.

Astrophysics exoplanet exploration, other missions and data analysis.—The Committee commends NASA for starting a budget line for exoplanet missions, as exploring neighboring planetary systems is of high scientific and public interest. The Committee understands that NASA is assessing lower cost versions of the Space Interferometry Mission (SIM) and continues to complete the detailed formulation phase (including cost and implementation plan) of a "SIM-Lite" mission that would meet the requirements laid out in the two most recent decadal surveys for an astrophysics mission. The study of a number of Earth-like exoplanet detection techniques will be guided by the Astronomy and Astrophysics Advisory committee report. To continue these efforts, the Committee recommends provides an increase of \$30,000,000 over the budget request.

Solar Probe.—Solar Probe is a critical component of NASA's Living with a Star program, which seeks to study and better understand the effects of the Sun on the Earth, for which the Committee provides \$18,000,000 in fiscal year 2009.

Ocean vector wind study.—Within the funds appropriated, NASA shall, working with NOAA, undertake a study to evaluate satellite

and non-satellite alternatives for generating SeaWinds-like ocean wind data.

AERONAUTICS

Fiscal Year 2008 enacted	(1)
Fiscal Year 2009 request	\$446,500,000
Recommended in the bill	515,000,000
Bill compared with:	
Fiscal Year 2008 enacted	(1)
Fiscal Year 2009 request	+68,500,000

¹The FY 2008 Omnibus Appropriations Act directed NASA to modify the agency's FY 2009 appropriations account structure from three accounts (Science, Aeronautics and Exploration; Exploration Capabilities and Inspector General) to seven accounts. For comparability purposes, \$511,706,000 was allocated for such activities in fiscal year 2008.

This appropriation provides for the full costs associated with the aeronautics activities of the agency, which consist of the programs, or themes, within the Aeronautics Mission Directorate. The full costs include all labor, travel, procurement, test and fabrication costs to execute these programs, which provide for all of the research; development; operations; salaries and related expenses; design, repair, rehabilitation, modification of facilities, and construction of new facilities; and other general and administrative activities supporting the themes within this account. NASA's Aeronautics Research Mission Directorate is committed to expanding the boundaries of aeronautical knowledge for the benefit of the Nation and the broad aeronautics community. NASA conducts cutting-edge research that includes foundational research across a number of core competencies that support aeronautics and space exploration activities; research in key areas related to the development of advanced aircraft technologies and systems, including those related to aircraft safety, environmental compatibility, and fuel efficiency; and research that supports the Next Generation Air Transportation System in partnership with the Joint Planning and Development Office.

The report of the President's Commission on the Future of the United States Aerospace Industry and the recent National Research Council Assessment of NASA's aeronautics technology programs conclude that robust investments are critical to maintain the United States' leadership in aeronautics. The level proposed by the Administration for aeronautics research will ensure that the United States will not remain a world leader in aeronautical science and technology for either civil or military applications. While competition from abroad expands, the reductions in Federal investments proposed in the budget request cannot be sustained. Accordingly, the Committee recommends a total of \$515,000,000, an increase of \$68,500,000 over the budget request and \$3,294,000 over the comparable fiscal year 2008 enacted level.

The bill provides \$68,500,000 over the budget request specifically for additional investments in research and development to plan for and implement the Next Generation Air Transportation System (NextGen) and to further research and development in "green" aircraft. The congressional augmentation is to be expended to support multi-year NextGen investments, engage stakeholders and to develop a more diversified portfolio in terms of the stage of technology developed; research and development activities to be funded by this augmentation shall not be selected solely based on one year's funding availability. The Committee fully expects that these

investments shall serve as “seed money” upon which subsequent funding requirements and requests are based. The Committee directs the Aeronautics Research Mission Directorate to provide to the Committees on Appropriations of the House and Senate in NASA’s initial fiscal year 2009 operating plan a proposed expenditure analysis of the congressional augmentation to ensure that this investment of funds is devoted to long-term, multi-year research and development activities to support NextGen technology needs and solutions and “green” aircraft. Additional investments in multi-year activities are to be distributed as follows:

Aviation safety	+\$8,000,000
Airspace systems	+30,000,000
Fundamental aeronautics: subsonic fixed wing	+26,500,000
Aeronautics test program	+4,000,000

EXPLORATION

Fiscal Year 2008 enacted	(1)
Fiscal Year 2009 request	\$3,500,469,000
Recommended in the bill	3,505,686,000
Bill compared with:	
Fiscal Year 2008 enacted	(1)
Fiscal Year 2009 request	+5,217,000

¹ The FY 2008 Omnibus Appropriations Act directed NASA to modify the agency’s FY 2009 appropriations account structure from three accounts (Science, Aeronautics and Exploration; Exploration Capabilities and Inspector General) to seven accounts. For comparability purposes, \$3,143,083,000 was allocated for such activities in fiscal year 2008.

This appropriation provides for the full costs associated with the exploration activities of the agency, which consist of the programs, or themes, within the Exploration Mission Directorate. The full costs include all labor, travel, procurement, test and fabrication costs to execute these programs, which provide for all of the research; development; operations; salaries and related expenses; design, repair, rehabilitation, modification of facilities, and construction of new facilities; and other general and administrative activities supporting the themes within this account. The Exploration Systems Mission Directorate was established to realize the Vision for Space Exploration. Exploration Systems includes two themes that work together to enable sustainable exploration and scientific discovery in the solar system: Constellation Systems and Advanced Capabilities.

Through Constellation Systems, NASA will develop, demonstrate, and deploy the transportation, life support, and surface systems that will enable sustained human and robotic exploration of the Moon, Mars, and beyond. Human exploration will enable scientific activities and discoveries not obtainable with robotic explorers. Initial capabilities include the Orion crew exploration vehicle that will transport and support crews traveling beyond low Earth orbit, and the Ares I launch vehicle for transporting Orion into space. Following the development of these initial capabilities, Constellation Systems will develop capabilities to support a human mission to the lunar surface by 2020. These capabilities include the Ares V heavylift launch vehicle, leveraging engineering design and capabilities from the Shuttle program; an Earth departure stage to propel Orion from low Earth to lunar orbit; a lunar surface access module to safely transport astronauts to and from the lunar surface; and systems, capabilities, and support for extended human stays on the lunar surface. Future development will provide crew,

cargo transportation, and destination support capabilities required for human exploration of Mars and beyond.

The Advanced Capabilities theme consists of three programs: the lunar precursor robotic program, the exploration technology development program, and the human research program. Activities within these programs help prepare for human lunar exploration, test new technologies that enable exploration, and further understanding of the effects of space on human performance. The lunar precursor robotic program is developing a precursor mission to characterize the lunar environment. The lunar reconnaissance orbiter and lunar crater observing and sensing satellite, scheduled to launch in October 2008, will seek to find safe landing sites, locate potential resources, characterize the radiation environment, and demonstrate new technology. The lunar precursor robotic program will work with the Science Mission Directorate and international partners on future missions to ensure that NASA gains the data it needs for safe and cost-effective future exploration.

For fiscal year 2009, the Committee recommendation includes \$3,505,686,000, an increase of \$5,217,000 over the budget request, and \$362,603,000 over comparable fiscal year 2008 enacted levels.

International Space Station (ISS) research.—The Committee provides an increase of \$25,217,000 over the budget request for ISS research, for a total of \$50,000,000 in fiscal year 2009. These funds support the study of life and physical sciences phenomenon in microgravity, as well as in the partial gravity environments of the Moon and Mars.

Commercial orbital transportation services.—NASA's commercial orbital transportation services (COTS) projects are intended to facilitate U.S. private industry's development of cargo and crew space transportation capabilities with the goal of demonstrating reliable, cost-effective access to low Earth orbit. The COTS program for both cargo and crew missions seeks to enable NASA to operate affordably and utilize fully the International Space Station for science and engineering research once the Space Shuttle has retired, using a range of new commercial cargo and crew service transportation capabilities and creating a marketplace for commercial cargo and crew services that may change the economics of space activities for public and private benefit.

For fiscal year 2009, the Committee provides a total of \$153,045,000 for the COTS program, a reduction of \$20,000,000 from the request. The recommended reduction is taken without prejudice to the program, and is based on NASA's estimated expenditures for fiscal year 2009 while accounting for program management costs and anticipated payments to industry partners who successfully meet milestones in current Space Act agreements. The Committee continues to support the COTS program as a critical element in achieving NASA's vision for space exploration. The funding provided in should enable NASA to shorten the projected five-year gap in the U.S. cargo carriage capabilities (between Shuttle retirement and functionality of the new crew exploration vehicle) and, thereby, minimize dependence on the Russian Progress or other non-U.S. launch vehicles and spacecraft.

SPACE OPERATIONS

Fiscal Year 2008 enacted	(1)
Fiscal Year 2009 request	\$5,774,710,000
Recommended in the bill	5,764,710,000
Bill compared with:	
Fiscal Year 2008 enacted	(1)
Fiscal Year 2009 request	– 10,000,000

¹The FY 2008 Omnibus Appropriations Act directed NASA to modify the agency's FY 2009 appropriations account structure from three accounts (Science, Aeronautics and Exploration; Exploration Capabilities and Inspector General) to seven accounts. For comparability purposes, \$5,526,157,000 was allocated for such activities in fiscal year 2008.

This appropriation provides for the full costs associated with the space operations activities of the agency, which consist of the programs, or themes, within the Space Operations Mission Directorate. The full costs include all labor, travel, procurement, test and fabrication costs to execute these programs, which provide for all of the research; development; operations; salaries and related expenses; design, repair, rehabilitation, modification of facilities, and construction of new facilities; and other general and administrative activities supporting the themes within this account. Funding in this account is provided for the International Space Station and related activities, and the Space Shuttle program. The Shuttle program will support the Space Operations and Exploration Systems Mission Directorates to leverage select Shuttle flight hardware and ground systems to advance the development of the Orion crew exploration vehicle, the Ares I crew launch vehicle, and the Ares V heavy lift launch vehicle. In fiscal year 2009, funding for the agency's space communications and navigation infrastructure will be consolidated within the Space Operations' Office of Space Communications and Navigation to transition to a unified mission support architecture to better serve Exploration requirements. For fiscal year 2009, the Committee recommendation includes \$5,764,710,000, a decrease of \$10,000,000 below the request and \$238,553,000 over comparable fiscal year 2008 enacted levels. The bill includes provisions providing specific amounts for Space Shuttle, International Space Station and Space and Flight support activities.

Shuttle logistics flights.—In the wake of the Space Shuttle *Columbia* accident, the Committee appreciates NASA's desire to restrict the number of Space Shuttle missions to only those necessary to complete assembly of the International Space Station and a final servicing mission of the Hubble Space Telescope. The first priority for Space Shuttle flights is to support a robust and viable International Space Station to fulfill our Nation's commitments to our international partners and justify our Nation's sizable investment in this research facility. Thus, funding is provided within the Space Shuttle program to plan and carry out, as part of the Space Shuttle's baseline manifest, the two logistics missions (ULF-4 and ULF-5) that NASA has planned and funded, provided these missions can be flown before 2011 and the NASA Administrator certifies to the Congress prior to each of these missions being carried out that those missions are necessary and can be safely conducted.

The appropriate authorizing committees of the House and Senate have viewed the inclusion of a hard retirement date of the Space Shuttle as a potential problem, and the House's NASA reauthorization bill, requires the Space Shuttle be retired following completion of the flight manifest, including the missions directed by Congress.

The Committee concurs with this position and, tfore, anticipates that NASA shall retire the Space Shuttle after completion of the flight manifest.

Alpha magnetic spectrometer (AMS).—NASA shall not take any action prior to 18 months preceding the anticipated retirement of the Space Shuttle in 2010 that would otherwise preclude the delivery of the AMS to the International Space Station.

Launch services.—The Committee has provided a total of \$89,558,000 for launch services, \$10,000,000 less than the budget request. The Committee has deferred funding specifically requested to mitigate the out-year costs of launch infrastructure and repairs as NASA has indicated to the Committee that it has not made a final determination of the allocation or phasing of the use of these funds. Once identified, should NASA determine that the cost-benefit of proceeding with these activities is of high-priority, the Committee will consider a reprogramming within the funds provided for this account or from within the Cross-Agency Support account for the construction of facilities.

