

Foreign Names Information Bulletin Number 5

PURPOSE OF THIS BULLETIN

Continuing changes in various parts of the world have necessitated a publication that rapidly provides to users of geographic names the latest information on changes in the names of countries, first-order administrative divisions (such as a state in the United States), important populated places, and other significant geographic features. To satisfy that requirement, the U.S. Board on Geographic Names (BGN) has initiated the publication of the *Foreign Names Information Bulletin*.

This fifth bulletin provides former names and new names of major features approved by the BGN since the issuance of the fourth bulletin in February 1993. Much of the information contained in this bulletin can also be found in the BGN periodical, *Foreign Names Decisions of the U.S. Board on Geographic Names*.

To obtain previous issues of the *Foreign Names Information Bulletin*, please call one of the following numbers:

Washington, DC area:	(301) 227-2495
Outside the Washington, DC area:	(800) 826-0342

Requests for the periodical *Foreign Names Decisions of the U.S. Board on Geographic Names* should be addressed to:

Director

Bethesda, MD 20816-5001

INTERPRETATION OF ENTRIES

- **Bolded** parts of names identify short-form names. Both short-form and long-form names are approved for use.
- In entries in which more than one name is approved, each name is identified in brackets and any or all names may be used.
- Federal Government users should follow their own agency's policy on the use of local names versus conventional names for those features for which both types of names are approved.
