

Foreign Names Information Bulletin Number 8

PURPOSE OF THIS BULLETIN

Continuing changes in various parts of the world have necessitated a publication that rapidly provides to users of geographic names the latest information on changes in the names of countries, first-order administrative divisions (such as a state in the United States), important populated places, and other significant geographic features. To satisfy that requirement, the U.S. Board on Geographic Names (BGN) has initiated the publication of the *Foreign Names Information Bulletin*.

This eighth bulletin provides former names and new names of major features approved by the BGN since the issuance of the seventh bulletin in September 1994. To obtain previous issues of the *Foreign Names Information Bulletin*, please call one of the following numbers:

Washington, DC area:	(301) 227-2495
Outside the Washington, DC area:	(800) 826-0342

The *Foreign Names Information Bulletin* includes all of the names changes which formerly would have appeared in the quarterly publication, *Foreign Names Decisions of the U.S. Board on Geographic Names*. The latter publication has now been discontinued.

INTERPRETATION OF ENTRIES

- Names from languages which are not written in Roman script are spelled in accordance with BGN-approved romanization systems.
- **Bolded** parts of names identify short-form names. Both short-form and long-form names are approved for use.
- In entries in which more than one name is approved, each name is identified in brackets and any or all names may be used.
- Conventional names are English-language names which are in current usage and which are approved by BGN.
- Diacritics are graphic marks usually occurring above or below a letter, indicating differences in pronunciation or meaning, as compared to an unmarked letter of the alphabet. Examples are the acute accent (´) and the cedilla (¸).
- Federal Government users should follow their own agency's policy on the use of local names versus conventional names for those features for which both types of names are approved.
- The special letter Ə ə, which is utilized in the new Azerbaijani Roman-script names, should be reproduced in that form whenever encountered. In those instances when it cannot be reproduced, however, the letter Ä ä may be substituted for it.

DESIGNATION CODES AND DESIGNATIONS

ADM1	first-order administrative division (for example, a province)
ADM2	second-order administrative division
ADM3	third-order administrative division
ADMD	administrative division
PCL	political entity (undifferentiated)
PCLI	independent political entity
PPL	populated place
RGN	region
STM	stream