EDUCATION

Fiscal Year 2008 enacted	(1)
Fiscal Year 2009 request	\$115,600,000
Recommended in the bill	187,200,000
Bill compared with:	
Fiscal Year 2008 enacted	(1)
Fiscal Year 2009 request	+71,600,000

¹The FY 2008 Omnibus Appropriations Act directed NASA to modify the agency's FY 2009 appropriations account structure from three accounts (Science, Aeronautics and Exploration; Exploration Capabilities and Inspector General) to seven accounts. For comparability purposes, \$146,776,000 was allocated for such activities in fiscal year 2008.

This appropriation provides for the full costs associated with the education activities of the agency, which consist of the programs, or themes, within the Education Mission Directorate. The full costs include all labor, travel, and procurement costs to execute these programs, which provide for all general and administrative activities supporting this mission. NASA's Education program works to inspire and educate students at all levels to pursue careers in the fields of science, technology, engineering, and mathematics, while also engaging the education community to reach this goal. The Education portfolio demonstrates a commitment to science, technology, engineering and mathematics education to ensure that the next generation of explorers and innovators is fully prepared to join NASA's workforce while contributing to national needs. NASA's objectives are to (1) provide elementary and secondary students and teachers with NASA-related education opportunities; (2) support higher education research capability and opportunities that attract and prepare students and faculty for NASA-related careers; (3) provide students, teachers, faculty and researchers from underrepresented and underserved communities with opportunities in NASA-related science and technology fields; (4) and increase student, teacher and public access to NASA education resources by developing and deploying innovative technology applications platforms. NASA engages the public in shaping and sharing the experience of exploration and discovery by improving public understanding of science and technology, including NASA aerospace technology, research and exploration missions.

The Committee rejects the Administration's proposal to cut NASA's education programs from comparable fiscal year 2008 enacted levels. The 2005 National Academies' report, *Rising Above the Gathering Storm* noted that the scientific and technological building blocks of the United States' economic leadership are eroding at a time when other nations are gathering strength. The necessary key identified in the report is to improve America's talent pool by vastly improving Kindergarten through twelfth grade science and mathematics education. In addition, a recent congressionally-mandated task force found that by the end of this year, over one-quarter of the U.S. aerospace workforce will be eligible to retire, with too few engineers graduating from college to replace them. A continuing dearth of students and graduates in math, science and engineering cannot be sustained. Short-term cuts in education programs have long-term effects. Accordingly, for fiscal year 2009, the Committee recommends \$187,200,000, an increase of \$71,600,000 over the budget request. Funds provided in this appropriation are to be allocated as follows:

Elementary and secondary education	\$24,000,000
Competitive educational grant program	25,000,000
E-Education	6,000,000
MUREP	28,200,000
Higher education	14,000,000
EPSCoR	24,000,000
National Space Grant College and Fellowship program	40,000,000
Global climate change education	13,000,000
Science museums and planetarium grants	13,000,000

National Space Grant College and Fellowship program.—For this program, the Committee provides a total of \$40,000,000, which will fund 40 states or jurisdictions at \$815,000 each and 12 states or jurisdictions at \$615,000 each.

CROSS-AGENCY SUPPORT PROGRAMS

Fiscal Year 2008 enacted	(1)
Fiscal Year 2009 request	\$3,299,902,000
Recommended in the bill	3,244,752,000
Bill compared with:	
Fiscal Year 2008 enacted	(1)
Fiscal Year 2009 request	– 55,150,000

¹ The FY 2008 Omnibus Appropriations Act directed NASA to modify the agency's FY 2009 appropriations account structure from three accounts (Science, Aeronautics and Exploration; Exploration Capabilities and Inspector General) to seven accounts. For comparability purposes, \$3,242,900,000 was allocated for such activities in fiscal year 2008.

This appropriation provides for the agency supporting functions associated with the science, aeronautics, education, space operations and exploration activities of the agency. This account provides for the research; development; operations; salaries and related expenses; design, repair, rehabilitation, modification of facilities, and construction of new facilities; and other general and administrative activities supporting the themes within the five other program accounts. Cross-Agency Support provides a strategic focus for managing agency mission support functions and some of NASA's unique research facilities. This budget area consists of three themes: center management and operations; agency management and operations; and institutional investments. The center management and operations theme includes the basic costs to manage and operate each of the nine NASA field centers and to maintain the technical capabilities required to support the agency's mis-

sion. This budget theme is not directly identified or aligned to a specific program or project requirement, but is necessary for efficient and effective administration and operation of the NASA centers. The agency management and operations theme provides for the management and oversight of agency missions, functions, and the performance of some agency-wide activities and unique research capabilities and facilities. Theme responsibilities include the determination of programs and projects; establishment of management policies, procedures, and performance criteria; evaluation of progress; and the coordination and integration of all phases of the agency's mission. The five major programs included in this theme are agency management, safety and mission success, agency IT services, innovative partnerships program, and strategic capability asset program. The institutional investments theme provides for design and execution of non-programmatic discrete and minor revitalization construction of facilities projects, facility demolition projects, and environmental compliance and restoration activities.

For fiscal year 2009, the bill provides \$3,245,252,000, \$55,150,000 below the budget request. The Committee recommendation provides for the following allocation of funds within cross-agency support programs:

Center management and operations	\$2,033,591,000
Agency management and operations	887,496,000
Institutional investments	293,665,000
Congressionally-designated items	30,000,000

Agency management and operations.—The Committee recommends the following adjustments to the budget request:

Budget request	\$945,646,000
Recommended adjustments:	
Agency management	– 56,650,000
Safety and mission success: Independent verification and validation	+9,000,000
Innovative partnership programs	– 10,500,000
Total, agency management and operations	887,496,000

Agency management.—The Committee recommends a reduction of \$56,650,000 from the budget estimate for agency management. The recommended level of \$372,300,000 provides an inflationary increase of 3 percent over the fiscal year 2008 enacted level for comparable activities. The Committee asserts that a proposed increase of nearly 14 percent for headquarters management cannot be justified when direct labor costs budgeted in the mission directorates are inflated by only single-digit inflationary adjustments.

Safety and mission success.—The Committee recommends a total of \$172,428,000, an increase of \$9,000,000 over the budget estimate, for safety and mission success. These funds shall be available for NASA's overall software assurance and risk management strategy to ensure the correctness and quality of critical and complex software systems. Within the funds provided for independent verification and validation, \$5,000,000 shall be available for the development of competitive verification and validation research tools and technologies and \$33,347,000 shall be available for the independent verification and validation program.

Innovative partnerships.—The budget proposed funding for several programs, including future centennial challenges, investment

seed fund, facilitated access to space environment for technology development and training (FAST), and innovation transfusion. The Committee recommendation does not provide resources for these activities in fiscal year 2009 as no funds were allocated for these programs in the preceding year.

Institutional investments.—Within the funds provided, the Committee recommends not more than \$13,700,000 for facility planning and design, an increase of \$900,000, or 7 percent, over last year's level and \$10,000,000 below the budget request. In addition, the Committee reduces funds planned for minor revitalization of facilities at various locations (less than \$500,000) by \$4,850,000 and re-allocates such funds to fully fund the repair and construction of the consolidated information technology center at Dryden Flight Research Center (DFRC). This transfer reflects NASA's planned execution of repair and construction at DFRC in fiscal year 2009.

Further, the Committee recommends \$24,000,000 for the collaborative support facility (Building N232) at Ames Research Center (ARC), \$5,000,000 less than requested. The recommendation recognizes that ARC recently executed an enhanced use lease, resulting in unanticipated receipts in fiscal years 2008 and 2009 to offset, in part, the necessary appropriations request for the planned facility.

Congressionally-directed items.—Within the appropriation for cross-agency support programs, the Committee recommendation provides for the following Congressionally-directed activities:

National Aeronautics and Space Administration
 Congressionally-designated Items
 (\$ in thousands)

Recipient	Project	Location	Recommended Amount
Academy of Science - St. Louis	Scientists in the Classroom	St. Louis, MO	70
Adler Planetarium and Astronomy Museum	Planetarium Equipment	Chicago, IL	900
Bay Area Houston Economic Partnership	Space Alliance Technology Outreach Program	Houston, TX	1,000
Burlington County College	Mount Laurel Challenger Learning Center	Mount Laurel, NJ	1,500

OFFICE OF INSPECTOR GENERAL

Fiscal Year 2008 enacted	\$32,600,000
Fiscal Year 2009 request	35,500,000
Recommended in the bill	33,600,000
Bill compared with:	
Fiscal Year 2008 enacted	+1,000,000
Fiscal Year 2009 request	-1,900,000

The Inspector General Act of 1978 established the Office of Inspector General. The Office's mission is to prevent and detect crime, fraud, waste, abuse, and mismanagement while promoting economy, effectiveness, and efficiency with NASA. The Committee recommendation includes \$33,600,000 for the Office of Inspector General, \$2,900,000 above the fiscal year 2008 enacted level and \$1,900,000 below the budget estimate.

ADMINISTRATIVE PROVISIONS

The bill includes a provision that provides that for any funds appropriated to the National Aeronautics and Space Administration under this title for any account other than for the Office of the Inspector General for which obligations are incurred for construction of facilities or environmental compliance and restoration activities shall be available until expended. This provision does not apply to amounts appropriated for institutional minor revitalization and minor construction of facilities, and institutional facility planning and design.

The bill includes a provision that funds for announced prizes otherwise authorized shall remain available until expended, until the prize is claimed or the offer withdrawn.

The bill includes a provision that establishes thresholds for the transfer of funds.

The bill includes a provision prohibiting the use of funds to implement any reduction in force or other involuntary separations (except for cause) by NASA prior to September 30, 2009.

The bill includes a provision that provides for the transfer of balances under the old appropriations account structure to the new appropriations account structure.

The bill includes a provision that requires NASA to submit by November 1, 2008, a report detailing by mission directorate, fiscal year and object class costs expended to date and required for Space Shuttle retirement and transition activities for fiscal years 2006 through 2015.

The bill includes a provision that limits in fiscal year 2009 the number of non-career full-time equivalent positions in NASA to 48 and prohibits the detail of any such personnel covered by this provision to be assigned on temporary detail outside NASA.

The Committee does not recommend language requested by the Administration that would clarify that obligations incurred in certain appropriations accounts that were executed with proper legal authority during the period of fiscal years 2001 through 2009, and that have not been cancelled, would remain available through fiscal year 2015 for the closeout of all Space Shuttle contracts and associated programs. NASA has yet to delineate fully the scope as well as annual and total costs of Space Shuttle retirement and transition activities, and until such time as it does, the Committee believes such a proposal is premature and unjustified.

NATIONAL SCIENCE FOUNDATION

Fiscal Year 2008 enacted	\$6,065,000,000
Fiscal Year 2009 request	6,854,100,000
Recommended in the bill	6,854,100,000
Bill compared with:	
Fiscal Year 2008 enacted	+789,100,000
Fiscal Year 2009 request	

Established in 1950, the National Science Foundation's (NSF) primary purpose is to develop and implement a national policy on science, and support and promote basic research and education in the sciences. Working at the leading edge of the U.S. science and engineering enterprise, NSF provides nearly half of the federal investment in non-medical research at academic institutions and supports science and mathematics education at all levels. NSF investments in research and education have returned exceptional dividends to the American people. At the same time, new opportunities exist to make progress in meeting pressing national needs in energy, health, security and the environment, as well as to resolve longstanding dilemmas of global scope. Continued excellence in fundamental research and education is important to sustain innovation and sharpen the Nation's competitive edge.

For fiscal year 2009, the Committee recommendation provides a total of \$6,854,100,000 for the National Science Foundation, the same level as the budget request and \$789,100,000 over the fiscal year 2008 enacted level. This recommendation represents an increase of 13 percent over last year and further represents the Congress' commitment to robust investments in science and technology.

Public awareness of NSF-sponsored research.—The Committee encourages the NSF to maximize the communication and open exchange of data and results that flow from research that is funded by NSF appropriations, consistent with existing Federal law. Specifically, the Committee expects the NSF to partner with grantees to expand the visibility to the public of NSF-sponsored research, especially through the Internet. NSF is the principal Federal agency charged with promoting science and engineering education, and increasing the public awareness of NSF's high-risk, high-reward research activities will contribute to the development of the future science and technology workforce.

The Committee's recommendation for the National Science Foundation by account follows.

RESEARCH AND RELATED ACTIVITIES

Fiscal Year 2008 enacted	\$4,821,474,000
Fiscal Year 2009 request	5,593,990,000
Recommended in the bill	5,544,140,000
Bill compared with:	
Fiscal Year 2008 enacted	+722,666,000
Fiscal Year 2009 request	–49,850,000

The Research and Related Activities appropriation enables the United States to provide leadership and promote progress across the expanding frontiers of scientific and engineering research and education. This appropriation provides resources for NSF's major research activities, which include biological sciences; computer and information science and engineering; engineering; geosciences; mathematical and physical sciences; social, behavioral, and economic sciences; Office of International Science and Engineering;

U.S. polar research programs; U.S. Antarctic logistical support activities; integrative activities, including the Experimental Program to Stimulate Competitive Research (EPSCoR); Office of Cyberinfrastructure; and the U.S. Arctic Research Commission. The Committee recommends \$5,544,140,000 for research and related activities, an increase of \$722,666,000 over the fiscal year 2008 enacted level and \$49,850,000 below the budget request. The Committee notes that the reduction from the budget request for research and related activities has been reallocated to education and human resources and highlights the importance the Committee places on investments in science and mathematics education as a complement to scientific and engineering research.

Investments in all science disciplines.—The budget proposes an 8.5 percent increase for the social, behavioral and economic sciences directorate compared to increases of 20 percent for the mathematical and physical sciences, engineering and computer sciences directorates. While the American Competitiveness Initiative—this Administration’s agenda—identifies measurable increases for these particular sciences, the America COMPETES Act—a statute in law—includes language that the Director shall give priority in the allocation of Foundation resources to research activities that can be expected to make contributions in physical or natural science, technology, engineering, social sciences, or mathematics, or that enhance competitiveness, innovation, safety, and security in the United States. The Committee notes that *Rising Above the Gathering Storm* states that it should not be a “disinvestment in such important fields as the life and social sciences.” The research portfolio for the social and behavioral sciences is as varied as the physical and natural sciences, focusing on such areas as climate change, risk assessment, economic and political laboratories, virtual centers and learning language. Further, if part of keeping America competitive in the 21st century involves, as Thomas Friedman points out in *The World is Flat*, the innumerable individual and societal choices that are made with regard to where people study, work and live, their economic decisions, their educational progress, and the influences of culture, the key to American competitiveness is understanding individual and societal behavior. Accordingly, the Committee believes that the proposed increases across the science directorates are inconsistent with prior direction of Congress and others’ findings, and therefore, directs the Foundation to provide a more balanced allocation of its resources across the science directorates in its fiscal year 2009 program.

In addition, the NSF is encouraged to invest in cost-effective and innovative solutions, such as grid computing, to address the Nation’s cyber infrastructure needs.

Icebreaking.—In fiscal year 2006, the Committee on Appropriations approved an Administration request for the then-primary user of the icebreakers, the NSF, to fund the costs of operating and maintaining three Coast Guard polar icebreakers (*Healy*, *Polar Sea* and the *Polar Star*) and to decide how these aging vessels are used. The Committee questions whether this arrangement should continue today as the national interest in the polar regions extends well beyond science. Accordingly, the Committee directs the NSF and the Coast Guard to renegotiate the existing arrangement so that operating and maintenance funding is contained within the

Coast Guard's fiscal year 2010 budget request, consistent with a new joint plan for Coast Guard support of NSF and other scientific research, which is also to be included in the fiscal year 2010 budget request. NSF shall retain funding for contracting out scientific support services that Coast Guard cannot perform or cannot provide on a cost-competitive basis.

For fiscal year 2009, the Committee recommends a total of not to exceed \$540,000,000 for polar research and operations support, of which \$54,000,000 shall be for icebreaking services and \$9,000,000 for other icebreaking costs, as requested. The bill does not include funds to continue in caretaker status the *Polar Star*, as costs for this activity are assumed within the funds provided to the Coast Guard.

Experimental Program to Stimulate Competitive Research (EPSCoR).— EPSCoR's mission is to assist the Foundation in its statutory function to strengthen research and education throughout the United States and to avoid undue concentration of such research and education. The first EPSCoR program was initiated by the National Science Foundation in 1979, with planning grants to seven states. Today, EPSCoR and EPSCoR-like programs are found in six additional Federal agencies: the National Institutes of Health, the National Aeronautics and Space Administration, the Environmental Protection Agency and the departments of Defense, Energy and Agriculture. Today, the 27 EPSCoR jurisdictions that participate in the Federal-wide program account for 20 percent of the U.S. population, 25 percent of the research/doctoral institutions, and 18 percent of the employed scientists and engineers; and yet, they are not full partners in the science and technology enterprise.

Within the funds provided for Research and Related Activities, \$133,000,000 is provided for EPSCoR in fiscal year 2009, as authorized by law, an increase of \$19,500,000 above the budget estimate. These funds shall be available to increase co-funding by \$5,000,000 and to increase research infrastructure improvement (RII) awards by \$14,000,000. The NSF is directed to (1) supplement RII awards for cyber infrastructure investment; (2) beginning in fiscal year 2009, phase in increases in RII awards to 5 year/\$5,000,000 per year awards, by making new awards of \$4,000,000 in fiscal year 2009 and to supplement awards made in fiscal year 2008 for cyber infrastructure investments, actions recommended by the 2006 EPSCoR 2020 Workshop Report; and (3) report to the Committees on Appropriations of the House and Senate not later than January 1, 2009, on its plans and efforts undertaken to comply with the aforementioned directives. The Committee further directs that not less than \$660,000,000 shall be available for NSF investments/activities in the EPSCoR jurisdictions in fiscal year 2009 and that annual increases in NSF investments in EPSCoR jurisdictions shall be proportional to the annual growth in the overall research and related activities appropriation.

NSF-wide investments.—The Committee is supportive of many of the NSF-wide investments identified in the request, including cyber-enabled discovery and innovation, dynamics of water processing, science and engineering beyond Moore's law, plant genome and oceans research and approves the levels for each of these investments at the levels contained in the budget request. The Com-

mittee, however, does not provide resources for adaptive systems technology.

MAJOR RESEARCH EQUIPMENT AND FACILITIES CONSTRUCTION

Fiscal Year 2008 enacted	\$220,740,000
Fiscal Year 2009 request	147,510,000
Recommended in the bill	147,510,000
Bill compared with:	
Fiscal Year 2008 enacted	– 73,230,000
Fiscal Year 2009 request	

The Major Research Equipment and Facilities Construction (MREFC) appropriation provides funding for the construction and acquisition of major research facilities that provide unique capabilities at the cutting edge of science and engineering. Operations and maintenance costs of the facilities are provided through appropriations made to Research and Related Activities (R&RA). For fiscal year 2009, the Committee recommendation includes \$147,510,000, a decrease of \$73,230,000 from the fiscal year 2008 enacted level and the same level as the budget request.

The appropriation includes funding for the following major projects:

AdvLigo	\$51,430,000
Atacama Large Millimeter Array (ALMA)	82,250,000
IceCube Neutrino Observatory	11,330,000

Several projects for which appropriations have been provided in previous years are currently undergoing final design and cost baseline reviews. Pending these reviews, the Committee does not recommend funding in this Act. This recommendation is made without prejudice to any project. However, to continue these projects in fiscal year 2009, pending final determination of their cost reviews, funding is provided within the R&RA account for concept and development in the following amounts, by project:

National Ecological Observatory Network (NEON)	\$26,040,000
Ocean Observatories Initiative (OOI)	10,500,000

In addition, funding for design work for the advanced technology solar telescope is assumed within the amounts provided for R&RA, as discussed below.

Cost overruns and management improvements in determining project costs.—The Committee is supportive of NSF’s efforts in improving its costs analysis on its major projects. Over the recent years, many major construction projects have experienced schedule delays and increased costs. As a result, those overruns have forced NSF to borrow against other accounts, and have contributed to scope changes that weaken a project’s scientific capabilities that were used initially to justify the investment. In addition, NSF is implementing a “no cost overrun” policy, which will require that cost estimates developed at the preliminary design stage have adequate contingency to cover all foreseeable risks, and that any cost increases not covered by contingency be accommodated by reductions in scope. These changes will bring NSF’s practices more in line to those in place at other federal agencies, such as the Department of Energy and the National Aeronautics and Space Administration.

Funding design activities within MREFC.—The Committee does not recommend language proposed by the Administration that

would permit the use of funds provided within this appropriation for design activities. Costs associated with design of major research equipment and facilities are currently included within the R&RA account. The use of MREFC funding for design and other construction activities is a principal focus of ongoing reviews of the MREFC processes by NSF management and the National Science Board. The Committee believes that this proposal needs to be further examined by the NSF and the National Science Board, and, if advocated by these entities, considered by the appropriate authorizing committees of Congress.

EDUCATION AND HUMAN RESOURCES

Fiscal Year 2008 enacted	\$725,600,000
Fiscal Year 2009 request	790,410,000
Recommended in the bill	840,260,000
Bill compared with:	
Fiscal Year 2008 enacted	+114,660,000
Fiscal Year 2009 request	+49,850,000

The Foundation's Education and Human Resources activities support all levels of education and training from pre-Kindergarten through career development; promotes public understanding of science, mathematics, engineering and technology; and ensures the United States has world-class scientists, mathematicians and engineers. This appropriation supports a cohesive and comprehensive set of activities that encompass every level of education and every region of the country. The major components of this directorate include research and learning in formal and informal settings; undergraduate education; graduate education; and human resource development.

The Committee recommendation provides \$840,260,000 for education and human resources, an increase of \$114,660,000 over the fiscal year 2008 enacted level and \$49,850,000 over the budget request. Adjustments to the budget request are as follows:

Graduate research fellowships	– \$9,700,000
Robert Noyce Scholarship Program	+38,400,000
Undergraduate/graduate student support programs	+650,000
Graduate teaching fellowships in K–12	+500,000
Math and science partnership	+10,000,000
Climate change education program	+10,000,000

Graduate research fellowships.—The Committee recommendation provides \$107,000,000, an increase of \$18,900,000 over the fiscal year 2008 level and \$9,700,000 below the budget request. While the Committee is supportive of the graduate research fellowships program, the budget request is in excess of the authorized level by \$9,500,000. The Committee recommends that the funds requested in excess of the authorization be provided for other worthy programs in the education and human resources portfolio.

Robert Noyce Scholarships.—The National Academies' *Rising Above the Gathering Storm* discussed the importance of expanding programs to enhance the undergraduate education of the future science and engineering workforce. The Robert Noyce Scholarship program encourages talented science, technology, engineering and mathematics (STEM) undergraduate students and postgraduate professionals to become K–12 mathematics and science teachers. Given the importance of this activity, the Committee recommenda-

tion provides an increase of \$38,400,000 over the budget request for a total program level of \$50,000,000 in fiscal year 2009.

Undergraduate/graduate student support programs.—A total of \$87,500,000 is recommended for undergraduate/graduate student support programs for fiscal year 2009, an increase of \$650,000 over the budget request and \$4,150,000 over the fiscal year 2008 level. Funding of \$42,500,000 is provided for the Louis Stokes Alliances for Minority Participation (LSAMP); \$31,500,000 is provided for the Historically Black Colleges and Universities Undergraduate Program (HBCU-UP) and \$13,500,000 is provided for the Tribal Colleges and Universities Program (TCUP).

Graduate teaching fellowships in K-12.—The Committee recommends a total of \$49,500,000 for Graduate teaching fellowships in K-12 for fiscal year 2009, an increase of \$2,500,000 over the current level and \$500,000 over the budget request. This program provides for the most promising science, mathematics and engineering students in the U.S. for a broad range of disciplinary and cross-disciplinary careers.

Math and science partnership (MSP) program.—The math and science partnership program was established in 2002 to integrate the work of higher education and K-12 education to strengthen and reform mathematics and science education. Recent assessment data on MSP projects indicate that the program has been effective in increasing student performance at the elementary, middle and high school levels. For MSP, a total of \$61,000,000 is recommended for fiscal year 2009, an increase of \$12,500,000 over the fiscal year 2008 level and \$10,000,000 over the budget request.

Climate change education program.—The National Academies' *Earth Science and Applications from Space: National Imperatives for the Next Decade and Beyond* noted that the training of future scientists needed to interpret observations and apply data and measurements into knowledge and information is critical. Consistent with the Academies' findings, the Committee provides \$10,000,000 for education and training in the use of Earth observations and information derived from those observations. The Foundation is directed to work with the National Academies in the development of a plan for the distribution and effective use of these funds.

AGENCY OPERATIONS AND AWARD MANAGEMENT

Fiscal Year 2008 enacted	\$281,790,000
Fiscal Year 2009 request	305,060,000
Recommended in the bill	305,060,000
Bill compared with:	
Fiscal Year 2008 enacted	+23,270,000
Fiscal Year 2009 request	

The Agency Operations and Award Management appropriation includes funding for staff salaries, benefits, staff travel, training, rent, information technology, administrative contractual services, supplies, equipment and other operating expenses necessary for management of NSF's research and education activities. This appropriation supports full-time equivalents, provides for current administrative services and enhances the agency's investment in information technology to increase productivity. For fiscal year 2009, the Committee recommendation provides \$305,060,000, the same

level as the budget estimate and \$23,270,000 over the fiscal year 2008 enacted level.

Cost sharing policies.—In a February 2008 report of the National Science Board, the Board recommended that the National Science Foundation should reinstate mandatory cost sharing for the engineering research centers program, the experimental program to stimulate competitive research (EPSCoR) and the industry/university cooperative research centers program, noting that cost sharing is foundational to strategic programmatic goals. The Committee expects the NSF to notify the House and Senate Committees on Appropriations 90 days prior to changing its existing cost sharing policies, and to include in any new policy directive measures to mitigate effects on grantees, particularly on minority serving institutions.

OFFICE OF THE NATIONAL SCIENCE BOARD

Fiscal Year 2008 enacted	\$3,969,000
Fiscal Year 2009 request	4,030,000
Recommended in the bill	4,030,000
Bill compared with:	
Fiscal Year 2008 enacted	+61,000
Fiscal Year 2009 request	

The Office of the National Science Board, established in 1950, establishes policies and assesses the quality, relevance and performance of the National Science Foundation's awards and capital investments. In addition, the Board provides advice to the executive branch and Congress on matters of science and engineering policy. For fiscal year 2009, the recommendation provides \$4,030,000, the same as the budget request and \$61,000 above the fiscal year 2008 enacted level.

OFFICE OF INSPECTOR GENERAL

Fiscal Year 2008 enacted	\$11,427,000
Fiscal Year 2009 request	13,100,000
Recommended in the bill	13,100,000
Bill compared with:	
Fiscal Year 2008 enacted	+1,673,000
Fiscal Year 2009 request	

The Office of the Inspector General was established to promote economy, efficiency and effectiveness in administering the Foundation's programs; to detect and prevent waste, fraud or abuse within the Foundation or by individuals that request or receive National Science Foundation funding; and to identify and resolve cases of misconduct in science. For fiscal year 2009, the Committee recommends \$13,100,000, the same as the budget estimate and an increase of \$1,673,000 over the fiscal year 2008 level. The Committee recommends \$13,100,000, the same level as the budget request and \$1,673,000 over the fiscal year 2008 enacted level. The funds provided are available for one year.

TITLE IV—RELATED AGENCIES

COMMISSION ON CIVIL RIGHTS

SALARIES AND EXPENSES

Fiscal Year 2008 enacted	\$8,460,000
Fiscal Year 2009 request	8,800,000
Recommended in the bill	8,800,000
Bill compared with:	
Fiscal Year 2008 enacted	+340,000
Fiscal Year 2009 request	

The Commission on Civil Rights was established by the Civil Rights Act of 1957 and is directed by eight part-time Commissioners. The Commission was created to protect the civil rights of people within the United States and was intended to be an independent, bipartisan, fact-finding agency. The Commission investigates charges of citizens being deprived of voting and other civil rights and collects, studies, and disseminates information on the impact of Federal laws and policies on civil rights.

The Committee recommends \$8,800,000 for the salaries and expenses of the Commission on Civil Rights, which is \$340,000 above the fiscal year 2008 enacted level and equal to the request. The Committee continues to have deep reservations about the Commission's current capacity and commitment to fulfilling its civil rights mission in a fair and effective manner. Within 60 days of enactment of this Act, the Commission is directed to report to the House and Senate Committees on Appropriations on the fiscal year 2009 budget and activities of the regional offices and the State Advisory Committees, as well as on the procedures to ensure transparency and the participation of all Commissioners in the preparation and review of all reports and briefing papers.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

SALARIES AND EXPENSES

Fiscal Year 2008 enacted	\$329,300,000
Fiscal Year 2009 request	341,925,000
Recommended in the bill	350,425,000
Bill compared with:	
Fiscal Year 2008 enacted	+21,125,000
Fiscal Year 2009 request	+8,500,000

The Equal Employment Opportunity Commission (EEOC) has jurisdiction over employment discrimination issues within the Federal government and also for private employers, State and local agencies, employment services and labor organizations. The EEOC receives, reviews, investigates and processes charges of employment discrimination and files discrimination suits. The EEOC also provides guidance and information to both employers and employees concerning their rights and responsibilities under applicable laws. For fiscal year 2009, the Committee recommends \$350,425,000, which is \$8,500,000 over the budget request.

Backlog reduction.—The Committee remains very concerned about the rising charge backlog at the EEOC. The backlog at the end of fiscal year 2007 was 54,970 charges, a 37 percent increase over the backlog at the end of the previous fiscal year. The EEOC estimates that the charge backlog will be 66,976 at the end of fiscal

year 2008 and 75,000 at the end of fiscal year 2009. With the workload increasing drastically, staff levels, particularly among front line staff such as investigators and attorneys, have been inadequate to reduce or contain the backlog. Consequently, the Committee recommends an increase of \$9,545,000 to begin addressing this problem and directs the EEOC to report to the House and Senate Committees on Appropriations within 60 days of the enactment of this Act with a comprehensive plan for backlog reduction. The plan should address future resource requirements and hiring needs, including new staff to fill EEOC's 231 existing "unfunded" full-time equivalent positions and any additional hires needed to counterbalance the coming wave of employee retirements, as necessary.

Accuracy of workload projections.—The Committee questions the accuracy of the EEOC's future workload projections because the assumptions underlying those projections appear overly optimistic. The EEOC is using assumptions on case resolutions, for example, that significantly exceed the rate of resolution actually achieved in recent years. These discrepancies become particularly apparent when the projections in the Inventory and Resolutions Workload Table are compared to midyear data that EEOC collects and distributes internally. The EEOC is urged to further refine its projections (which are a major factor in calculating the estimated charge backlog for a given year) by calibrating them with actual data, such as those available through the annual midyear review.

National Contact Center transition.—Last fiscal year, the EEOC migrated its customer service operation from the contractor-based National Contact Center (NCC) to an in-house call intake function. The Committee strongly supported this migration, and the fiscal year 2009 recommendation reiterates this support by including \$3,635,000 for call processing personnel and information technology expenses. In order to ensure that callers being handled by the new in-house customer response function are receiving service that is equal to or better than the service that was received through the NCC, the EEOC is directed to report to the House and Senate Committees on Appropriations on comparative customer satisfaction data no later than 60 days after the enactment of this Act. The report should also include a cost-benefit analysis of hiring higher credentialed employees for the call intake function, which might provide more substantive assistance to callers and resolve a greater number of calls at the first point of contact.

State, local and tribal assistance.—The Committee recommends \$28,000,000 for payments to State and local Fair Employment Practice Agencies (FEPAs) and Tribal Employment Rights Organizations (TEROs). This will provide the FEPAs and TEROs with a level of support that is comparable to assistance received in fiscal year 2008. The Committee is aware that EEOC is looking at actual processing costs per charge for the FEPAs and TEROs, which will inform future decisions about the level of reimbursement provided to these agencies. EEOC is directed to submit its findings on state, local and tribal per charge costs to the House and Senate Committees on Appropriations when that data becomes available.

Outreach.—The Committee does not accept EEOC's proposal to reduce its outreach budget by \$1,500,000. EEOC should be doing

more, not less, to reach underserved communities and other vulnerable populations to educate them about their workplace rights.

Restructuring.—The Committee is aware of EEOC’s continuing efforts to restructure various portions of its operations, including EEOC headquarters and parts of the federal operations office. Experiences during the field office restructuring process raised significant issues relating to EEOC’s restructuring goals and have caused the Committee hesitation with respect to ongoing restructuring efforts. As a result, the Committee continues a provision from last year requiring EEOC to notify the Congress via reprogramming procedures prior to implementing any repositioning, restructuring or reorganization within the agency.

INTERNATIONAL TRADE COMMISSION

SALARIES AND EXPENSES

Fiscal Year 2008 enacted	\$68,400,000
Fiscal Year 2009 request	73,600,000
Recommended in the bill	75,100,000
Bill compared with:	
Fiscal Year 2008 enacted	+6,700,000
Fiscal Year 2009 request	+1,500,000

The International Trade Commission is an independent, quasi-judicial agency responsible for conducting trade-related investigations; providing the Congress and the President with independent, expert technical advice to assist in the development and implementation of U.S. international trade policy; responding to the Congress and the President on various matters affecting international trade; maintaining the Harmonized Commodity Description and Coding System of internationally accepted product nomenclature; providing technical assistance to eligible small businesses seeking remedies and benefits under the trade laws; and performing other specific statutory responsibilities ranging from research and analysis to quasi-judicial functions on trade-related matters.

The Committee recommends \$75,100,000 for the International Trade Commission (ITC) for fiscal year 2009, which is \$6,700,000 above fiscal year 2008 and \$1,500,000 above the request. The Committee is concerned that the ITC’s increasing section 337 intellectual property investigations workload is outstripping available resources. This funding will allow ITC to hire a sixth administrative law judge, lease additional courtroom space, and cover necessary renovation costs.

LEGAL SERVICES CORPORATION

PAYMENT TO THE LEGAL SERVICES CORPORATION

Fiscal Year 2008 enacted	\$350,490,000
Fiscal Year 2009 request	311,000,000
Recommended in the bill	390,000,000
Bill compared with:	
Fiscal Year 2008 enacted	+39,510,000
Fiscal Year 2009 request	+79,000,000

The Legal Services Corporation (LSC) is a private, non-profit corporation that provides low-income individuals with access to legal assistance and information concerning civil legal problems. Created in 1974, the LSC is charged by Congress to provide assistance to

those who would otherwise be unable to afford adequate legal counsel.

The Committee strongly supports the LSC's mission "to promote equal access to justice in our Nation." The recommendation includes \$390,000,000 for the LSC, which is \$39,510,000 above fiscal year 2008 enacted level and \$79,000,000 over the request.

The Committee commends LSC for its efforts to close the "justice gap" in America, and encourages LSC's initiatives to help eligible families affected by the national mortgage crisis.

Within the total provided, \$366,838,000 is for grants to basic field programs and required independent audits; \$3,162,000 is for the Office of Inspector General; \$16,000,000 is for management and administration; \$3,000,000 is for client self-help and information technology; and \$1,000,000 is for loan repayment assistance.

Current LSC locality pay represents reasonable compensation for LSC officers and employees, and a provision is included to authorize the continuation of locality pay.

ADMINISTRATIVE PROVISION—LEGAL SERVICES CORPORATION

The Committee recommendation includes bill language to continue similar statutory requirements and restrictions contained in previous appropriations Acts.

MARINE MAMMAL COMMISSION

SALARIES AND EXPENSES

Fiscal Year 2008 enacted	\$2,820,000
Fiscal Year 2009 request	2,400,000
Recommended in the bill	3,200,000
Bill compared with:	
Fiscal Year 2008 enacted	+380,000
Fiscal Year 2009 request	+800,000

The Marine Mammal Commission and its Committee of Scientific Advisors on Marine Mammals are charged with overseeing and advising on domestic and international actions to further the policies and provisions of the Marine Mammal Protection Act. The Commission provides objective, science-based advice to the Congress and the Executive Branch on issues related to the protection of marine mammals.

The number of issues affecting marine mammal conservation has grown over the past three decades and the Committee recognizes these increasing responsibilities of the Commission. As such, the Committee recommendation includes \$3,200,000 for the necessary expenses, including the hiring of two additional FTEs, for the Marine Mammal Commission. This amount is \$380,000 above the current year level and \$800,000 above the request. The Committee has provided this increase to allow the Commission to address various challenges including the effects of and adaptation to climate change and the study of endangered species. The additional FTEs would be responsible for monitoring oil and gas issues such as the expansion of exploration and clean-up of oil spills on ice as well as emerging fishery issues.

The Committee understands that marine mammals in polar regions are particularly vulnerable to the effects of climate change due to the expected reduction in sea ice and subsequent changes

in ecosystem biodiversity and structure. Many of these animals are poorly studied and already may be experiencing serious effects from climate change. The Commission has initiated a project to develop monitoring strategies for Arctic marine mammals and the Committee supports efforts to complete this work and then to shift focus to development of mitigation efforts.

The Committee expects the Commission to continue its efforts to minimize the direct and indirect effects of fisheries, noise, disease, chemical contaminants, harmful algal blooms, climate change, habitat alteration, boating and commercial shipping, marine debris, and other factors that may pose a risk of sublethal and lethal effects on marine mammals or that may affect the health and stability of the marine ecosystem.

NATIONAL VETERANS BUSINESS DEVELOPMENT CORPORATION SALARIES AND EXPENSES

Fiscal Year 2008 enacted	\$1,410,000
Fiscal Year 2009 request
Recommended in the bill	3,200,000
Bill compared with:	
Fiscal Year 2008 enacted	+1,790,000
Fiscal Year 2009 request	+3,200,000

The National Veterans Business Development Corporation (TVC) was established by Public Law 106–50 to foster entrepreneurship and business opportunities for veterans, including access to capital, surety bonding, training, mentoring and markets. The TVC provides members of the Guard and Reserves and their families with pre/post-deployment assistance to preserve family-owned businesses. Since its original authorization, TVC has adapted its programs and services to an environment that not only includes veterans from prior conflicts, but an increasing number of young, many disabled, technologically savvy veterans of Operations Enduring Freedom and Iraqi Freedom.

The Committee recommendation includes \$3,200,000 in total resources for the programs of the TVC for fiscal year 2009, which is \$1,790,000 above fiscal year 2008. The President’s budget did not include funding for the TVC.

The Committee, however, is concerned that the management and administrative funds retained by the Washington, DC office are excessive, which has the effect of limiting resources allocated to Veterans Business Resource Centers (VBRC) in the nation. Tfore, the Committee directs that not less than \$250,000 be allocated to the existing three VBRCs.

The Committee directs the TVC to submit a spending plan to the House and Senate Committees outlining the allocation of funding provided in this bill. The plan shall describe the level of funding proposed for overhead costs, salary and benefits, as well as its regional operations of its community-based organizations (CBOs). The Committee directs the TVC to report to the Committees no later than 30 days after the enactment of this Act, and on a quarterly basis thereafter.

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE
SALARIES AND EXPENSES

Fiscal Year 2008 enacted	\$44,120,000
Fiscal Year 2009 request	46,272,000
Recommended in the bill	48,272,000
Bill compared with:	
Fiscal Year 2008 enacted	+4,152,000
Fiscal Year 2009 request	+2,000,000

The Office of the U.S. Trade Representative (USTR) seeks to contribute to U.S. economic growth, competitiveness and prosperity by opening markets and reducing trade and investment barriers around the world to create new commercial opportunities for U.S. goods and services industries, workers, ranchers and farmers. The Committee recommendation includes \$48,272,000 for the Office of the United States Trade Representative (USTR) for fiscal year 2009, which is \$4,152,000 above fiscal year 2008 and \$2,000,000 above the request.

The additional funding above the request will provide for USTR's pay and inflation-related increases, and support the maintenance of current staffing levels in fiscal year 2009.

The U.S. Trade Representative is a member of the President's Cabinet and serves as the President's principal trade advisor, negotiator, and spokesperson on trade issues. USTR is part of the Executive Office of the President. Through an interagency structure, USTR coordinates trade policy, resolves disagreements, and frames issues for presidential decision. The USTR is also the Vice-Chairman of the Overseas Private Investment Corporation, a member of the Board of the Millennium Challenge Corporation, an ex officio member of the Export-Import Bank Board of Directors, and a member of the National Advisory Council on International Monetary and Financial Policies.

Intellectual Property Rights (IPR).—The Committee is aware of significant intellectual property issues that infringe on our trading relationships with China, Russia and Canada. The Committee encourages USTR to continue to prioritize such issues in bilateral and multilateral trade negotiations.

International Standards.—The Committee directs the USTR to ensure that U.S. business interests are fully represented in international standards negotiations. The Committee directs the USTR to collaborate with the Department of Commerce, including the National Institute of Standards and Technology, and the State Department to reduce trade barriers to U.S. exports. The Committee continues its direction to the USTR to ensure U.S. standards are adopted in international negotiations.

Textiles.—The Committee is aware of concerns about the World Trade Organization negotiations concerning textiles and apparel. Specifically, the Committee is concerned that the current part of tariff reduction negotiations under the Doha Round will result in a non-reciprocal arrangement detrimental to United States manufacturers. The Committee believes such negotiations should be consistent with the trade negotiating objectives of the United States contained in section 2012 of the Bipartisan Trade Promotion Authority Act of 2002 (19 U.S.C. 3802) and directs USTR to report to the Committee within 60 days of enactment of this Act regarding

adherence to these objectives. Bill language is included regarding this matter.

Reporting Requirements.—It has been brought to the Committee's attention that the USTR may fare better in bringing trade dispute cases to the WTO by using additional support from private counsel. In-house expertise in long-term, complex WTO dispute cases is difficult to maintain in an ever-changing international trade climate. Outside counsel in countries such as China, Russia and Brazil could assist with clarification of local laws and regulations, enforcement policies and practices, and market conditions. USTR is directed to report back to the Committee on the desirability of such a new authority.

STATE JUSTICE INSTITUTE

SALARIES AND EXPENSES

Fiscal Year 2008 enacted	\$3,760,000
Fiscal Year 2009 request	
Recommended in the bill	4,100,000
Bill compared with:	
Fiscal Year 2008 enacted	+340,000
Fiscal Year 2009 request	+4,100,000

The State Justice Institute (SJI) is a non-governmental organization that awards grants to improve the administration of justice in State courts, as authorized in Public Law 108–372.

The Committee provides \$4,100,000 for SJI, which is \$340,000 over the fiscal year 2008 enacted level. Of the amount appropriated, \$500,000 may be used for strategic initiatives that will have national implications for the courts. The Administration proposed to eliminate SJI.

The Committee encourages SJI to continue to work with the Department of Justice Office of Justice Programs (OJP) on issues involving State courts. The Committee commends SJI's policy of obtaining dollar-for-dollar matching funds for grants awarded. The Committee expects this goal to remain in place during fiscal year 2009.

TITLE V—GENERAL PROVISIONS

The Committee recommendation includes the following general provisions for the departments and agencies funded in the accompanying bill.

Section 501 prohibits the use of funds for publicity or propaganda purposes unless expressly authorized by law.

Section 502 prohibits any appropriation contained in this Act from remaining available for obligation beyond the current fiscal year unless explicitly authorized.

Section 503 provides that the expenditure of any appropriation contained in the Act for any consulting service through procurement contracts shall be limited to those contracts w such expenditures are a matter of public record and available for public inspection, except w otherwise provided under existing law or under existing Executive Order issued pursuant to existing law.

Section 504 provides that if any provision of the Act or the application of such provision to any person or circumstance shall be held invalid, the remainder of the Act and the application of such provi-

sions to persons or circumstances other than those to which it is held invalid shall not be affected.

Section 505 provides for the Committee's policy concerning the reprogramming of funds. Section 505(a) prohibits the reprogramming of funds which: (1) creates or initiates a new program, project or activity; (2) eliminates a program, project, or activity; (3) increases funds or personnel by any means for any project or activity for which funds have been denied or restricted; (4) relocates offices or employees; (5) reorganizes or renames offices, programs, or activities; or (6) contracts out or privatizes any function or activity presently performed by Federal employees; (7) proposes to use funds for purposes other than those specified by the House or Senate Committee on Appropriations; (8) augments by 10% or \$500,000 existing programs, projects, or activities, or reduces by 10 percent funding for any existing program, project, or activity, or numbers of personnel by 10 percent as approved by Congress; or (9) results from any general savings, including savings from a reduction in personnel, which would result in a change in existing programs, activities, or projects as approved by Congress unless the Appropriations Committees of both Houses of Congress are notified 15 days in advance. Section 505(b) prohibits the reprogramming of funds after August 30, except in extraordinary circumstances and with appropriate notification. The Committee has again included carryover funds under the requirements of section 505 to clarify that agencies must follow reprogramming procedures with respect to carryover funds.

Section 506 prohibits funds from being used to implement, administer, or enforce any guidelines of the Equal Employment Opportunity Commission covering harassment based on religion similar to proposed guidelines published by the EEOC in October 1993.

Section 507 provides that if it is determined that any person intentionally affixes a "Made in America" label to any product that was not made in America that person shall not be eligible to receive any contract or subcontract with funds made available in this Act.

Section 508, proposed for deletion in the budget request, requires quarterly reporting to Congress of unobligated balances that were received during any previous fiscal year.

Section 509 provides that any closing or downsizing costs incurred by a department or agency funded under this Act resulting from funding reductions in the Act shall be absorbed within the budgetary resources available to the Department or agency, and provides transfer authority between appropriation accounts to carry out the provision, subject to reprogramming procedures.

Section 510 prohibits funds made available in this Act from being used to promote the sale or export of tobacco or tobacco products or to seek the reduction or removal of foreign restrictions on the marketing of tobacco products, provided that such restrictions are applied equally to all tobacco products or tobacco products of the same type. This provision is not intended to impact routine international trade services provided to all U.S. citizens, including the processing of applications to establish foreign trade zones.

Section 511 prohibits funds made available in this Act from being used to implement a Federal user fee for background checks conducted pursuant to the Brady Handgun Control Act of 1993, or to

implement a background check system that does not require and result in the destruction of certain information within 24 hours.

Section 512 delays the obligations of any receipts deposited into the Crime Victims Fund in excess of \$650,000,000 until October 1, 2009. This language is continued to ensure a stable source of funds will remain available for the program, despite inconsistent levels of criminal fines deposited annually into the fund. Requested language rescinding the remaining balances in the Crime Victims Fund is not included.

Section 513 prohibits the use of Department of Justice funds for programs that discriminate against or denigrate the religious beliefs of students participating in such programs.

Section 514 prohibits the transfer of funds in the Act to any department or agency of the United States Government, except for transfers made under authorities provided in this, or any other appropriations Act.

Section 515 provides that funds provided for E-Government Initiatives shall be subject to the procedures set forth in section 505 of this Act.

Section 516 requires the Bureau of Alcohol, Tobacco, Firearms and Explosives to include specific language in any release of tracing study data that makes clear that trace data cannot be used to draw broad conclusions about firearms-related crime.

Section 517 requires certain timetables of audits performed by Inspectors General of the departments and agencies funded in this Act.

Section 518 prohibits the use of funds to process patents of human organisms. The Committee concurs with the intent of this provision as expressed in the colloquy between the provision's sponsor in the House and the Ranking Minority Member of the House Committee on Appropriations as occurred on July 22, 2003, with respect to any existing patents on stem cells.

Section 519 prohibits the use of funds in this Act to be used to support or justify torture by any official or contract employee of the United States Government.

Section 520 prohibits the use of funds in this Act to require certain export licenses.

Section 521 prohibits the use of funds in this Act to deny certain import applications regarding "curios or relics" firearms, parts, or ammunition.

Section 522 prohibits the use of funds to include certain language in trade agreements.

Section 523 prohibits the use of funds in this Act to authorize or issue a National Security Letter (NSL) in contravention of certain laws authorizing the Federal Bureau of Investigation to issue NSLs.

Section 524 prohibits the use of funding in this Act prohibiting to implement a revision to OMB A-76 circular made on May 29, 2003.

Section 525 requires the congressional notification of any project within the Departments of Commerce or Justice, or the National Science Foundation and the National Aeronautics and Space Administration totaling more than \$75,000,000 that has cost increases of at least 10 percent.

Section 526 deems funds for intelligence or intelligence-related activities as authorized by the Congress until the enactment of the Intelligence Authorization Act for Fiscal Year 2009.

Section 527 prohibits contracts or grant awards in excess of \$5,000,000 to any specific contractor or grantee that has not certified that he has filed all Federal tax returns, has not been convicted of a criminal offense under the IRS Code of 1986, and has no unpaid Federal tax assessment.

Section 528 provides for rescissions of unobligated balances in the certain department and agencies funded in the Act.

HOUSE OF REPRESENTATIVES REPORTING REQUIREMENTS

The following materials are submitted in accordance with various requirements of the Rules of the House of Representatives:

CHANGES IN THE APPLICATION OF EXISTING LAW

Pursuant to clause 3(f)(1) of rule XIII of Rules of the House of Representatives, the following statements are submitted describing the effect of provisions in the accompanying bill which directly or indirectly change the application of existing law.

Title I—Department of Commerce

International Trade Administration:

- Includes language providing funds for engaging in trade promotion activities abroad, including in expenses of grants and cooperative agreements for the purposes of promoting exports of U.S. firms.
- Includes language that provides full medical coverage for dependent members of immediate families of employees stationed overseas and employees temporarily posted overseas; travel and transportation of employees of the United States and Foreign Commercial Service; employment of Americans and aliens by contract for services; rental of space abroad and expenses of alteration, repair, or improvement; purchase or construction of temporary demountable exhibition structures for use abroad; and payment of tort claims.
- Includes language regarding official representation expenses abroad and the purchase of passenger motor vehicles for official use abroad.
- Provides legislative set-asides for Manufacturing and Services; Market Access and Compliance; Import Administration, to include funds for Office of China Compliance; U.S. Foreign Commercial Service; and Executive Direction and Administration.
- Includes language regarding the contribution to the Mutual Educational and Culture Exchange Act of 1961 to include payment for assessment.
- Includes language that exempts ITA from Circular A–25.
- Includes language that relates to World Trade Organization negotiations and antidumping and countervailing duties.
- Includes language regarding the World Trade Organization and negotiating objectives.
- Includes language that stipulates that funds provided for specific items shall be available in the amounts specified in the report accompanying this Act.

Bureau of Industry and Security: Operations and Administration:

- Includes language regarding export administration and national security activities of the Department of Commerce.
- Includes language providing for the costs associated with the performance of export administration field activities both domestically and abroad; full medical coverage for dependent members of immediate families of employees stationed overseas; employment of Americans and aliens by contract for services abroad; payment of tort claims; official representation expenses abroad; awards of compensation to informers; purchase of passenger motor vehicles for official use and motor vehicles for law enforcement use; and inspections and other activities related to national security.
- Includes language regarding the Mutual Educational and Cultural Exchange Act of 1961 and the retention of payments and contributions.

Economic Development Administration: Salaries and Expenses

- Includes language regarding the monitoring of approved projects.

Minority Business Development Agency:

- Includes language making funds available for developing minority business enterprise, including expenses of grants, contracts and other agreements.
- Includes language that stipulates that funds provided for specific items shall be available in the amounts specified in the report accompanying this Act.

Bureau of the Census Periodic Census and Programs:

- Includes language regarding collecting data on race.
- Includes language relating to the use of funds for promotion, outreach and marketing activities.
- Includes language prohibiting the use of funds to conduct a sweepstakes.

National Telecommunications and Information Administration:

- Includes language permitting the Secretary of Commerce to charge federal agencies for costs in spectrum management, analysis, operations, and related services; and to use such collections in telecommunications research.

Public Telecommunications Facilities, Planning and Construction:

- Includes language providing funds available for program administration and makes unobligated balances available for grants.

United States Patent and Trademark Office:

- Includes language providing that appropriated funds be reduced as offsetting collections are assessed and collected.
- Includes language providing for the transfer of funds for activities associated with the National Intellectual Property Law Enforcement Coordination Council.
- Includes language regarding basic pay and certain retirement benefits; limiting official reception and representation expenses; and providing that sections 801, 802, and 803 of division B, of P.L. 0108–447 shall remain in effect during fiscal year 2009.
- Includes authority to permit the establishment of fees related to the electronic filing of documents.
- Provides authority to enter into cooperative agreements to conduct policy studies related to fair international protection of intellectual property rights.

National Institute of Standards and Technology Scientific and Technical Research and Services:

- Includes language limiting funds for official reception and representation expenses.

Industrial Technology Service:

- Provides for the multi-year availability of funds provided for the Hollings Manufacturing Extension Partnership.
- Provides for the multi-year availability of funds provided for Technical Innovation Program.

Construction of Research Facilities:

- Provides for the multi-year availability of funds provided for construction of research facilities.
- Includes language regarding the submission of certain materials in support of construction budget requests.
- Provides funding for a competitive construction grant program.
- National Oceanic and Atmospheric Administration (NOAA):
- Provides that certain funds be derived from various sources.
- Includes language specifying that deviations from amounts included in the report accompanying the Act shall be subject to section 505 of this Act.
- Provides that the Administrator may engage in formal and informal education activities.
- Provides a ceiling on the number of NOAA Commissioned Officer Corps.

- Includes language that stipulates that funds provided for specific items shall be available in the amounts specified in the report accompanying this Act.

Procurement, Acquisition and Construction:

- Includes language regarding funds for the National Polar-orbiting Operational Environmental Satellite System with funds provided for the same purpose by the Department of Defense.
- Includes language that stipulates that funds provided for specific items shall be available in the amounts specified in the report accompanying this Act.
- Includes language specifying that deviations from amounts included in the report accompanying the Act shall be subject to section 505 of this Act.

Pacific Coastal Salmon Recovery:

- Includes language for the Secretary of Commerce to issue grants to specific states and sites.

Coastal Zone Management Funds:

- Includes language relating to offsetting collections.

Fisheries Finance Program Account:

- Includes limitations on individual fishing quota loans and for traditional direct loans and prohibits direct loans for any new fishing vessel that will increase the harvesting capacity in any U.S. fishery.

Departmental Management:

- Includes language regarding audits and evaluations by the Bureau of the Census and retains from obligation funds until the Secretary has certified that the Bureau of the Census has met all best practices related to contracting and information technology.

Herbert C. Hoover Building Renovation and Modernization:

- Includes language regarding blast windows for renovation and modernization.

General Provisions: Department of Commerce

- Includes language making appropriations and funds available for advance payments only on the Secretary's certification that such payments are in the public interest.
- Includes language providing for use of appropriations for salaries and expenses for hire of passenger motor vehicles and uniforms or such allowances, as authorized.
- Includes a provision regarding transfers between NOAA and the Department.
- Includes a provision requiring the absorption of funding reductions related to personnel actions.
- Includes a provision regarding the trademark of the phrase "Last Best Place."
- Includes a provision expanding the personnel management demonstration project to more than 5,000, notwithstanding subsection (d) of section 4703 of title 5, U.S.C.
- Includes a provision permitting the Secretary of Commerce to prescribe and enforce standards or regulations regarding occupational diving within NOAA.
- Includes a provision allowing the Secretary of Commerce to furnish services within Department of Commerce buildings for reimbursement, which would then be credited to the appropriation or fund that provides such services.

Title II—Department of Justice

General Administration (GA):

- Includes language authorizing the transfers of funds between offices in this account; limiting the amount that offices within GA can increase or decrease; providing for specific amounts for various offices; extending availability for construction funds; and requiring notification on funding changes.

Tactical Law Enforcement Wireless Communications:

- Includes language regarding the transfer of funds for purchasing portable and mobile radios, which shall be subject to section 505 of this Act.

Detention Trustee:

- Includes language establishing that the Trustee shall be responsible for managing the Justice Prisoner and Alien Transportation System.
- Includes language limiting the amount of funds considered as "funds appropriated for State and local law enforcement assistance".

General Legal Activities:

- Includes language limiting the amount of funds for official representation and reception expenses available to the United States National Central Bureau.
- Includes language providing the Attorney General certain authorities when emergent circumstances require additional funding for litigation activities, which shall be subject to the provisions of section 505 of this Act.
- Provides funds to reimburse the Office of Personnel Management for expenses associated with the federal observer program and provides for extended availability.

Antitrust division:

- Includes language regarding the Hart-Scott-Rodino Antitrust Improvement Act.

United States Attorneys:

- Includes language limiting funds for official reception and providing for the expenses of hiring U.S. Attorneys to carry out sections of the Adam Walsh Child Protection and Safety Act.

United States Trustee System Funds:

- Includes language regarding refunds due depositors; provides for the extended availability of certain funds; and offsetting collections.

Fees and Expenses of Witnesses:

- Includes language regarding funds for construction of buildings for safesites, armored and other vehicles, and telecommunication equipment.

Community Relations Service:

- Includes language regarding the transfer of funds for conflict resolution and violence prevention activities within the community relations service, which shall be subject to the provisions of section 505 of this Act.

United States Marshals Services:

- Includes language providing for official reception and representation expenses, information technology systems, and courthouse security.

National Security Division:

- Includes language providing for the transfers of funds in emergent circumstances, which shall be subject to the provisions of section 505 of this Act.

Interagency Law Enforcement Interagency Crime and Drug Enforcement:

- Includes language regarding certain reimbursements.
- Includes language regarding the use of unobligated funds for continued operations of the organized crime drug enforcement task force fusion center program, which shall be subject to the provisions of section 505 of this Act.

Federal Bureau of Investigation (FBI):

- Includes allocations of funds for certain activities within the FBI.

Drug Enforcement Administration:

- Provides funding for necessary expenses of the DEA to include drug education and training programs, and provides for official reception and representation expenses.

Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF):

- Provides funding for the necessary expenses of the ATF to include training with state and local law enforcement, including training of canines.

- Includes language that prohibits expenses in connection with consolidating or centralizing records of acquisition and disposition of firearms maintained by Federal firearms licensees.

- Includes language that prohibits expenses to implement amendments to 27 CFR or to change the definition of "Curios or relics" or remove items from ATF publication 5300.11.

- Includes language that prohibits expenses to investigate or act upon applications for relief from Federal firearms disabilities under 18 U.S.C. 925.

- Includes language regarding expenses to investigate applications filed by corporations for relief from section 925(c) of title 18 U.S.C.

- Includes language that prohibits expenses to transfer mission or activities from ATF to other agencies.

- Includes language that prohibits expenses to disclose part or all of the contents of the Firearms trace center or any information required to be kept by licensees.

- Includes language that prohibits expenses to implement any rule requiring a physical inventory of licensed businesses.

- Includes language that prohibits expenses to retrieve certain information electronically.

- Includes language that prohibits expenses to deny an application for certain licenses.

Federal Prison System:

- Includes language that provides for the transfer to the Health Resources and System Administration funds necessary for medical relief of inmates.

- Includes language that provides authority to the Director to enter into contracts to furnish health care.

- Includes limitation on funds for receptions and provides authority for the Federal Prison System to accept donated property and services.

Building and Facilities:

- Includes language stating labor of prisoners may be used for work.

Federal Prison Industries, Incorporated:

- Includes language authorizing Federal Prison Industries to make expenditures in accord with the law.

- Includes a limitation on administrative expenses for Federal Prison Industries.

State and Local Law Enforcement Activities Office on Violence Against Women:

- Includes a limitation on funds to be made available for expenses related to evaluation, training, and technical assistance, and provides for specific appropriations for various programs within the Office on Violence Against Women.

Office of Justice Programs:

- Includes language providing funds for grants, contracts and other cooperative agreements, which may include research and development, and provides for specific appropriations for various programs within Office of Justice.

State and Local Law Enforcement Assistance:

- Includes language providing funds for grants, contracts and other cooperative agreements, and provides for specific appropriations for various programs and activities.

Juvenile Justice Programs:

- Includes language providing funds for grants, contracts and other cooperative agreements, which may include research and development, and provides for specific appropriations for various programs and activities.

Community Oriented Policing Services:

- Includes language providing funds for grants, contracts and other cooperative agreements, which may include research and de-

velopment, and provides for specific appropriations for various programs and activities.

- Includes language regarding funds derived from deobligated balances shall be available in accordance with the provisions of section 505 of this Act.

General Provisions, Department of Justice:

- Includes a provision making available additional reception and representation funding for the Attorney General from the amounts provided in this title.

- Includes a prohibition on the use of funds to pay for an abortion, except in the case of rape or to preserve the life of the mother.

- Includes a prohibition on the use of funds to require any person to perform or facilitate the performance of an abortion.

- Includes a provision establishing the obligation of the Director of the Bureau of Prisons to provide escort services to inmates receiving an abortion outside of a Federal facility, except where this obligation conflicts with the preceding section.

- Includes a provision establishing the Committee's requirements and procedures for transfer proposals, and deletes certification requirements for transfers from the Buildings and Facilities account of the Federal Prison System.

- Includes an authorization for the Attorney General to extend an ongoing Personnel Management Demonstration Project.

- Includes an extension of specified authorities to the Bureau of Alcohol, Tobacco, Firearms and Explosives for undercover operations.

- Includes a prohibition on the use of funds for transporting prisoners classified as maximum or high security, other than to a facility certified by the Bureau of Prisons as appropriately secure.

- Includes a prohibition on the use of funds for the purchase or rental by Federal prisons of audiovisual equipment, services and materials used primarily for recreational purposes, except for those items and services needed for inmate training, religious, or educational purposes.

- Includes a requirement for review by the Deputy Attorney General and the Department Investment Review Board prior to the obligation or expenditure of funds for major information technology projects.

- Includes a provision requiring the Department to follow reprogramming procedures prior to any deviation from the program amounts specified in this title or the reuse of deobligated funds provided in previous years.

- Includes a prohibition on the use of funds for A-76 competitions for work performed by employees of the Bureau of Prisons or Federal Prison Industries, Inc.

- Includes a prohibition on the use of funds to pay the salary, benefits or expenses of a U.S. Attorney performing dual duties that exempt that U.S. Attorney from established residency requirements.

- Includes a prohibition on the use of funds for future phases of the Sentinel program until the AG certifies that work on existing phases has been substantially completed under a validated performance baseline.

- Includes a provision that requires the Department of Justice in making grants under any discretionary grant program to conduct a peer review process and to strictly adhere to the rankings made.

Title III—Science

National Aeronautics and Space Administration:

Space Operations:

- Includes language providing specific amounts for Space Shuttle and International Space Station operations.
- Includes language that states that amounts provided for Space operations include expenses of certain utilization flights, which shall be considered henceforth as baseline flight, and requires the Administrator to certify to the Congress that each mission is necessary and can be flown safely.

Cross-Agency Support Programs:

- Includes language providing for specific sums for independent verification and validation activities.
- Includes language that stipulates that funds provided for specific items shall be available in the amounts specified in the report accompanying this Act.

Administrative Provisions:

- Includes language providing for extended availability of funds for construction of facilities, environmental compliance and restoration activities, and announced prices, as authorized by law.
- Includes language regarding transfers of funds.
- Includes language regarding reductions in force.
- Includes language that requires a report on the full costs associated with Space Shuttle retirement and transition activities.
- Includes language limiting the number of non-career employees at NASA and prohibits the detail of such non-career employees outside of the agency.

National Science Foundation:

- Includes language regarding the procurement of polar icebreaking services, reimbursements to the Coast Guard for sums as agreed to according to the existing memorandum of agreement, and authority to credit to the appropriation receipts from support services and materials.

Agency Operations and Award Management:

- Includes language regarding contracts for maintenance and operation of facilities and the reimbursement for security guard services.

Office of the National Science Board:

- Includes language funds for official reception and representation.

Title IV—Related Agencies

Commission on Civil Rights:

- Includes language prohibiting expenses to employ a specific level of full-time individuals or to reimburse Commissioners for certain billable days.

Equal Employment Opportunity Commission:

- Includes language limiting funds for official reception and representation.

- Includes language prohibiting any action to implement any workforce repositioning, except as in accordance with the provisions of section 505 of this Act.

Legal Services Corporation:

- Includes language regarding pay for officers and employees.

Office of the United States Trade Representative:

- Includes language limiting funds for official reception and representation and provides funding for specific activities.

State Justice Institute:

- Includes language limiting funds for reception and representation.

Title V—General Provisions

Section 501 prohibits the use of funds for publicity or propaganda purposes unless expressly authorized by law.

Section 502 prohibits any appropriation contained in this Act from remaining available for obligation beyond the current fiscal year unless explicitly authorized.

Section 503 provides that the expenditure of any appropriation contained in the Act for any consulting service through procurement contracts shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law or under existing Executive Order issued pursuant to existing law.

Section 504 provides that if any provision of the Act or the application of such provision to any person or circumstance shall be held invalid, the remainder of the Act and the application of such provisions to persons or circumstances other than those to which it is held invalid shall not be affected.

Section 505 provides for the Committee's policy concerning the reprogramming of funds. Section 505(a) prohibits the reprogramming of funds which: (1) creates or initiates a new program, project or activity; (2) eliminates a program, project, or activity; (3) increases funds or personnel by any means for any project or activity for which funds have been denied or restricted; (4) relocates offices or employees; (5) reorganizes or renames offices; (6) reorganizes programs or activities; or (7) contracts out or privatizes any function or activity presently performed by Federal employees unless the Appropriations Committees of both Houses of Congress are notified 15 days in advance. Section 505(b) prohibits a reprogramming of funds in excess of \$500,000 or 010 percent, whichever is less, that: (1) augments existing programs, projects, or activities; (2) reduces by 010 percent funding for any existing program, project, or activity, or numbers of personnel by 010 percent as approved by Congress; or (3) results from any general savings, including savings from a reduction in personnel, which would result in a change in existing programs, activities, or projects as approved by Congress unless the Appropriations Committees of both Houses of Congress are notified 15 days in advance. The Committee has again included carryover funds under the requirements of section 505 to clarify that agencies must follow reprogramming procedures with respect to carryover funds.

Section 506 prohibits funds from being used to implement, administer, or enforce any guidelines of the Equal Employment Op-

portunity Commission covering harassment based on religion similar to proposed guidelines published by the EEOC in October 1993.

Section 507 provides that if it is determined that any person intentionally affixes a “Made in America” label to any product that was not made in America that person shall not be eligible to receive any contract or subcontract with funds made available in this Act.

Section 508 requires quarterly reporting to Congress of unobligated balances that were received during any previous fiscal year.

Section 509 provides that any closing or downsizing costs incurred by a department or agency funded under this Act resulting from funding reductions in the Act shall be absorbed within the budgetary resources available to the Department or agency, and provides transfer authority between appropriation accounts to carry out the provision, subject to reprogramming procedures.

Section 5010 prohibits funds made available in this Act from being used to promote the sale or export of tobacco or tobacco products or to seek the reduction or removal of foreign restrictions on the marketing of tobacco products, provided that such restrictions are applied equally to all tobacco products or tobacco products of the same type. This provision is not intended to impact routine international trade services provided to all U.S. citizens, including the processing of applications to establish foreign trade zones.

Section 511 prohibits funds made available in this Act from being used to implement a Federal user fee for background checks conducted pursuant to the Brady Handgun Control Act of 1993, or to implement a background check system that does not require and result in the destruction of certain information within 24 hours.

Section 512 delays the obligations of any receipts deposited into the Crime Victims Fund in excess of \$650,000,000 until October 1, 2009. This language is continued to ensure a stable source of funds will remain available for the program, despite inconsistent levels of criminal fines deposited annually into the fund. Requested language rescinding the remaining balances in the Crime Victims Fund is not included.

Section 513 prohibits the use of Department of Justice funds for programs that discriminate against or denigrate the religious beliefs of students participating in such programs.

Section 514 prohibits the transfer of funds in the Act to any department or agency of the United States Government, except for transfers made under authorities provided in this, or any other appropriations Act.

Section 515 provides that funds provided for E-Government Initiatives shall be subject to the procedures set forth in section 505 of this Act.

Section 516 requires the Bureau of Alcohol, Tobacco, Firearms and Explosives to include specific language in any release of tracing study data that makes clear that trace data cannot be used to draw broad conclusions about firearms-related crime.

Section 517 requires certain timetables of audits performed by Inspectors General of the departments and agencies funded in this Act.

Section 518 prohibits the use of funds to process patents of human organisms. The Committee concurs with the intent of this provision as expressed in the colloquy between the provision’s spon-

sor in the House and the Ranking Minority Member of the House Committee on Appropriations as occurred on July 22, 2003, with respect to any existing patents on stem cells.

Section 519 prohibits the use of funds in this Act to be used to support or justify torture by any official or contract employee of the United States Government.

Section 520 prohibits the use of funds in this Act to require certain export licenses.

Section 521 prohibits the use of funds in this Act to deny certain import applications regarding “curios or relics” firearms, parts, or ammunition.

Section 522 prohibits the use of funds to include certain language in trade agreements.

Section 523 prohibits the use of funds in this Act to authorize or issue a National Security Letter (NSL) in contravention of certain laws authorizing the Federal Bureau of Investigation to issue NSLs.

Section 524 regarding the use of funding in this Act to be used to implement a revision to OMB A–76 circular made on May 29, 2003. Section 525 requires the congressional notification of any project within the Departments of Commerce or Justice, or the National Science Foundation and the National Aeronautics and Space Administration totaling more than \$75,000,000 that has cost increases of at least 010 percent.

Section 526 deems funds for intelligence or intelligence-related activities as authorized by the Congress until the enactment of the Intelligence Authorization Act for Fiscal Year 2009.

Section 527 prohibits contracts or grant awards in excess of \$5,000,000 to any specific contractor or grantee that has not certified that he has filed all Federal tax returns, has not been convicted of a criminal offense under the IRS Code of 1986, and has no unpaid Federal tax assessment.

Section 528 provides for rescissions of unobligated balances in the certain department and agencies funded in the Act.

APPROPRIATIONS NOT AUTHORIZED BY LAW

Pursuant to clause 3(f)(1) of rule XIII of the Rules of the House of Representatives, the following table lists the appropriations in the accompanying bill which are not authorized by law:

Agency/program	Last year of authorization	Authorization level	Appropriations in last year of authorization	Appropriations in this bill
TITLE I—DEPARTMENT OF COMMERCE				
Economic Development Administration, S&E	2008	such sums	\$30,832	\$32,800
Economic Development Administration, Public Works and Economic Development	2008	\$425,000	235,000	138,280
Economic Development Administration, Trade adjustment Assistance	2008	such sums	14,0100	15,800
International Trade Administration	1996	such sums	248,726	434,870
Bureau of Industry and Security	2001	such sums	64,711	83,676
National Telecommunications and Information Administration	1993	19,400	21,823	40,946
National Oceanic and Atmospheric Administration	various	4,252,640
TITLE II—DEPARTMENT OF JUSTICE				
Vaccine Injury Compensation Trust Fund (permanent)	1992	4,058	6,333	7,833

Agency/program	Last year of au- thorization	Authorization level	Appropriations in last year of au- thorization	Appropriations in this bill
Office of Violence Against Women Programs:				
Training for Judicial Personnel	2005	2,300	1,925	3,000
Research on Violence against Indian Women	2008	1,000	1,000

Space operations	2008	(²)	(²)	5,764,7010
Office of Inspector General	2008	(²)	(²)	33,600
TITLE IV—RELATED AGENCIES				
Commission on Civil Rights	1995	9,500	9,096	8,800
Interantional Trade Commission	2004	57,240	61,700	75,0100
Payment to Legal Services Corporation	1980	such sums	300,000	390,000

Agency/program	Last year of authorization	Authorization level	Appropriations in last year of authorization	Appropriations in this bill
Marine Mammal Commission	1999	1,750	1,890	3,200
Office of the U.S. Trade Representative	2004	33,0108	41,552	48,272
State Justice Institute	2008	7,000	3,760	4,0100

¹The Office of Community Oriented Policing Services is authorized through 2009 as a single grant program \$1,047,000,000, which does not directly correspond to the account structure in this Act.

²The NASA Authorization Act for 2005, which provided authorizations for appropriations Operations; Science, Aeronautics and Exploration; Exploration Capabilities and Inspector General.

TRANSFERS OF FUNDS

Pursuant to Clause 3(f)(2) of rule XIII of the Rules of the House of Representatives, language is included transferring unexpended balances as follows:

Under Department of Justice, General Provisions, language is included making trangers from balances of Asset Forfeiture funds to Legal Activities.

RESCISSIONS

Pursuant to clause 3(f)(2) of rule XIII of the Rules of the House of Representatives, the following table is submitted describing the recessions recommended in the accompanying bill:

Department of Commerce:	
Economic Development Administration	–\$14,000,000
International Trade Administration	–2,000,000
National Oceanic and Atmospheric Administration	–9,000,000
National Institute of Standards and Technology	–8,500,000
National Telecommunications and Information Administration	–1,200,000
Census	–1,000,000
Department of Justice:	
Assets Forfeiture Funds	–285,000,000
Working Capital Fund	–0100,000,000
Office of Justice Programs	–0100,000,000
Community Oriented Policing Services	–0100,000,000

COMPARISON WITH THE BUDGET RESOLUTION

Clause 3(c)(2) of rule XIII of the Rules of the House of Representatives requires an explanation of compliance with section 308(a)(1)(A) of the Congressional Budget and Impoundment Control Act of 1974 (Public Law 93–344), as amended, which requires that the report accompanying a bill providing new budget authority contain a statement detailing how that authority compares with the report submitted under section 302 of the Act for the most recently agreed to concurrent resolution on the budget for the fiscal year from the Committee's section 302(a) allocation.

[In millions of dollars]

	302(b) allocation		This bill	
	Budget authority	Outlays	Budget authority	Outlays
General purpose discretionary	56,858	57,000	56,858	56,953
Mandatory	221	224	221	224

FIVE-YEAR OUTLAY PROJECTIONS

In compliance with section 308(a)(1)(B) of the Congressional Budget and Impoundment Control Act of 1974 (Public Law 93-344), as amended, the following table contains five-year projections associated with the budget authority provided in the accompanying bill:

Fiscal year 2009 outlays

	<i>In millions of dollars</i>
Budget Authority	56,858
Outlays:	
2009	36,974
2010	14,768
2011	4,339
2012	2,047
2013	883

ASSISTANCE TO STATE AND LOCAL GOVERNMENTS

In accordance with section 308(a)(1)(C) of the Congressional Budget and Impoundment Control Act of 1974 (Public Law 93-344), as amended, the fiscal assistance to State and local government is as following:

	<i>Millions of dollars</i>
FY 2009 new budget authority	1,295
FY 2009 outlays resulting therefrom	80

CONSTITUTIONAL AUTHORITY

Clause 3(d)(1) of rule XIII of the Rules of the House of Representatives states that:

Each report of a committee on a bill or joint resolution of a public character shall include a statement citing the specific powers granted to the Congress in the Constitution to enact the law proposed by the bill or joint resolution.

The Committee on Appropriations bases its authority to report this legislation from Clause 7 of Section 9 of Article I of the Constitution of the United States of America, which states:

No money shall be drawn from the Treasury but in consequence of Appropriations made by law. * * *

Appropriations contained in this Act are made pursuant to this specific power granted by the Constitution.

STATEMENT OF GENERAL PERFORMANCE GOALS AND OBJECTIVES

Pursuant to clause 3(c)(4) of rule XIII of the Rules of the House of Representatives, the following is a statement of general performance goals and objectives for which this measure authorizes funding:

The Committee on Appropriations considers program performance, including a program's success in developing and attaining outcome-related goals and objectives in developing funding recommendations.

COMPLIANCE WITH RULE XIII CL. 3(e) (RAMSEYER RULE)

In compliance with clause 3(e) of rule XIII of the Rules of the House of Representatives, the Committee notes that the accom-

panying bill does not propose to repeal or amend a statute or part thereof.

ROLL CALL VOTES TAKEN IN COMMITTEE

In compliance with clause 3(b) of rule XIII, the Committee notes that no roll call votes were taken during its consideration of the bill.

CONGRESSIONAL EARMARKS

The following table is submitted in compliance with clause 9 of Rule XXI, and lists the congressional earmarks (as defined in paragraph (d) of clause 9) contained in the bill or in this report. Neither the bill nor the report contain any limited tax benefits or limited tariff benefits as defined in paragraphs (e) or (f) of clause 9 of Rule XXI.

amendment transmitted to Congress on June 9th.

ADDITIONAL VIEWS OF JERRY LEWIS AND RODNEY P.
FRELINGHUYSEN

We commend Chairman Mollohan and Chairman Obey for the rigorous approach they have brought to carrying out the Subcommittee's oversight responsibilities, and for the even-handed and collaborative approach taken in assembling this bill providing appropriations for the Departments of Commerce and Justice, Science, and Related agencies for fiscal year 2009. The bill includes important increases to programs that represent top national priorities, including counterterrorism, crime fighting, and scientific research and education. Both Chairman Mollohan and Chairman Obey have been open and responsive to issues and concerns raised by Republican Members and we appreciate their commitment to bipartisanship and regular order during consideration of this bill through the Committee process.

The allocation given to the Subcommittee is \$56.9 billion, which is \$5 billion or 9.8% above 2008, and \$3.2 billion or 5.9% above the President's request. We believe that the Subcommittee could have met the most pressing funding needs by prioritizing within a lower allocation. With this very generous allocation virtually every agency and account in the bill is funded at, or above, the President's request. This corresponds with the majority's overall budget blueprint which adds a total of \$21 billion to the President's proposed budget for fiscal year 2009, and adds \$241 billion in new spending over the next five years, requiring tax increases of more than \$683 billion over the same time period. If we abandon budget discipline and avoid hard choices, the result will be that the household budgets of American families will be squeezed even further. To illustrate the different spending philosophies of Republicans and Democrats, one need only look back to the fiscal year 2007 CJS bill produced under a Republican majority. The fiscal year 2007 House bill for these same departments and agencies had an allocation that exceeded the President's request by less than a quarter of one percent. That bill successfully addressed critical priorities and passed the House with an overwhelming bipartisan vote.

For the Department of Commerce, the bill fully supports the original request for the 2010 Decennial Census. However, the Committee recently received a budget amendment requesting an additional \$540,380,000 in fiscal year 2009 appropriations to plan for a paper-based non-response follow-up operation that is now necessary due to cost, schedule and performance problems with a major information technology contract. This bill does not address that additional requirement. We look forward to working with the Majority to address management problems and ultimately provide the necessary funds to ensure an accurate and timely Decennial Census.

We are pleased that the Chairman offered an amendment that was adopted by the Committee to increase the Manufacturing Extension Partnership program to the authorized level of \$122,000,000. The need for this increase was brought to the Committee's attention by Rep. Knollenberg, and is supported by many Members on both sides of the aisle. We also appreciate the small but important increases provided to the International Trade Administration, the U.S. Trade Representative and the International Trade Commission. The work of these agencies is critical to support the growth of free and fair trade, a key to our future economic well-being and security.

We congratulate the Chairman on the strong overall funding level of \$816,860,000 provided for the National Institute of Standards and Technology (NIST). However, we would have preferred to set different priorities within NIST that would more directly foster innovation and competitiveness, while at the same time require less spending. The President's Science Advisor, in his testimony before the Subcommittee, named NIST's core research budget as the top priority science investment in the bill. NIST's core research budget is funded at \$34,340,000 below the request while the bill includes \$65,200,000 above the President's request for the Technology Innovation Program (the successor to the Advanced Technology Program) and \$30,000,000 for an unrequested and unauthorized construction grant program.

Likewise, the overall funding level for NOAA includes many important increases for programs such as the National Weather Service and for climate research. However, the overall NOAA funding level is an increase of \$356,156,000, or 9.1%, above the fiscal year 2008 level; more than sufficient to allow increases throughout NOAA's extensive roster of programs.

We strongly support the decision to fully fund the Federal Bureau of Investigation (FBI). This level is necessary in order to continue current staffing and operations levels while also funding urgent increases in national security programs. In addition to increases for counterterrorism and counterintelligence, the bill includes important enhancements for other FBI priority areas, including child exploitation, intellectual property crime, and mortgage fraud. This Committee has been at the forefront of advancing the FBI's transformation into our nation's premier counterterrorism agency, and we are pleased that we are able to continue that support this year.

In addition, the bill includes strong funding levels for other Federal Law Enforcement accounts. Most Federal Law Enforcement accounts are funded at least at the President's request. These levels are necessary to maintain staffing and operations at the Drug Enforcement Administration (DEA), the Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), the U.S. Marshals Service, and U.S. Attorneys offices, and to support additional activities on the Southwest Border.

The bill will make a real impact in the fight against child exploitation. It includes \$63,000,000 for Missing and Exploited Children programs; \$10,000,000 for sex offender management assistance; and increases of \$16,000,000 for Federal Law Enforcement agencies

to combat child exploitation using the Internet, and to apprehend unregistered sex offenders.

We are pleased that the bill includes increased funding for the DEA's Mobile Enforcement Teams to help local law enforcement deal with the most acute cases of drug-related crime and violence. With the resources provided in this bill, the DEA can begin work toward the goal of re-establishing a MET in each DEA field division.

The bill also includes over \$3.1 billion for State and Local Law Enforcement accounts, including programs addressing violence against women, gangs, and methamphetamine, as well as an increase of \$10,000,000 in the State Criminal Alien Assistance Program (SCAAP). The costs incurred by local jurisdictions to incarcerate undocumented criminal aliens continue to rise. The SCAAP program provides important partial Federal reimbursement for costs related to what is truly a national not a local problem: immigration enforcement. Actual costs incurred by local jurisdictions for these incarceration expenses have been estimated at approximately \$800 million, roughly double the amount provided in the bill. The bill also restores funding to the Byrne/Justice Assistance Grants program at \$550,000,000, an increase of over \$379,000,000 above the enacted level.

For NASA, the bill includes \$17,768,967,000, which is \$154,767,000 above the request. We appreciate that this level includes requested funding to keep NASA on track with the development of the Orion and Ares Exploration systems, while also providing increases for Space Science and Aeronautics Research.

For the NSF, we are very pleased by the overall funding level, but note that the core research account that is the Nation's primary source of support for transformative basic scientific research is cut \$49,850,000 below the request. We would have preferred that full funding for the research account take precedence over other Foundation programs and activities.

In conclusion, while we have concerns with the overall spending in the bill, we would like to again express appreciation to Chairman Mollohan and Chairman Obey for their openness and consideration. We are grateful for the cooperative approach, and look forward to working together as the process continues to produce a bill that funds critical national priorities.

JERRY LEWIS.

RODNEY P. FRELINGHUYSEN.
